Independent Auditor's Report on Comments and Suggestions

To the Honorable Members of
the Board of Directors
Blue Ridge Regional Jail Authority
Lynchburg, Virginia

In planning and performing our audit of the financial statements of the business-type activities, the major fund, and the aggregate remaining fund information of the Blue Ridge Regional Jail Authority (the "Authority"), as of and for the year ended June 30, 2024, in accordance with auditing standards generally accepted in the United States of America, we considered its internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in circumstances for the purpose of expressing our opinion on the financial statements and to comply with any other applicable standards, such as *Government Auditing Standards*, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we do not express an opinion on the effectiveness of the entity's internal control.

Our consideration of internal control was for the limited purpose described in the first paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that were not identified. In addition, because of inherent limitations in internal control, including the possibility of management override of controls, misstatements due to error or fraud may occur and not be detected by such controls.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

If material weaknesses or significant deficiencies were identified during our procedures they are appropriately designated as such in this report. Additional information on material weaknesses or significant deficiencies and compliance and other matters is included in the ***Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards*** which should be read in conjunction with this report.

Additionally, during our audit, we may have become aware of certain other matters that provide opportunities for improving your financial reporting system and/or operating efficiency. Such comments and suggestions regarding these matters, if any, are also included in the attached report, but are not designated as a material weakness or significant deficiency. Since our audit is not designed to include a detail review of all systems and procedures, these comments should not be considered as being all-

inclusive of areas where improvements might be achieved. We also have included information on accounting and other matters that we believe is important enough to merit consideration by management and those charged with governance. It is our hope that our suggestions will be taken in the constructive light in which they are offered.

We have already discussed these comments and suggestions with management, and we will be pleased to discuss them in further detail at your convenience, to perform any additional study of these matters, or to assist you in implementing the recommendations.

This communication is intended solely for the information and use of the Authority, management, and the appropriate state and federal regulatory agencies and is not intended to be, and should not be, used by anyone other than these specified parties.

Segregation of Duties (Significant Deficiency)

An important aspect of any internal control system is the segregation of duties. In an ideal system, no individual would perform more than one duty in connection with any transaction or series of transactions. Accordingly, each transaction should be processed through two or more unrelated individuals with the result that the work of one is under constant review of the other, thereby reducing the risk of impropriety. With limited staff, sufficiently separating duties can be difficult or even impossible. As with all areas of internal control, management and those charged with governance should make careful decisions about the costs versus benefit of any internal control.

The Authority lacks a full segregation of duties in certain areas, although there are compensating controls, including reviews by management and daily review of cash activity by the fiscal technician. Areas where duties are not fully segregated include:

- The payroll specialist who processes payroll and the director of administrative services that approves the payroll have access to set up new employees, change salaries, and pay rates in the payroll system. One compensating control in place is that the assistant administrator, who has no access to the payroll system, reviews and approves the payroll change log report.
- The director of administrative services has administrative user rights in the accounting system.

We recommend that management review and discuss the above control points. In general, segregating duties rather than relying upon compensating controls will provide the strongest control structure. Also, the effectiveness of compensating controls is highly dependent upon the rigor and skepticism with which they are applied.

Current Status: Still applicable.

Disaster Recovery Plan

The Authority does not have a formal disaster recovery plan for IT in place to help ensure proper and timely recovery in case of a disaster. We also recommend that this plan be appropriately tested to assist in ensuring its viability. Scenarios should include, but not be limited to, non-availability of key staff and assumed potential unavailability of other resources. The plan should also include protecting and restoring any necessary files that might reside on workstations that are not backed up as part of the regular processes.

Current Status: Still applicable.

New GASB Pronouncements

In this section, we would like to make you aware of certain confirmed and potential changes that are on the horizon that may affect your financial reporting and audit.

The GASB issued **Statement No. 101, *Compensated Absences*** in June 2022. The objective of this Statement is to better meet the information needs of financial statement users by updating the recognition and measurement guidance for compensated absences. That objective is achieved by aligning the recognition and measurement guidance under a unified model and by amending certain previously required disclosures. This Statement requires that liabilities for compensated absences be recognized for (1) leave that has not been used and (2) leave that has been used but not yet paid in cash or settled through noncash means. A liability should be recognized for leave that has not been used if (a) the leave is attributable to services already rendered, (b) the leave accumulates, and (c) the leave is more likely than not to be used for time off or otherwise paid in cash or settled through noncash means. Leave is attributable to services already rendered when an employee has performed the services required to earn the leave. Leave that accumulates is carried forward from the reporting period in which it is earned to a future reporting period during which it may be used for time off or otherwise paid or settled. In estimating the leave that is more likely than not to be used or otherwise paid or settled, a government should consider relevant factors such as employment policies related to compensated absences and historical information about the use or payment of compensated absences. However, leave that is more likely than not to be settled through conversion to defined benefit postemployment benefits should not be included in a liability for compensated absences.

This Statement requires that a liability for certain types of compensated absences—including parental leave, military leave, and jury duty leave—not be recognized until the leave commences. This Statement also requires that a liability for specific types of compensated absences not be recognized until the leave is used.

This Statement also establishes guidance for measuring a liability for leave that has not been used, generally using an employee's pay rate as of the date of the financial statements. A liability for leave that has been used but not yet paid or settled should be measured at the amount of the cash payment or noncash settlement to be made. Certain salary-related payments that are directly and incrementally associated with payments for leave also should be included in the measurement of the liabilities.

With respect to financial statements prepared using the current financial resources measurement focus, this Statement requires that expenditures be recognized for the amount that normally would be liquidated with expendable available financial resources.

The requirements of this Statement are effective for fiscal years beginning after December 15, 2023, and all reporting periods thereafter. Earlier application is encouraged.

The GASB issued **Statement No. 102, *Certain Risk Disclosures*** in December 2023. State and local governments face a variety of risks that could negatively affect the level of service they provide or their ability to meet obligations as they come due. Although governments are required to disclose information about their exposure to some of those risks, essential information about other risks that are prevalent among state and local governments is not routinely disclosed because it is not explicitly required. The objective of this Statement is to provide users of government financial statements with essential information about risks related to a government's vulnerabilities due to certain concentrations or constraints.

This Statement defines a concentration as a lack of diversity related to an aspect of a significant inflow of resources or outflow of resources. A constraint is a limitation imposed on a government by an external party or by formal action of the

Blue Ridge Regional Jail Authority

Accounting and Other Matters

June 30, 2024

government's highest level of decision-making authority. Concentrations and constraints may limit a government's ability to acquire resources or control spending.

This Statement requires a government to assess whether a concentration or constraint makes the primary government reporting unit or other reporting units that report a liability for revenue debt vulnerable to the risk of a substantial impact. Additionally, this Statement requires a government to assess whether an event or events associated with a concentration or constraint that could cause the substantial impact have occurred, have begun to occur, or are more likely than not to begin to occur within 12 months of the date the financial statements are issued.

If a government determines that those criteria for disclosure have been met for a concentration or constraint, it should disclose information in notes to financial statements in sufficient detail to enable users of financial statements to understand the nature of the circumstances disclosed and the government's vulnerability to the risk of a substantial impact. The disclosure should include descriptions of the following:

- The concentration or constraint
- Each event associated with the concentration or constraint that could cause a substantial impact if the event had occurred or had begun to occur prior to the issuance of the financial statements
- Actions taken by the government prior to the issuance of the financial statements to mitigate the risk.

The requirements of this Statement are effective for fiscal years beginning after June 15, 2024, and all reporting periods thereafter. Earlier application is encouraged.

Current GASB Projects

GASB currently has a variety of projects in process. Some of these projects discussed below.

Classification of Nonfinancial Assets. The objective of this project would be to reconsider the existing classification of nonfinancial assets and other related sub-classifications (for example, capital assets or intangible assets) to ensure that (1) assets are classified in a way that provides the most relevant financial information and (2) the definitions of the classifications are understandable and appropriate to meeting financial reporting objectives. The project also will consider how any classification changes would affect financial statement presentation and disclosure of nonfinancial assets. The project will not, however, reexamine recognition or measurement of nonfinancial assets. This project is currently in exposure draft period.

Financial Reporting Model. The objective of this project is to make improvements to the financial reporting model, including Statement No. 34, *Basic Financial Statements – and Management’s Discussion and Analysis – for State and Local Governments*, and other reporting model-related pronouncements (Statements No. 35, *Basic Financial Statements – and Management’s Discussion and Analysis – for Public Colleges and Universities*, No. 37, *Basic Financial Statements – and Management’s Discussion and Analysis – for State and Local Governments: Omnibus*, No. 41, *Budgetary Comparison Schedules – Perspective Differences*, and No. 46, *Net Assets Restricted by Enabling Legislation, and Interpretation No. 6, Recognition and Measurement of Certain Liabilities and Expenditures in Governmental Fund Financial Statements*). The objective of these improvements would be to enhance the effectiveness of the model in providing information that is essential for decision-making and enhance the ability to assess a government’s accounting and address certain application issues, based upon the results of the pre-agenda research on the financial reporting model. This project is currently in exposure draft re-deliberations period.

Going Concern Uncertainties and Severe Financial Stress. The objective of this project is to address issues related to disclosures regarding going concern uncertainties and severe financial stress. The project will consider (1) improvements to existing guidance for going concern considerations to address diversity in practice and clarify the circumstances under which disclosure is appropriate, (2) developing a definition of severe financial stress and criteria for identifying when governments should disclose their exposure to severe financial stress, and (3) what information about a government’s exposure to severe financial stress is necessary to disclose. This project is currently in the initial deliberations period.

Infrastructure Assets. The objective of this project is to address issues related to accounting and financial reporting for infrastructure assets. The project would evaluate standards-setting options related to reporting infrastructure assets to make information (1) more comparable across governments and more consistent over time, (2) more useful for making decisions and assessing government accountability, (3) more relevant to assessments of a government’s economic condition, and (4) better reflect the capacity of those assets to provide service and how that capacity may change over time. This project is currently in the initial deliberations period.

Revenue and Expense Recognition. The objective of this project is to develop a comprehensive application model for the classification, recognition, and measurement of revenues and expenses. The purpose for developing a comprehensive model is (1) to improve the information regarding revenues and expenses that users need to make decisions and assess accountability, (2) to provide guidance regarding exchange and exchange-like transactions that have not been specifically addressed, (3) to evaluate revenue and expense recognition in the context of the conceptual framework, and (4) to address application issues identified in practice, based upon the results of the pre-agenda research on revenue for exchange and exchange-like transactions. This project is currently in the preliminary views re-deliberations period.

Subsequent Events. The objective of this project is to improve the accounting and financial reporting for subsequent events. The project will reexamine existing requirements related to subsequent events in Statement No. 56, *Codification*

Blue Ridge Regional Jail Authority

Accounting and Other Matters

June 30, 2024

of Accounting and Financial Reporting Guidance Contained in the AICPA Statements on Auditing Standards, to address issues related to (1) confusion about and challenges associated with applying the existing standards, (2) inconsistency in practice in the information provided about subsequent events, and (3) the usefulness of the information provided about subsequent events. This project is currently in the initial deliberations period toward an Exposure Draft.
