Independent Auditors' Report

To the Members of the Town Council Town of Wytheville, Virginia Wytheville, Virginia

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Wytheville, Virginia, as of and for the year ended June 30, 2011, which collectively comprise the entity's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the Town of Wytheville, Virginia's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the *Specifications for Audits of Counties, Cities, and Towns*, issued by the Auditor of Public Accounts of the Commonwealth of Virginia. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and the significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Wytheville, Virginia as of June 30, 2011, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As described in Note 1 to the financial statements, the Town of Wytheville, Virginia adopted the provisions of *GASB Statement No. 54, Fund Balance Reporting and Governmental Fund Type Definitions*, effective July 1, 2010.

In accordance with *Government Auditing Standards*, we have also issued our report dated November 10, 2011, on our consideration of the Town of Wytheville, Virginia's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and is important for assessing the results of our audit.

Accounting principles generally accepted in the United States of America require that the budgetary comparison information and schedules of pension and OPEB funding progress be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operations, economic, or historical context. We have applied certain limited procedures to the schedules of funding progress in accordance with auditing standards generally accepted in the

United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion of provide any assurance on the schedules of funding progress because the limited procedures do not provide us with sufficient evidence to express and opinion or provide any assurance. The budgetary comparison information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Management has omitted the management's discussion and analysis that accounting principles generally accepted in the United States of America require to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an operational, economic, or historical context. Our opinion on the basic financial statements is not affected by the missing information.

Our audit was conducted for the purpose of forming opinions of the financial statements that collectively comprise the Town of Wytheville, Virginia's financial statements as a whole. The introductory section, combining and individual nonmajor fund financial statements and schedules, and statistical section, are presented for purposes of additional analysis and are not a required part of the financial statements. The combining and individual nonmajor fund financial statements and schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole. The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Town of Wytheville, Virginia Reconciliation of Statement of Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds To the Statement of Activities For the Year Ended June 30, 2011

Amounts reported for governmental activities in the statement of activities are different because:	
Net change in fund balances - total governmental funds	\$ 1,014,662
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which the capital outlays exceeded depreciation in the current period.	(699,607)
Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds.	23,533
The issuance of long-term debt (e.g. bonds, leases) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net assets. Also, governmental funds report the effect of issuance costs, premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities. This amount is the net effect of these differences in the treatment of long-term debt and related items.	483,746
Some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds.	23,586
Internal service funds are used by management to charge the costs of certain activities, such as insurance and telecommunications, to individual funds. The net revenue (expense) of certain internal service funds is reported with governmental activities.	12,851
Change in net assets of governmental activities	\$ 858,771

TOWN OF WYTHEVILLE, VIRGINIA

Notes to the Financial Statements June 30, 2011

Note 1-Summary of Significant Accounting Policies:

The financial statements of the Town conform to generally accepted accounting principles (GAAP) applicable to governmental units promulgated by the Governmental Accounting Standards Board (GASB). The more significant accounting policies established in GAAP and used by the Town are discussed below.

A. Reporting Entity:

The Town of Wytheville, Virginia (government) is a municipal corporation governed by an elected five-member Town Council. The accompanying financial statements present the government.

Blended Component Units - None

Discretely Presented Component Units - None

Related Organizations - None

Jointly Governed Organizations:

The Town along with the Counties of Wythe and Carroll participate in the New River Regional Water Authority. The governing body of this organization is appointed by the respective governing bodies of the participating jurisdictions. The Town is also the fiscal manager for the New River Regional Water Authority. For the fiscal year ended June 30, 2011 the Town contributed \$545,870 to the New River Regional Water Authority.

The Town along with the Counties of Wythe and Bland participate in the Crossroads Regional Industrial Facilities Authority. The governing body of this organization is appointed by respective governing bodies of the participating jurisdictions. For the fiscal year ended June 30, 2011 the Town contributed \$75,088 to the Crossroads Regional Industrial Facilities Authority. In addition, the Town received a payment of \$170,000 from Crossroads Regional Industrial Facilities Authority as a return of the Town portion of profits.

The Town along with the Counties of Wythe and Smyth participate in the Smyth-Wythe Airport. The governing body of this organization is appointed by respective governing bodies of the participating jurisdictions. For the fiscal year ended June 30, 2011 the Town contributed \$21,470 to the Smyth-Wythe Airport.

The Town along with the County of Wythe and Town of Rural Retreat participate in the Joint Wythe Industrial Development Authority. The governing body of this organization is appointed by respective governing bodies of the participating jurisdictions. For the fiscal year ended June 30, 2011 the Town contributed \$91,868 to the Joint Wythe Industrial Development Authority.

B. Government-wide and fund financial statements:

The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the nonfiduciary activities of the primary government. For the most part, the effect of interfund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which rely to a significant extent on fees and charges for support.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

C. Measurement focus, basis of accounting, and financial statement presentation:

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*, as is the proprietary fund. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Accordingly, real and personal property taxes are recorded as revenues and receivables when billed, net of allowances for uncollectible amounts. Property taxes not collected within 60 days after year-end are reflected as deferred revenues.

Sales and utility taxes, which are collected by the state or utilities and subsequently remitted to the Town, are recognized as revenues and receivables upon collection by the state or utility, which is generally in the month preceding receipt by the Town.

C. Measurement focus, basis of accounting, and financial statement presentation: (Continued)

Licenses, permits, fines and rents are recorded as revenues when received. Intergovernmental revenues, consisting primarily of federal, state and other grants for the purpose of funding specific expenditures, are recognized when earned or at the time of the specific expenditure. Revenues from general-purpose grants are recognized in the period to which the grant applies. All other revenue items are considered to be measurable and available only when the government receives cash.

The government reports the following major governmental funds:

The *general fund* is the government's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in other funds.

The government reports the following major proprietary funds:

The Town operates a sewage collection and treatment system and a water distribution system. The activities of the system are accounted for in the water and sewer fund.

During fiscal year 2009, the Town adopted GASB Statement 45. As such, the funding of the OPEB liability, internally, required establishing an internal service fund to account for these transactions. The Employee Health Insurance fund was included in the Town's financial for fiscal year ending June 30, 2011.

Additionally, the government reports the following fund types:

Fiduciary funds account for assets held by the government in a trustee capacity or as agent or custodian for individuals, private organizations, other governmental units, or other funds. The Perpetual Care fund is a trust fund. The Agency funds consist of the New River Regional Water Authority fund and Memorial funds.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and enterprise fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also have the *option* of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The government has elected not to follow subsequent private-sector guidance.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are other charges between the government's water and sewer function and various other functions of the government. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as *program revenues* include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes.

C. Measurement focus, basis of accounting, and financial statement presentation: (Continued)

Proprietary funds distinguish *operating* revenues and expenses from *non-operating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the Town's enterprise fund are charges to customers for sales and services. The Town also recognizes as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. Operating expenses for enterprise funds include the cost of sales and services, administrative expense, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

When both restricted and unrestricted resources are available for use, it is the government's policy to use restricted resources first, and then unrestricted resources as they are needed.

D. Assets, liabilities, and net assets or equity:

1. Deposits and Investments

The government's cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition.

Investments for the government are reported at fair value. The State Treasurer's Local Government Investment Pool operates in accordance with appropriate state laws and regulations. The reported value of the pool is the same as the fair value of the pool shares.

The government's cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition.

Investments for the government are reported at fair value. The State Treasurer's Local Government Investment Pool operates in accordance with appropriate state laws and regulations. The reported value of the pool is the same as the fair value of the pool shares.

2. Property Taxes

Property is assessed at its value on January 1. Property taxes attach as an enforceable lien on property as of January 1. Real estate taxes are payable on December 15th. Personal property taxes are due and collectible annually on December 15th. The Town bills and collects its own property taxes.

3. Allowance for Uncollectible Accounts

The Town calculates its allowance for uncollectible accounts using historical collection data and, in certain cases, specific account analysis. The allowance amounted to approximately \$80,084 at June 30, 2011. The allowance consists of delinquent taxes in the amount of \$5,958 and delinquent water and sewer bills of \$74,126.

D. Assets, liabilities, and net assets or equity: (Continued)

4. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Capital Assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items) are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the government as assets with an initial, individual cost of more than \$5,000 (amount not rounded) and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The cost of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed. No interest was capitalized during the current or previous year.

Property, plant, and equipment of the primary government is depreciated using the straight line method over the following estimated useful lives:

Assets	Years
Buildings	40
Building improvements	40
Structures, lines, and accessories	20-40
Machinery and equipment	4-15

6. Compensated Absences

Vested or accumulated vacation leave that is expected to be liquidated with expendable available financial resources is reported as an expenditure and a fund liability of the governmental fund that will pay it. In accordance with the provisions of Governmental Accounting Standards No. 16, Accounting for Compensated Absences, no liability is recorded for non-vesting accumulating rights to receive sick pay benefits. However, a liability is recognized for that portion of accumulating sick leave benefits that it is estimated will be taken as "terminal leave" prior to retirement. The Town accrues salary-related payments associated with the payment of compensated absences. All vacation pay is accrued when incurred in the government-wide and proprietary fund financial statements.

D. Assets, liabilities, and net assets or equity: (Continued)

7. Long-term Obligations

In the government-wide financial statements, and proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net assets. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

8. Fund Equity

Beginning with fiscal year 2011, the Town implemented GASB Statement 54, Fund Balance Reporting and Governmental Fund Type Definitions. This Statement provides more clearly defined fund balance categories to make the nature and extent of the constraints placed on a government's fund balance more transparent. The following classifications describe the relative strength of the spending constraints placed on the purposes for which resources can be used:

- Nonspendable fund balance amounts that are not in spendable form (such as inventory and prepaids) or are required to be maintained intact (corpus of a permanent fund);
- Restricted fund balance amounts constrained to specific purposes by their providers (such as grantors, bondholders, and higher levels of government), through constitutional provisions, or by enabling legislation;
- Committed fund balance amounts constrained to specific purposes by the governing body itself, using its highest level of decision-making authority; to be reported as committed, amounts cannot be used for any other purpose unless the government takes the same highest level action to remove or change the constraint:
- Assigned fund balance amounts a government intends to use for a specific purpose; intent can be expressed by the governing body or by an official or body to which the governing body delegates the authority; for all funds except the general fund, assigned fund balance is the residual fund balance classification;
- Unassigned fund balance amounts that are available for any purpose; positive amounts are only reported in the general fund.

D. Assets, liabilities, and net assets or equity: (Continued)

8. Fund Equity (Continued)

Committed Fund Balance Policy:

The Town Council is the Town's highest level of decision-making authority and the formal action that is required to be taken to establish, modify, or rescind a fund balance commitment is a resolution approved by Town Council. The resolution must either be approved or rescinded, as applicable, prior to the last day of the fiscal year for which the commitment is made. The amount subject to the constraint may be determined in the subsequent period.

Assigned Fund Balance Policy:

The Town Council has authorized the Town Treasurer as the official authorized to assign fund balance to a specific purpose as approved by this fund balance policy.

Minimum Unassigned Fund Balance Policy:

The Town will maintain an assigned fund balance in the general fund equal to an amount established by the Town Council for expenditures/operating revenues. The Town considers a balance of less than the amount established by the Town Council to be a cause for concern, barring unusual or deliberate circumstances.

Resource Flow Policy:

When fund balance resources are available for a specific purpose in more than one classification, it is the Town's policy to use the most restrictive funds first in the following order: restricted, committed, assigned and unassigned, as they are needed.

The details of committed fund balance, as presented in aggregate on Exhibit 3, are as follows:

		Other
	G	overnmental
		Funds
Fund Balances:		
Committed:		
Homestead Endowment	\$	317,401
Wall of Honor		8,431
Total Committed	\$	325,832
	· -	

Net Assets

Net assets are the difference between assets and liabilities. Net assets invested in capital assets represent capital assets, less accumulated depreciation less any outstanding debt related to the acquisition, construction or improvement of those assets.

NOTE 2-RECONCILIATION OF GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS:

A. Explanation of certain differences between the governmental fund balance sheet and the government-wide statement of net assets:

The governmental fund balance sheet includes a reconciliation between *fund balance-total governmental funds* and *net assets-governmental activities* as reported in the government-wide statements of net assets. One element of that reconciliation explains that long-term liabilities, including bonds payable, are not due and payable in the current period and therefore are not reported in the funds. The details of this \$(14,777,512) difference for the primary government are as follows:

	Primary
	Government
Bonds payable Interest payable Landfill closure liability OPEB obligation Compensated absences	\$(13,580,288) (25,180) (78,339) (160,088) (933,617)
Net adjustment to reduce fund balance-total governmental funds to arrive at net assets-governmental activities	\$(14,777,512)

B. Explanation of certain differences between the governmental fund statement of revenues, expenditures, and changes in fund balances and the government-wide statement of activities:

The governmental fund statement of revenues, expenditures, and changes in fund balances includes a reconciliation between *net changes in fund balances-total governmental funds* and *changes in net assets of governmental activities* as reported in the government-wide statement of activities. One element of that reconciliation explains, "Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense." The details of this \$(699,607) difference for the primary government are as follows:

		Primary Government		
Capital outlays Depreciation expense	\$	284,697 (984,304)		
Net adjustment to increase (decrease) net changes in fund balances - total governmental funds to arrive at changes in net assets of governmental activities	\$	(699,607)		

Note 2-Reconciliation of Government-Wide and Fund Financial Statements: (continued)

B. Explanation of certain differences between the governmental fund statement of revenues, expenditures, and changes in fund balances and the government-wide statement of activities: (Continued)

Another element of that reconciliation states "the issuance of long-term debt (e.g., bonds, leases) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net assets. Also, governmental funds report the effect of issuance costs, premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities." The details of this \$483,746 difference in the primary government are as follows:

Principal Repayments:	
General obligation debt	386,709
Landfill closure	87,256
Capital leases	9,781
Net adjustment to increase <i>net changes in fund balances-total</i>	
governmental funds to arrive at changes in net assets of governmental	
activities	\$ 483,746

Another element of that reconciliation states, "Some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds." The details of this \$23,586 difference for the primary government are as follows:

	Pr	imary
	Gove	ernment
(Increase) decrease in compensated absences	\$	23,012
(Increase) decrease in accrued interest		934
Amortization of bond issuance costs		(360)
Net adjustment to increase (decrease) <i>net changes in</i> fund balances-total governmental funds to arrive at changes in net assets of governmental activities	\$	23,586

The remainder of this page left blank intentionally.

NOTE 3-STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY:

A. Budgetary information

The following procedures are used by the Town in establishing the budgetary data reflected in the financial statements:

- Prior to May 1, the Town Manager submits to the Town Council a proposed operating and capital budget for the
 fiscal year commencing the following July 1. The operating and capital budget includes proposed expenditures
 and the means of financing them. The General fund and Water/Sewer Fund have legally adopted budgets.
- 2. Public hearings are conducted to obtain citizen comments.
- 3. Prior to June 30, the budget is legally enacted through passage of an Appropriations Resolution.
- 4. The Appropriations Resolution places legal restrictions on expenditures at the department level or category level. Only the Town Council can revise the appropriation for each department or category. The Town Manager is authorized to transfer budgeted amounts within general government departments.
- 5. Formal budgetary integration is employed as a management control device during the year for the General Fund.
- 6. All budgets are adopted on a basis consistent with generally accepted accounting principles (GAAP).
- 7. Appropriations lapse on June 30, for all Town units.
- Encumbrance accounting, under which purchase orders, contracts, and other commitments for the expenditure of monies are recorded in order to reserve that portion of the applicable appropriations, is not part of the Town's accounting system.

A. Excess of expenditures over appropriations

The Wall of Honor fund expenditures exceeded appropriations for the year ended June 30, 2011.

B. Deficit fund equity

At June 30, 2011, there were no funds with deficit fund equity.

NOTE 4-DEPOSITS AND INVESTMENTS:

<u>Deposits</u>: Deposits with banks are covered by the Federal Deposit Insurance Corporation (FDIC) and Collateralized in accordance with the Virginia Security for Public Deposits Act (the "Act") Section 2.2-4400 et. seq. of the Code of Virginia. Under the Act, banks and savings institutions holding public deposits in excess of the amount insured by the FDIC must pledge collateral to the Commonwealth of Virginia Treasury Board. Financial Institutions may choose between two collateralization methodologies and depending upon that choice, will pledge collateral that ranges in amounts from 50% to 130% of excess deposits. Accordingly, all deposits are considered fully collateralized.

NOTE 4-DEPOSITS AND INVESTMENTS: (CONTINUED)

<u>Investments</u>: Statutes authorize local governments and other public bodies to invest in obligations of the United States or agencies thereof, obligations of the International Bank for Reconstruction and Development (World Bank), the Asian Development Bank, the African Development Bank, "prime quality" commercial paper and certain corporate notes, banker's acceptances, repurchase agreements, and the State Treasurer's Local Government Investment Pool (LGIP).

Credit Risk of Debt Securities

The Town has not adopted an investment policy for credit risk.

The Town's rated debt investments as of June 30, 2011 were rated by Standard and Poor's and the ratings are presented below using the Standard and Poor's rating scale.

Town's Ra	ted Debt Inv	estments' Values		
Rated Debt Investments		Fair Quality R	atings	
		AAA		AAAm
LGIP	\$	-	\$	672,076
U.S. Treasuries		306.999		

Interest Rate Risk

The Town has not adopted an investment policy for interest rate risk. Investments subject to Interest rate risk are presented below along with their corresponding maturities.

				Investm	ent l	Maturities (in yea	rs)		
Investment Type	F	air Value	L	ess 1 yr		1-5 yrs	6-10	yrs	10 yrs	+
United States Treasuries	\$	306,999	\$	91,392	-\$	166,335	\$	49,272	\$	

The fair value of the positions in the external investment pool (Local Government Investment Pool (LGIP)) is the same as the value of the pool shares. As this pool is not SEC registered, regulatory oversight of the pool rests with the Virginia State Treasury. LGIP maintains a policy to operate in a manner consistent with SEC Rule 2a-7.

The remainder of this page left blank intentionally.

NOTE 5-DUE FROM OTHER GOVERNMENTAL UNITS:

The following amount represents receivables from other governments at year-end:

	Primary	
		Government
Commonwealth of Virginia	-	
Other Local Taxes	\$	80,758
Non-categorical Aid		69,039
Other Categorical Aid		27,476
Total Due from Other Governmental Units	\$	177,273

NOTE 6-INTERFUND ACTIVITY:

Interfund transfers for the year ended June 30, 2011, consisted of the following:

Fund	Tra	nsfers In	Trai	nsfers Out
General Fund	\$	1,326	\$	(67,300)
Homestead Endowment Fund		-		(1,326)
OPEB Fund		67,300		-
Total	\$	68,626	\$	(68,626)

Transfers are used to (1) move revenues from the fund that statute or budget requires to collect them to the fund that statute or budget requires to expend them and (2) use unrestricted revenues collected in the General Fund to finance various programs accounted for in other funds in accordance with budgeting authorization.

Fund	Due To	Due From
General Fund	\$ 1,932,000	\$ -
Water and Sewer Fund	-	(1,932,000)
Total	\$ 1,932,000	\$ (1,932,000)

During fiscal year 2010 and 2011, the Town's General Fund loaned the Water and Sewer Fund \$1,000,000 and \$932,000, respectively. Repayment terms have not been determined.

The remainder of this page left blank intentionally.

Note 7-Long-Term Debt:

Primary Government - Governmental Activity Indebtedness:

The following is a summary of long-term debt transactions of the Town for the year ended June 30, 2011:

		Balance						Balance
	J	luly 1, 2010	lss	uances	Re	tirements	Jυ	ine 30, 2011

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

JUNE 30, 2011

NOTE 7-LONG-TERM DEBT: (CONTINUED)

Primary Government-Enterprise Activity Indebtedness: (Continued)

Details of long-term indebtedness: (Continued)

	Interest Rates	Date Issued	Maturity Date	Amount of Original Issue	Amount Due		oue Within One Year
Other Obligations:							
Amount due to Wythe Co. (1)	١				\$	2,832,161	\$ 452,506
Compensated Absences						146,306	109,730
Total Other Obligations					\$	2,978,467	\$ 562,236
Total Long-term Obligations					\$	13,642,262	\$ 1,068,643

(1) Amount is related to construction of water/sewer lines for New River Regional Water Authority. The Town has agreed to pay 50% of two Rural Development revenue bonds and 21.28% of a VACO/VML revenue bond, both issued by the County of Wythe, Virginia. In addition, the County paid \$877,044 in cash for the exit 77/interconnect project. The repayment terms for the cash amount has not been determined.

NOTE 8-LANDFILL POSTCLOSURE MONITORING LIABILITY:

State and Federal laws and regulations require the Town to place a final cover on its landfill site when it stops accepting waste and to perform certain maintenance and monitoring functions at the site for 10 years after closure. The Town closed the landfill in December, 1997. Total postclosure monitoring costs are estimated to be \$78,339. This amount is based on what it would cost to perform all postclosure in 2011. Actual costs for postclosure monitoring may change due to inflation, changes in technology, or changes in regulations. The Town is using the State Financial Assurance Mechanism to meet their Financial Assurance requirements for their landfill.

NOTE 9-EMPLOYEE RETIREMENT SYSTEM AND PENSION PLANS:

A. Plan Description

Name of Plan:

Virginia Retirement System (VRS)

Identification of Plan:

Agent and Cost-Sharing Multiple-Employer Defined Benefit Pension Plan

Administering Entity: Virginia Retirement System (System)

All full-time, salaried permanent (professional) employees of public school divisions and employees of participating employers are automatically covered by VRS upon employment. Benefits vest after five years of service credit. Members earn one month of service credit for each month they are employed and their employer is paying into the VRS. Members are eligible to purchase prior public service, active duty military service, certain periods of leave and previously refunded VRS service as credit in their plan.

NOTE 9-EMPLOYEE RETIREMENT SYSTEM AND PENSION PLANS: (CONTINUED)

A. Plan Description (Continued)

VRS administers two defined benefit plans for local government employees – Plan 1 and Plan 2:

- Members hired before July 1, 2010 and who have service credits before July 1, 2010 are covered under Plan
 1. Non-hazardous duty members are eligible for an unreduced retirement benefit beginning at age 65 with at
 least five years of service credit or age 50 with at least 30 years of service credit. They may retire with a
 reduced benefit early at age 55 with at least 10 years of service credit or age 50 with at least five years of
 service credit.
- Members hired or rehired on or after July 1, 2010 and who have no service credits before July 1, 2010 are
 covered under Plan 2. Non-hazardous duty members are eligible for an unreduced benefit beginning at their
 normal Social Security retirement age with at least five years of service credit or when the sum of their age and
 service equals 90. They may retire with a reduced benefit as early as age 60 with at least five years of service
 credit.
- Eligible hazardous duty members in Plan 1 and Plan 2 are eligible for an unreduced benefit beginning at age 60 with at least 5 years of service credit or age 50 with at least 25 years of service credit. These members include sheriffs, deputy sheriffs and hazardous duty employees of political subdivisions that have elected to provide enhanced coverage for hazardous duty service. They may retire with a reduced benefit as early as age 50 with at least five years of service credit. All other provisions of the member's plan apply.

The VRS Basic Benefit is a lifetime monthly benefit based on a retirement multiplier as a percentage of the member's average final compensation multiplied by the member's total service credit. Under Plan 1, average final compensation is the average of the member's 36 consecutive months of highest compensation. Under Plan 2, average final compensation is the average of the member's 60 consecutive months of highest compensation. The retirement multiplier for non-hazardous duty members is 1.70 %. The retirement multiplier for sheriffs and regional jail superintendents is 1.85%. The retirement multiplier for eligible political subdivision hazardous duty employees other than sheriffs and jail superintendents is 1.70% or 1.85% as elected by the employer. At retirement, members can elect the Basic Benefit, the Survivor Option, a Partial Lump-Sum Option Payment (PLOP) or the Advance Pension Option. A retirement reduction factor is applied to the Basic Benefit amount for members electing the Survivor Option, PLOP or Advance Pension Option or those retiring with a reduced benefit.

Retirees are eligible for an annual cost-of-living adjustment (COLA) effective July 1 of the second calendar year of retirement. Under Plan 1, the COLA cannot exceed 5.00%; under Plan 2, the COLA cannot exceed 6.00%. During years of no inflation or deflation, the COLA is 0.00%. The VRS also provides death and disability benefits. Title 51.1 of the Code of Virginia (1950), as amended, assigns the authority to establish and amend benefit provisions to the General Assembly of Virginia.

The system issues a publicly available comprehensive annual financial report that includes financial statements and required supplementary information for VRS. A copy of the report may be obtained from the VRS Web site at http://www.varetire.org/Pdf/Publications/2010-annual-report.pdf or obtained by writing to the System's Chief Financial Officer at P.O. Box 2500, Richmond, VA, 23218-2500.

NOTE 9-EMPLOYEE RETIREMENT SYSTEM AND PENSION PLANS: (CONTINUED)

B. Funding Policy

Plan members are required by Title 51.1 of the <u>Code of Virginia</u> (1950), as amended, to contribute 5.00% of their compensation toward their retirement. All or part of the 5.00% member contribution may be assumed by the employer. In addition, the Town of Wytheville, Virginia is required to contribute the remaining amounts necessary to fund its participation in the VRS using the actuarial basis specified by the <u>Code of Virginia</u> and approved by the VRS Board of Trustees. The Town of Wytheville, Virginia's contribution rate for the fiscal year ended 2011 was 6.01% of annual covered payroll.

C. Annual Pension Cost

For fiscal year 2011, the Town of Wytheville, Virginia's annual pension cost of \$332,960 was equal to the Town of Wytheville, Virginia's required and actual contributions.

Three-Year Trend Information

Fiscal	Year	Annı	ual Pension	Percentage of	١	Vet pension
End	ing	Co	st (APC) 1	APC Contributed	t	Obligation
6/30	/2011	\$	332,960	100%	6 ;	\$ -
6/30	/2010		259,114	100%	6	-
6/30	/2009		256,933	100%	6	-

¹ Employer portion only

The FY 2011 required contribution was determined as part of the June 30, 2009 actuarial valuation using the entry age actuarial cost method. The actuarial assumptions at June 30, 2009 included (a) an investment rate of return (net of administrative expenses) of 7.50%, (b) projected salary increases ranging from 3.75% to 5.60% per year for general government employees and 3.50% to 4.75% for employees eligible for enhanced benefits available to law enforcement officers, firefighters, and sheriffs, and (c) a cost-of-living adjustment of 2.50% per year. Both the investment rate of return and the projected salary increases include an inflation component of 2.50%. The actuarial value of the Town of Wytheville, Virginia's assets is equal to the modified market value of assets. This method uses techniques that smooth the effects of short-term volatility in the market value of assets over a five-year period. The Town of Wytheville, Virginia's unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The remaining amortization period at June 30, 2009 for the Unfunded Actuarial Accrued Liability (UAAL) was 20 years.

The remainder of this page left blank intentionally.

NOTE 9-EMPLOYEE RETIREMENT SYSTEM AND PENSION PLANS: (CONTINUED)

D. Funded Status and Funding Progress

As of June 30, 2010, the most recent actuarial valuation date, the plan was 83.16% funded. The actuarial accrued liability for benefits was \$19,384,809, and the actuarial value of assets was \$16,121,093, resulting in an unfunded actuarial accrued liability (UAAL) of \$3,263,716. The covered payroll (annual payroll of active employees covered by the plan) was \$5,421,860, and ratio of the UAAL to the covered payroll was 60.20%.

The schedule of funding progress, presented as Required Supplementary Information following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability (AAL) for benefits.

Notes to Financial Statements (Continued) June 30, 2011

NOTE 11-RISK MANAGEMENT:

The Town is exposed to various risks of loss related to torts; theft of damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The Town participates with other localities in a public entity risk pool for their coverage of worker's compensation with the Virginia Municipal League. The Town pays an annual premium to the pools for its general insurance coverage. The agreement for the formation of the pool provides that the pool will be self sustaining through member premiums. The Town continues to carry commercial insurance for all other risks of loss. Settled claims resulting from these risks have not exceeded commercial coverage in any of the past three fiscal years.

NOTE 12-SURETY BONDS:

Clorendon National Insurance Company

All Town Employees - blanket bond \$1,000,000

Note 13-Other Post-Employment Benefits:

From an accrual accounting perspective, the cost of post-employment health care benefits (OPEB), like the cost of pension benefits, generally should be associated with the periods in which the cost occurs, rather than in future years when it will be paid. In adopting the requirements of GASB Statement No. 45 during the year ended June 30, 2009, the Town of Wytheville recognizes the cost of post-employment health care in the year when the employee services are rendered, reports the accumulating liability, and provides information useful in assessing potential demands on the Town's future cash flows. Recognition of the liability accumulated from prior years will be phased in over 30 years, commencing with the 2009 liability.

A. Plan Description

The Town of Wytheville administers a single-employer healthcare plan ("the Plan"). The Plan provides for participation by eligible retirees and their dependents in the health insurance programs available to Town employees. The Plan will provide retiring employees and spouses the option to continue health insurance offered by the Town until retirees' death.

To be eligible for this benefit a retiree must meet at the following criteria: attained age 50 and 25 years of service. The benefits, employee contributions and the employer contributions are governed by the Board of Directors and can be amended through Board action. The Plan does not issue a publicly available financial report.

B. Funding Policy

The Town currently pays for the post-retirement health care benefits on a pay-as-you-go basis. The Town currently has 165 employees that are eligible for the program. In addition, for retiree's pre 65 years of age, retiree pays active employee rate. For retirees 65 years of age and above, retiree pays full cost of Medicare Supplement. Retiree at any age must pay 100% of spousal employee premium. All coverage ceases at retiree's death. For fiscal year 2011, the Town contributed \$54,088 in total for current premiums and prefunding amounts.

Note 13-Other Post-Employment Benefits: (continued)

B. Funding Policy: (continued)

Health benefits include Medical, Dental, Prescription drug, and Vision coverage for retirees and eligible spouses/dependents. Retirees are eligible to choose one of the following medical options through the Town. The rates are as follows:

	-	dvantage oanded	Key Advantage 250						
Pre-Medicare Eligible									
Retiree	\$	560	\$	521					
Retiree+Spouse		1,036		964					
Family		1,512		1,407					
	Advantage 65								
Post-Medicare Eligible									
Retiree	\$	190	\$	190					

C. Annual OPEB Cost and Net OPEB Obligation:

The Town's annual other postemployment benefit (OPEB) cost (expense) is calculated based on the *annual required contribution* of the employer (ARC), an amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed thirty years. The following table shows components of the Town's annual OPEB cost for the year, the amount actually contributed to the plan, and changes in the Town's net OPEB obligation:

Annual required contribution	\$	54,400
Interest on net OPEB obligation		4,588
Adjustment to annual required contribution		(4,900)
Annual OPEB cost (expense)		54,088
Contributions made		(8,700)
Increase in net OPEB obligation	_	45,388
Net OPEB obligation - beginning of year		114,700
Net OPEB obligation - end of year	\$ _	160,088

The remainder of this page left blank intentionally.

Note 13-Other Post-Employment Benefits: (continued)

C. Annual OPEB Cost and Net OPEB Obligation: (continued)

The Town's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for 2011 were as follows:

Fiscal	Annual	Percentage of Annual OPEB Cost Contributed	Net OPEB
Year Ended*	OPEB Cost		Obligation
6/30/2009 \$	46,900	0% \$	46,900
6/30/2010	64,664	0%	104,064
6/30/2011	54,088	0%	160,088

D. Funded Status and Funding Progress

The funded status of the Plan for the Town as of June 30, 2011, is as follows:

Actuarial accrued liability (AAL)	\$ 645,600
Actuarial value of plan assets	-
Unfunded actuarial accrued liability (UAAL)	\$ 645,600
Funded ratio (actuarial value of plan assets / AAL)	0.00%
Covered payroll (active plan members)	\$ 5,466,300
UAAL as a percentage of covered payroll	11.81%

Actuarial valuation of an ongoing plan involves estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revisions as actual results are compared with past expectations and new estimates are made about the future.

The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, will present multiyear trend information, as it becomes available, about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

E. Actuarial Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the substantive plan and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point.

Note 13-Other Post-Employment Benefits: (continued)

E. Actuarial Methods and Assumptions: (continued)

The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

In the July 1, 2010, actuarial valuation, the Entry Age Normal cost method was used. Under this method, the actuarial present value of projected benefits of every active participant as if the Plan's provisions on the valuation date had always been in effect, is determined as a level percentage of expected annual earnings for each future year of expected service: inflations at 2.50 percent, plus productivity component of 1.25 percent, and investment's rate of return at 4.00 percent, and a health care trend rate of 9.00 percent graded to 5.00 percent over 10 years. The UAAL is being amortized as a level percentage over the remaining amortization period, which at June 30, 2011 was 27 years.

Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance With *Government Auditing Standards*

To the Members of the Town Council Town of Wytheville, Virginia Wytheville, Virginia

We have audited the financial statements of the governmental activities, the business-type activities, the major fund, and the aggregate remaining fund information of the Town of Wytheville, Virginia as of and for the year ended June 30, 2011, which collectively comprise the Town's basic financial statements and have issued our report thereon dated November 10, 2011. We conducted our audit in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the *Specifications of Audits for Counties, Cities and Towns*, issued by the Auditor of Public Accounts of the Commonwealth of Virginia.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the Town of Wytheville, Virginia's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Town of Wytheville, Virginia's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the Town of Wytheville, Virginia's internal control over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and was not necessarily designed to identify all deficiencies in internal control over financial reporting that might be significant deficiencies or material weaknesses and therefore, there can be no assurance that all deficiencies, significant deficiencies, or material weaknesses have been identified. However, as described in the accompanying schedule of findings and responses, we identified certain deficiencies in internal control over financial reporting that we consider to be material weaknesses.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. We consider the deficiencies described in the accompanying schedule of findings and responses to be material weaknesses (Reference 2011-1).

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Town of Wytheville, Virginia's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

The Town of Wytheville, Virginia's responses to the findings identified in our audit are described in the accompanying schedule of findings and responses. We did not audit the Town of Wytheville, Virginia's responses and, accordingly, we express no opinion on them.

We noted certain matters that we reported to management of the Town of Wytheville, Virginia in a separate letter dated November 10, 2011.

This report is intended solely for the information and use of management, Town Council, others within the Town of Wytheville, Virginia, and is not intended to be and should not be used by anyone other than these specified parties.

Robinson, Farner, Ly Associates

November 10, 2011

TOWN OF WYTHEVILLE, VIRGINIA

SCHEDULE OF FINDINGS AND RESPONSES FOR THE YEAR ENDED JUNE 30, 2011

Section I - Summary of Auditor's Results

Financial Statements

Type of auditor's report issued: <u>unqualified</u>

Internal control over financial reporting:

Material weakness(es) identified?

Significant deficiency(ies) identified

No
Noncompliance material to financial statements noted?

Yes

No

Section II - Financial Statement Findings

2011-1	
Criteria:	A key concept of internal controls is the segregation of duties. No one employee should have access to both accounting records and related assets.
Condition:	The Town lacks proper segregation of duties over the billings, collections and reconciliation functions in the Treasurer's office.
Criteria:	A key component in internal controls is the segregation of duties. No one employee should have access to both the accounting records and related assets.
Cause:	Budget constraints on most local governments limit heir ability to comply with proper segregation of duties.
Effect:	There is more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the Town's internal controls over financial reporting.
Recommendation:	The Town should try to reduce some of the segregation issues by implementing controls that will mitigate the risk of one person having too much control.
Management's Response:	Management acknowledges that internal control over the billings, collections and reconciliation functions lack proper segregation of duties; however, to alleviate same would require additional staff. Due to cost constraints, the Town has decided not address the aforementioned internal control deficiencies.
