INDEPENDENT AUDITOR'S REPORT ON COMMENTS AND OTHER SUGGESTIONS

To the Board of Directors of the Bedford Regional Water Authority Bedford, Virginia

In planning and performing our audit of the financial statements of the Bedford Regional Water Authority (the "Authority") as of and for the year ended June 30, 2019, in accordance with auditing standards generally accepted in the United States of America, we considered the Authority's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements and to comply with *Government Auditing Standards*, but not for the purpose of expressing an opinion on the effectiveness of the Authority's internal control. Accordingly, we do not express an opinion on the effectiveness of the Authority's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore material weaknesses or significant deficiencies may exist that were not identified. In addition, because of the inherent limitations in internal control, including the possibility of management override of controls, misstatements due to error or fraud may occur and not be detected by such controls. However, as presented in this letter, we identified a certain deficiency in internal control that we consider to be a material weakness.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. A material weakness is a deficiency, or a combination of deficiencies in internal control, such that there is a reasonable possibility that a material misstatement of the Authority's financial statements will not be prevented, or detected and corrected, on a timely basis. The material weakness identified is labeled as such in the attached report.

During our audits, we became aware of certain matters that provide opportunities for improving the Authority's accounting system and/or operating efficiency. Our comments and suggestions regarding these matters are included in the attached report. Since our audits are not designed to include a detailed review of all systems and procedures, these comments should not be considered as being all inclusive of areas where improvements might be achieved. It is our hope that these suggestions will be taken in the constructive light in which they are offered.

We have already discussed these comments and suggestions with management, and we will be pleased to discuss them in further detail at your convenience, to perform any additional study of these matters, or to assist you in implementing the recommendations. A review of the status of our prior year comments and suggestions is included on pages 4-6.

Management's written responses to the items identified in our audits have not been subjected to the audit procedures applied in the audits of the financial statements and, accordingly, we express no opinion on them.

This communication is intended solely for the information and use of the Board, management, and the appropriate state and federal regulatory agencies and is not intended to be, and should not be, used by anyone other than these specified parties.

COMMENTS ON INTERNAL CONTROL AND OTHER SUGGESTIONS FOR YOUR CONSIDERATION

TIMELINESS OF RECONCILIATION REVIEW

In our review of two out of twelve bank reconciliations, we noted that there was no review of the reconciliation. Timely reviews are one of the most important internal controls to promptly detect and recognize potential errors or other problems. This could mitigate the risk of errors or problems progressing and provide more accurate reports for management decisions. Also, it is generally easier and less time-consuming to review accounts while transactions are fresh in mind. As limited staffing can contribute to delays of performing reconciliations, we recommend that a schedule of completing reconciliation reviews on a set time frame is implemented and adhered to.

SUMMARY OF THE STATUS OF PRIOR YEAR COMMENTS AND SUGGESTIONS

RETROSPECTIVE REVIEW OF ACCOUNTS RECEIVABLE ADJUSTMENTS

We noted that there is no retrospective review of accounts receivable adjustments posted by customer service representatives. While total adjustments noted for the year are not significant and such adjustments are not frequent, we recommend that a process be put in place so that all adjustments posted are reviewed at the end of the month by someone who does not have access to post adjustments. This person should date and initial their review as well.

Current Year Status: Condition still present.

Management's Response: Adjustments are reviewed by the Customer Service Manager and the Executive Director before a Customer Service Representative posts the adjustment. Adjustments are not reviewed on a monthly basis.

SEGREGATION OF DUTIES (Material Weakness)

A properly designed and implemented system of internal control assists in preventing and detecting errors in financial reporting and fraud. A fundamental concept of internal control is the separation of duties. The basic premise of this concept is that no one employee should have access to both physical assets and the related accounting records, or to all phases of a transaction, including authorization. Such access may allow errors or irregularities to occur and either not be detected or be concealed. Due to the limited size of the Authority's accounting staff, a proper separation of duties has not been established and maintained. While we realize that any internal control system must be cost effective, steps should be taken to eliminate performance of conflicting duties where possible, such as the following:

- Payroll processing is currently performed by the same person that has the ability to add or modify personnel information in the payroll system. We also noted the reviewer of the payroll registers was the backup preparer for payroll. We recommend someone other than the person responsible for preparing payroll update personnel information in the payroll system. We also recommend that someone other than the person who reviews the final payroll register perform backup duties of payroll.
- Bank reconciliations are performed by the same person in charge of the disbursement general ledger functions. We recommend someone who does not have access to the receipts and disbursements general ledger functions perform the bank reconciliation.
- Due to staff size, only three individuals are entering information into the Great Plains accounting system. This reduces the effectiveness of system controls with Great Plains as rights within the software are not able to maintain segregation of duties.
- Due to the limited size of the Authority's IT staff, a proper separation of duties has not been established and maintained. Currently only two staff are performing the Authority's IT functions.
- The Executive Director has the ability to approve purchase orders/vendor invoices, edit the master file, prepare checks for expenditures, and has check signing authority.

SUMMARY OF THE STATUS OF PRIOR YEAR COMMENTS AND SUGGESTIONS (Continued)

SEGREGATION OF DUTIES (Material Weakness) (Continued)

• Journal entries are not reviewed. We recommend that all journal entries be reviewed by someone other than the preparer prior to entry in the general ledger. While review of the periodic financials may detect erroneous entries, reviewing entries prior to entry would reduce the reliance on detection controls and reduce the inherent risk that offsetting erroneous or fraudulent entries are not apparent when aggregated in the monthly financials.

Current Year Status: Condition still present.

Management's Response: The Customer Service Supervisor reconciles the daily bank deposits to the subsidiary ledger and then it is reviewed by the Customer Service Manager. This helps to identify any problems during the month instead of waiting until the end of the month when the bank statement is received. The Executive Director reviews the entries from the subsidiary ledger and creates the journal entry for Great Plains. This entry is entered by the Director of Finance, who then prepares the bank reconciliation.

The Authority hired a full-time Accounting Technician to handle invoice processing and other financial tasks. This position processes all invoices and prepares the checks for mailing. The Director of Finance reviews all invoices and prints the checks for the assistant to mail. The Executive Director is an authorized check signer and reviews the invoices and supporting documentation prior to returning the checks to the Accounting Technician to mail. If there are any questions regarding payments being made they are addressed at this time, but the other duties are performed by the Finance department.

Management understands this concern, however, the current staff size limits the separation of duties in regards to these functions. Management has separated these functions as much as possible given the current staff size limits.

INVENTORY

We noted the Authority was not able to reconcile year-end inventory until several months after year-end. This is due in part to contracting out the change meter program versus handling the process internally, inaccurate physical inventory counts due to inventory in vehicles and other locations, and not keeping accurate track of inventory throughout the year. We recommend the Authority come up with processes and procedures to properly track and maintain accurate inventory balances throughout the year.

Current Year Status: Condition cleared during the current year.

Management's Response: The Authority implemented an inventory management system at the beginning of the year. All inventory is tracked through this system, with purchases added upon receipt and items removed through work orders.

SUMMARY OF THE STATUS OF PRIOR YEAR COMMENTS AND SUGGESTIONS (Continued)

PURCHASING POLICIES AND PROCEDURES

We recommend the Authority consider using purchase order software, preferably one integrated with its current accounts payable software. Purchase orders communicate the terms and conditions of purchases which may reduce the likelihood of vendor disputes. Additionally, purchase orders provide a means for controlling and authorizing purchases within the organization and help provide a formal means for complying with purchasing policies. We also suggest the Authority update its purchasing policies and procedures to include the use of purchase orders.

Current Year Status: Condition still present.

Management's Response: Due to staffing constraints, purchase orders have not been implemented.

CAPITAL ASSETS

Capital assets are not tagged or labeled with unique identification. Assets are typically tagged or labeled in order to accurately account for those capital assets and also help to ensure the completeness of the capital asset registers. We recommend policies and procedures be written about the tagging or labeling of capital assets with unique identification tags and its proper recording in the capital asset ledgers.

Current Year Status: Condition still present.

Management's Response: Due to staffing constraints, asset tags have not been affixed to individual assets.

CAPITAL ASSET DISPOSITION

It was noted that many of the departments located on the fixed asset listing have a substantial amount of immaterial fully depreciated capital assets. We recommend each department review the fixed asset listing at the end of every quarter and remove any fixed assets that have been disposed of. This review, if combined with a periodic physical observation, will help refine the asset listing to ensure it is accurate and, on an ongoing basis, detect assets that have been disposed or possibly misappropriated.

Current Year Status: Condition still present.

Management's Response: The Authority has started this internal review. The Authority uses Gov Deals to sell old assets that are no longer used.

INFORMATION TECHNOLOGY (IT) RISK AND CONTINUITY MANAGEMENT

The Authority continues to address deficiencies in its Information Technology Risk and Continuity Management Program in accordance with the Security Standard. The Authority is in the process of updating its IT Risk and Continuity Management documentation, but it remains inconsistent. The details of these control weaknesses have been communicated to management in a separate document marked FOIAE under Section 2/2-3705.2 of the *Code of Virginia* due to its sensitivity of security controls.

Current Year Status: Condition still present.

NEW GASB PRONOUNCEMENTS

In this section, we would like to make you aware of certain confirmed and potential changes that are on the horizon that may affect your financial reporting and audit.

The GASB issued **Statement No. 84**, *Fiduciary Activities* in January 2017. The objective of this Statement is to improve guidance regarding the identification of fiduciary activities for accounting and financial reporting purposes and how those activities should be reported.

This Statement establishes criteria for identifying fiduciary activities of all state and local governments. The focus of the criteria generally is on (1) whether a government is controlling the assets of the fiduciary activity and (2) the beneficiaries with whom a fiduciary relationship exists. Separate criteria are included to identify fiduciary component units and postemployment benefit arrangements that are fiduciary activities.

An activity meeting the criteria should be reported in a fiduciary fund in the basic financial statements. Governments with activities meeting the criteria should present a statement of fiduciary net position and a statement of changes in fiduciary net position. An exception to that requirement is provided for a business-type activity that normally expects to hold custodial assets for three months or less.

This Statement describes four fiduciary funds that should be reported, if applicable: (1) pension (and other employee benefit) trust funds, (2) investment trust funds, (3) private-purpose trust funds, and (4) custodial funds. Custodial funds generally should report fiduciary activities that are not held in a trust or equivalent arrangement that meets specific criteria.

A fiduciary component unit, when reported in the fiduciary fund financial statements of a primary government, should combine its information with its component units that are fiduciary component units and aggregate that combined information with the primary government's fiduciary funds.

This Statement also provides for recognition of a liability to the beneficiaries in a fiduciary fund when an event has occurred that compels the government to disburse fiduciary resources. Events that compel a government to disburse fiduciary resources occur when a demand for the resources has been made or when no further action, approval, or condition is required to be taken or met by the beneficiary to release the assets.

The requirements of this Statement are effective for periods beginning after December 15, 2018.

The GASB issued **Statement No. 87**, *Leases* in June 2017. The objective of this Statement is to better meet the information needs of financial statement users by improving accounting and financial reporting for leases by governments. This Statement increases the usefulness of governments' financial statements by requiring recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. Under this Statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources, thereby enhancing the relevance and consistency of information about governments' leasing activities.

NEW GASB PRONOUNCEMENTS (Continued)

Statement No. 87, Leases (Continued)

Definition of a Lease

A lease is defined as a contract that conveys control of the right to use another entity's nonfinancial asset (the underlying asset) as specified in the contract for a period of time in an exchange or exchange-like transaction. Examples of nonfinancial assets include buildings, land, vehicles, and equipment. Any contract that meets this definition should be accounted for under the leases guidance, unless specifically excluded in this Statement.

Lease Term

The lease term is defined as the period during which a lessee has a noncancelable right to use an underlying asset, plus the following periods, if applicable:

- a. Periods covered by a lessee's option to extend the lease if it is reasonably certain, based on all relevant factors, that the lessee will exercise that option.
- b. Periods covered by a lessee's option to terminate the lease if it is reasonably certain, based on all relevant factors, that the lessee will not exercise that option.
- c. Periods covered by a lessor's option to extend the lease if it is reasonably certain, based on all relevant factors, that the lessor will exercise that option.
- d. Periods covered by a lessor's option to terminate the lease if it is reasonably certain, based on all relevant factors, that the lessor will not exercise that option.

A fiscal funding or cancellation clause should affect the lease term only when it is reasonably certain that the clause will be exercised.

Lessees and lessors should reassess the lease term only if one or more of the following occur:

- a. The lessee or lessor elects to exercise an option even though it was previously determined that it was reasonably certain that the lessee or lessor would not exercise that option.
- b. The lessee or lessor elects not to exercise an option even though it was previously determined that it was reasonably certain that the lessee or lessor would exercise that option.
- c. An event specified in the lease contract that requires an extension or termination of the lease takes place.

Short-Term Leases

A short-term lease is defined as a lease that, at the commencement of the lease term, has a maximum possible term under the lease contract of 12 months (or less), including any options to extend, regardless of their probability of being exercised. Lessees and lessors should recognize short-term lease payments as outflows of resources or inflows of resources, respectively, based on the payment provisions of the lease contract.

NEW GASB PRONOUNCEMENTS (Continued)

Statement No. 87, Leases (Continued)

Lessee Accounting

A lessee should recognize a lease liability and a lease asset at the commencement of the lease term, unless the lease is a short-term lease or it transfers ownership of the underlying asset. The lease liability should be measured at the present value of payments expected to be made during the lease term (less any lease incentives). The lease asset should be measured at the amount of the initial measurement of the lease liability, plus any payments made to the lessor at or before the commencement of the lease term and certain direct costs.

A lessee should reduce the lease liability as payments are made and recognize an outflow of resources (for example, expense) for interest on the liability. The lessee should amortize the lease asset in a systematic and rational manner over the shorter of the lease term or the useful life of the underlying asset. The notes to financial statements should include a description of leasing arrangements, the amount of lease assets recognized, and a schedule of future lease payments to be made.

Lessor Accounting

A lessor should recognize a lease receivable and a deferred inflow of resources at the commencement of the lease term, with certain exceptions for leases of assets held as investments, certain regulated leases, short-term leases, and leases that transfer ownership of the underlying asset. A lessor should not derecognize the asset underlying the lease. The lease receivable should be measured at the present value of lease payments expected to be received during the lease term. The deferred inflow of resources should be measured at the value of the lease receivable plus any payments received at or before the commencement of the lease term that relate to future periods.

A lessor should recognize interest revenue on the lease receivable and an inflow of resources (for example, revenue) from the deferred inflows of resources in a systematic and rational manner over the term of the lease. The notes to financial statements should include a description of leasing arrangements and the total amount of inflows of resources recognized from leases.

Contracts with Multiple Components and Contract Combinations

Generally, a government should account for the lease and nonlease components of a lease as separate contracts. If a lease involves multiple underlying assets, lessees and lessors in certain cases should account for each underlying asset as a separate lease contract. To allocate the contract price to different components, lessees and lessors should use contract prices for individual components as long as they do not appear to be unreasonable based on professional judgment, or use professional judgment to determine their best estimate if there are no stated prices or if stated prices appear to be unreasonable. If determining a best estimate is not practicable, multiple components in a lease contract should be accounted for as a single lease unit. Contracts that are entered into at or near the same time with the same counterparty and that meet certain criteria should be considered part of the same lease contract and should be evaluated in accordance with the guidance for contracts with multiple components.

NEW GASB PRONOUNCEMENTS (Continued)

Statement No. 87, Leases (Continued)

Lease Modifications and Terminations

An amendment to a lease contract should be considered a lease modification, unless the lessee's right to use the underlying asset decreases, in which case it would be a partial or full lease termination. A lease termination should be accounted for by reducing the carrying values of the lease liability and lease asset by a lessee, or the lease receivable and deferred inflows of resources by the lessor, with any difference being recognized as a gain or loss. A lease modification that does not qualify as a separate lease should be accounted for by remeasuring the lease liability and adjusting the related lease asset by a lessee and remeasuring the lease receivable and adjusting the related deferred inflows of resources by a lessor.

Subleases and Leaseback Transactions

Subleases should be treated as transactions separate from the original lease. The original lessee that becomes the lessor in a sublease should account for the original lease and the sublease as separate transactions, as a lessee and lessor, respectively.

A transaction qualifies for sale-leaseback accounting only if it includes a sale. Otherwise, it is a borrowing. The sale and lease portions of a transaction should be accounted for as separate sale and lease transactions, except that any difference between the carrying value of the capital asset that was sold and the net proceeds from the sale should be reported as a deferred inflow of resources or a deferred outflow of resources and recognized over the term of the lease.

A lease-leaseback transaction should be accounted for as a net transaction. The gross amounts of each portion of the transaction should be disclosed.

The requirements of this Statement are effective for periods beginning after December 15, 2019.

The GASB issued **Statement No. 88**, *Certain Disclosures Related to Debt, including Direct Borrowings and Direct Placements* in March 2018. The primary objective of this Statement is to improve the information that is disclosed in notes to government financial statements related to debt, including direct borrowings and direct placements. It also clarifies which liabilities governments should include when disclosing information related to debt.

This Statement defines debt for purposes of disclosure in notes to financial statements as a liability that arises from a contractual obligation to pay cash (or other assets that may be used in lieu of cash) in one or more payments to settle an amount that is fixed at the date the contractual obligation is established.

This Statement requires that additional essential information related to debt be disclosed in notes to financial statements, including unused lines of credit; assets pledged as collateral for the debt; and terms specified in debt agreements related to significant events of default with finance-related consequences, significant termination events with finance-related consequences, and significant subjective acceleration clauses.

For notes to financial statements related to debt, this Statement also requires that existing and additional information be provided for direct borrowings and direct placements of debt separately from other debt.

The requirements of this Statement are effective for periods beginning after June 15, 2018.

NEW GASB PRONOUNCEMENTS (Continued)

The GASB issued **Statement No. 90**, *Major Equity Interests*, an amendment of GASB Statements No. 14 and No. 61 in August 2018. This Statement improves the consistency and comparability of reporting a government's majority equity interest in a legally separate organization and improves the relevance of financial statement information for certain component units. It defines a majority equity interest and specifies that a majority equity interest in a legally separate organization should be reported as an investment if a government's holding of the equity interest meets the definition of an investment. A majority equity interest that meets the definition of an investment should be measured using the equity method, unless it is held by a special-purpose government engaged only in fiduciary activities, a fiduciary fund, or an endowment (including permanent and term endowments) or permanent fund. Those governments and funds should measure the majority equity interest at fair value.

For all other holdings of a majority equity interest in a legally separate organization, a government should report the legally separate organization as a component unit, and the government or fund that holds the equity interest should report an asset related to the majority equity interest using the equity method. This Statement establishes that ownership of a majority equity interest in a legally separate organization results in the government being financially accountable for the legally separate organization and, therefore, the government should report that organization as a component unit.

This Statement also requires that a component unit in which a government has a 100 percent equity interest account for its assets, deferred outflows of resources, liabilities, and deferred inflows of resources at acquisition value at the date the government acquired a 100 percent equity interest in the component unit. Transactions presented in flows statements of the component unit in that circumstance should include only transactions that occurred subsequent to the acquisition.

The requirements of this Statement are effective for periods beginning after December 15, 2018. The requirements should be applied retroactively, except for the provisions related to (1) reporting a majority equity interest in a component unit and (2) reporting a component unit if the government acquires a 100 percent equity interest. Those provisions should be applied on a prospective basis.

The GASB issued **Statement No. 91**, *Conduit Debt Obligations* in May 2019. The primary objectives of this Statement are to provide a single method of reporting conduit debt obligations by issuers and eliminate diversity in practice associated with (1) commitments extended by issuers, (2) arrangements associated with conduit debt obligations, and (3) related note disclosures. This Statement achieves those objectives by clarifying the existing definition of a conduit debt obligation; establishing that a conduit debt obligation is not a liability of the issuer; establishing standards for accounting and financial reporting of additional commitments and voluntary commitments extended by issuers and arrangements associated with conduit debt obligations; and improving required note disclosures.

A conduit debt obligation is defined as a debt instrument having all of the following characteristics:

- There are at least three parties involved: (1) an issuer, (2) a third-party obligor, and (3) a debt holder or a debt trustee.
- The issuer and the third-party obligor are not within the same financial reporting entity.

NEW GASB PRONOUNCEMENTS (Continued)

Statement No. 91, Conduit Debt Obligations (Continued)

A conduit debt obligation is defined as a debt instrument having all of the following characteristics: (Continued)

- The debt obligation is not a parity bond of the issuer, nor is it cross-collateralized with other debt of the issuer.
- The third-party obligor or its agent, not the issuer, ultimately receives the proceeds from the debt issuance.
- The third-party obligor, not the issuer, is primarily obligated for the payment of all amounts associated with the debt obligation (debt service payments).

All conduit debt obligations involve the issuer making a limited commitment. Some issuers extend additional commitments or voluntary commitments to support debt service in the event the third party is, or will be, unable to do so.

An issuer should not recognize a conduit debt obligation as a liability. However, an issuer should recognize a liability associated with an additional commitment or a voluntary commitment to support debt service if certain recognition criteria are met. As long as a conduit debt obligation is outstanding, an issuer that has made an additional commitment should evaluate at least annually whether those criteria are met. An issuer that has made only a limited commitment should evaluate whether those criteria are met when an event occurs that causes the issuer to reevaluate its willingness or ability to support the obligor's debt service through a voluntary commitment.

This Statement also addresses arrangements – often characterized as leases – that are associated with conduit debt obligations. In those arrangements, capital assets are constructed or acquired with the proceeds of a conduit debt obligation and used by third-party obligors in the course of their activities. Payments from third-party obligors are intended to cover and coincide with debt service payments. During those arrangements, issuers retain the titles to the capital assets. Those titles may or may not pass to the obligors at the end of the arrangements.

Issuers should not report those arrangements as leases, nor should they recognize a liability for the related conduit debt obligations or a receivable for the payments related to those arrangements. In addition, the following provisions apply:

- If the title passes to the third-party obligor at the end of the arrangement, an issuer should not recognize a capital asset.
- If the title does not pass to the third-party obligor and the third party has exclusive use of the entire capital asset during the arrangement, the issuer should not recognize a capital asset until the arrangement ends.
- If the title does not pass to the third-party obligor and the third party has exclusive use of only portions of the capital asset during the arrangement, the issuer, at the inception of the arrangement, should recognize the entire capital asset and a deferred inflow of resources. The deferred inflow of resources should be reduced, and an inflow recognized, in a systematic and rational manner over the term of the arrangement.

NEW GASB PRONOUNCEMENTS (Continued)

Statement No. 91, Conduit Debt Obligations (Continued)

This Statement requires issuers to disclose general information about their conduit debt obligations, organized by type of commitment, including the aggregate outstanding principal amount of the issuers' conduit debt obligations and a description of each type of commitment. Issuers that recognize liabilities related to supporting the debt service of conduit debt obligations also should disclose information about the amount recognized and how the liabilities changed during the reporting period.

The requirements of this Statement are effective for periods beginning after December 15, 2020.

CURRENT GASB PROJECTS

GASB currently has a variety of projects in process. Some of these projects discussed below.

Conceptual Framework – Recognition. The project's objective is to develop recognition criteria for whether information should be reported in state and local governmental financial statements and when that information should be reported. This project ultimately will lead to a Concepts Statement on recognition of elements of financial statements. The project is currently in deliberations with an exposure draft expected in February 2020, and concepts Statement draft in November 2021.

Conceptual Framework – Disclosure. The project's objective is to develop concepts related to a framework for the development and evaluation of notes to financial statements for the purpose of improving the effectiveness of note disclosures in government financial reports. The framework will establish criteria for the Board to use in evaluating potential note disclosure requirements during future standards-setting activities and in reexamining existing note disclosure requirements. Those concepts also will provide governments a basis for considering the essentiality of information items for which the GASB does not specifically provide authoritative disclosure guidance. This project is currently in deliberations with an exposure draft expected in March 2021, and a Concepts Statement draft in April 2022.

Financial Reporting Model. The objective of this project is to make improvements to the financial reporting model, including Statement No. 34, Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments, and other reporting model-related pronouncements (Statements No. 35, Basic Financial Statements – and Management's Discussion and Analysis – for Public Colleges and Universities, No. 37, Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments: Omnibus, No. 41, Budgetary Comparison Schedules – Perspective Differences, and No. 46, Net Assets Restricted by Enabling Legislation, and Interpretation No. 6, Recognition and Measurement of Certain Liabilities and Expenditures in Governmental Fund Financial Statements). The objective of these improvements would be to enhance the effectiveness of the model in providing information that is essential for decision-making and enhance the ability to assess a government's accounting and address certain application issues, based upon the results of the pre-agenda research on the financial reporting model. The project is currently in deliberations with an exposure draft expected in February 2020, and a final Statement draft in November 2021.

CURRENT GASB PROJECTS (Continued)

Public-Private Partnerships and Availability Payment Arrangements.

The project's objective is to address accounting and financial reporting for public-private partnerships (PPPs) and availability payment arrangements (APAs). The project will consider: (1) potential amendments to Statement No. 60, Accounting and Financial Reporting for Service Concession Arrangements, and potential amended or new implementation guidance to better address accounting and financial reporting for service concession arrangements (SCAs) within its scope, (2) potential additional accounting and financial reporting guidance for other types of public-private partnerships not with the scope of Statement 60, or subject to the provisions of Statement No. 87, Leases, and (3) APAs. The project is currently in the exposure draft comment period with a final Statement draft expected in February 2020.

Revenue and Expense Recognition. The objective of this project is to develop a comprehensive application model for the classification, recognition, and measurement of revenues and expenses. The purpose for developing a comprehensive model is (1) to improve the information regarding revenues and expenses that users need to make decisions and assess accountability, (2) to provide guidance regarding exchange and exchange-like transactions that have not been specifically addressed, (3) to evaluate revenue and expense recognition in the context of the conceptual framework, and (4) to address application issues identified in practice, based upon the results of the pre-agenda research on revenue for exchange and exchange-like transactions. The project is currently in deliberations with an exposure draft expected in September 2021, and a final Statement draft in December 2022.

CPAs and cybersecurity: Helping you build trust and transparency

Stolen data. System shutdowns. Widely publicized breaches. High-dollar lawsuits.

Is your organization prepared for a cybersecurity attack? Boards of directors, senior management and other stakeholders are requesting more information than ever before about organizations' cybersecurity risk management programs.

Using the AICPA's SOC for Cybersecurity framework, CPAs can provide assurance over the effectiveness of controls within your organization's cybersecurity risk management program, helping build trust and transparency for customers, investors and leadership.

4 of the leading 13 information security and cybersecurity consultants are CPA firms.

CPA firms deploy multidisciplinary teams composed of licensed CPAs and information technology and security specialists to ensure a comprehensive and thorough evaluation of your cybersecurity risk management program and its effectiveness in meeting your organization's cybersecurity objectives.

What is SOC for Cybersecurity?

The SOC for Cybersecurity examination provides an independent, entity-wide assessment of your organization's cybersecurity risk management program.

- Appropriate for businesses, not-for-profits and virtually any other type of organization
- Helps reduce uncertainty and build resilient organizations by evaluating effectiveness of existing cybersecurity processes and controls
- Permits flexibility by not constraining management to a particular security management framework or control framework
- Results in a general use report on whether:
 - The description of an entity's cybersecurity risk management program is presented in accordance with description criteria and
 - The controls within that program were effective in achieving the entity's cybersecurity objectives

62%

of executives expect to see an increase in reporting requests from their board of directors on cybersecurity program effectiveness.

(Source: Deloitte, 2018. "Corporate Boards May Be More Likely Than Regulators to Scrutinize Cybersecurity Program Effectiveness This Year.")

AICPA cybersecurity risk management reporting framework

The AICPA cybersecurity risk management reporting framework helps organizations communicate about the effectiveness of their cybersecurity risk management programs via three components:

- Description Criteria for Management's Description
 of an Entity's Cybersecurity Risk Management
 Reporting Program This is used by management to
 provide transparency regarding its cybersecurity risk
 management program and used by CPAs to report on
 management's description. Management's description
 provides users of the report with information that can
 help them understand the entity's cybersecurity risks
 and how it manages those risks. Description criteria
 includes considerations on the nature of an entity's
 business and operations, factors affecting inherent
 cybersecurity risk, risk governance and assessment
 process and the monitoring of the cybersecurity
 program, among other criteria.
- 2017 Trust Services Criteria for Security, Availability, Processing Integrity, Confidentiality and Privacy — This is used by management to evaluate the effectiveness of controls and used by CPAs providing advisory or attestation services to evaluate and report on the effectiveness of controls within the cybersecurity risk management program.

 AICPA Guide Reporting on an Entity's Cybersecurity Risk Management Program and Controls —
 This attestation guidance assists CPAs engaged to examine and report on an entity's cybersecurity risk management program (SOC for Cybersecurity).
 This guide also contains information that can assist management in understanding the SOC for Cybersecurity engagement and its responsibilities with respect to the engagement.

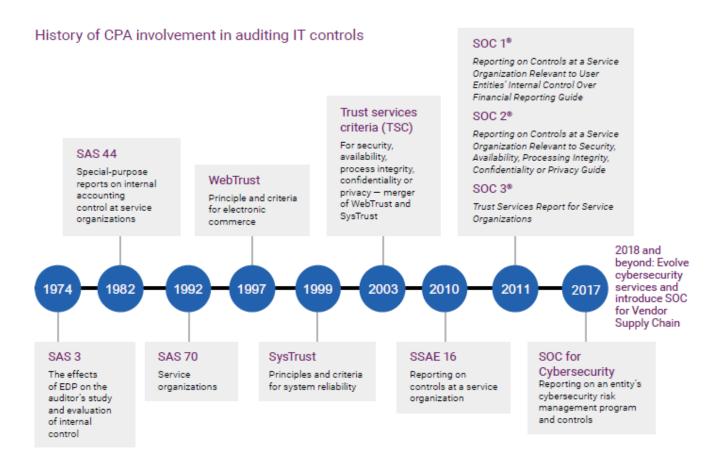

Why CPA firms? Education. Experience. Expertise.

The education, experience and expertise of CPAs position them as the premier providers of SOC for Cybersecurity services.

- Knowledge of relevant IT systems and technology, including mainframes, networking, firewalls, network management systems, security protocols and operating systems
- Understanding of IT processes and controls such as management of operating systems, networking and virtualization software and related security techniques; security principles and concepts; software development; and incident management and information risk management
- Experience with common cybersecurity publications and frameworks (NIST CSF, ISO 27001/27002, 2013 COSO Internal Control — Integrated Framework, COBIT 5, etc.)
- Expertise in evaluating processes, control effectiveness and providing advisory services relating to these matters
- Multidisciplinary teams that incorporate certified information security professionals such as Certified Information Systems Security Professionals (CISSP), Certified Information Systems Auditors (CISA) and Certified Information Technology Professionals (CITP®)

- Proficiency in measuring performance against established criteria, applying appropriate procedures for evaluating against those criteria and reporting results
- Strict adherence to service-specific professional standards, professional code of conduct and quality control requirements
- Holistic understanding of entity's industry and business, including whether the industry in which the entity operates is subject to specific types of or unusual cybersecurity risks and uses specific industry technology systems
- · Objectivity, credibility and integrity
- Independence, professional skepticism and commitment to quality
- Strong analytical skills
- · International perspective for global organizations

CPAs: Forerunners in the cybersecurity movement

- 1970s CPAs required to consider effects of electronic data processing on the evaluation of internal control in financial statement audits.
- 1990s CPAs begin performing SAS 70 audits to report on the effectiveness of internal control over financial reporting.
- 2000s CPAs begin using the trust services criteria for evaluating controls relevant to security, availability, processing integrity, confidentiality and privacy and issuing SOC reports to address vendor management needs related to outsourced services.
- 2017 Introduction of SOC for Cybersecurity attestation services for CPAs to report on the effectiveness of controls within an organization's cybersecurity risk management program.
- 2018 and beyond Continue to evolve cybersecurity services and introduce SOC for Vendor Supply Chain to enable users of products produced, manufactured and distributed by an entity to better understand and manage risks, including cybersecurity risks, arising from their business relationships with the entity.
