MANAGEMENT'S DISCUSSION AND ANALYSIS (unaudited)

The following discussion and analysis provides an overview of the financial position and activities of the University of Virginia's Medical Center (Medical Center) for the year ended June 30, 2013, with comparative information for the year ended June 30, 2012. This discussion has been prepared by management and should be read in conjunction with the financial statements, and the notes thereto, which follow this section.

The Medical Center is one of the three operating divisions of the University of Virginia. The Vice President and Chief Executive Officer of the Medical Center provide overall leadership and management of the Medical Center. The Medical Center is an integrated network of primary and specialty care services ranging from wellness programs and routine checkups to the most technologically advanced care. The hub of the Medical Center is a 676 licensed bed hospital with a state designated Level 1 trauma center located on the Charlottesville campus. The Medical Center also has a 40 licensed bed Transitional Care Hospital located west of the Charlottesville campus. In addition, primary and specialty care are provided at clinic locations throughout central Virginia communities.

Financial Highlights

	<u>2013</u>	<u>2012</u>
Operating revenues	<u>\$ 1,239.7</u>	<u>\$ 1,184.5</u>
Operating income	\$ 90.3	\$ 84.8
Net non-operating revenue	<u>18.0</u>	<u>0.8</u>
Net income	<u>\$ 108.3</u>	<u>\$ 85.5</u>

* millions

At the end of fiscal year 2013, the operating income was \$90.3 million, compared to fiscal year 2012 operating income of \$84.8 million. The current fiscal year performance resulted from increased demand for patient care services and continued efforts by management and staff in controlling labor and supply expense.

One-time expense reductions impacted the fiscal year 2013 and fiscal year 2012 operating income. The operating income in fiscal year 2013 includes a \$7.7 million reduction of expenses for the settlement of a multi-year dispute with a vendor. The operating income in fiscal year 2012 includes a \$13.0 million reduction in fringe benefit expense for interest paid by the IRS to the Medical Center related to a settlement of FICA payments made by the Medical Center on wages for interns and residents.

Net non-operating revenue increased by \$17.2 million from fiscal year 2012 to fiscal year 2013. Due to favorable conditions in United States capital markets, investment income (both realized and changes in fair market value) increased by \$34.1 million from fiscal year 2012 to fiscal year 2013. Offsetting the increase in investment income revenue is the gain sharing accrual made to the University of Virginia School of Medicine which is \$7.8 million greater than fiscal year 2012. The gain sharing accrual is based on the Medical Center exceeding operating margin thresholds. Also included in non-operating revenue are others items such as earnings from affiliates, loss on disposal of assets, interest payments, and other transfers to operating units of the University of Virginia. The sum of these other items is to reduce net non-operating revenue by \$9.1 million from fiscal year 2012.

Financial Statements

The Medical Center's financial report includes three financial statements: the Statement of Net Position, the Statement of Revenues, Expenses, and Changes in Net Position, and the Statement of Cash Flows. These financial statements are prepared in accordance with the Governmental Accounting Standards Board (GASB) Statement 34, *Basic Financial Statements-and Management's Discussion and Analysis-for State and Local Governments*; GASB Statement 35, *Basic Financial Statements and Management's Discussion and Analysis of Public Colleges and Universities*, GASB Statement 65, *Items Previously Reported as Assets and Liabilities*, and with the Financial Accounting Standards Board requirements for Health Care Organizations.

The Statement of Net Position presents the financial position of the Medical Center at the end of the fiscal year, including all assets and liabilities of the Medical Center. Net position is the difference between total assets and total liabilities and is one of the indicators used to evaluate the current financial condition of the Medical Center. In contrast, the change in net position indicates whether the overall financial condition improved or worsened during the year. Shown below is a summary of the Medical Center's Statements of Net Position.

Statement of Net Position As of June 2013 and June 2012

	<u>2013</u>	<u>2012</u>	<u>Increase(Decrease)</u>	
			<u>Amount</u>	<u>Percent</u>
Assets and deferred outflows:				
Current assets	\$ 385.3	\$ 346.6	\$ 38.8	11.2%

Net Position	<u>\$1,296.7</u>	<u>\$ 1,199.6</u>	<u>\$ 97.1</u>	<u>8.1%</u>

*-in millions

During fiscal year 2013, the Medical Center's financial position remained positive. Net position increased \$102.6 million, or 20 percent, primarily due to strong operating income and the continued increase in the fair market value of the Medical Center's investments. As a result of early implementation of GASB 65, the Medical Center made a fund balance adjustment of 5.5 million, resulting in a net change of \$97.1 million.

The value of capital assets net of depreciation increased \$37.1 million from the prior fiscal year. Major projects in fiscal year 2013 include significant progress on construction of the Battle Building, renovation of the Hospital Lobby, and continued renovation of multiple patient care units in the Hospital.

Components of the Medical Center's capital assets are shown below:

*in millions

Total liabilities decreased by \$13.2 million due to principal payments on long term debt and a reduction in the balance of operating accounts payable and other accrued operating expenses at the end of fiscal year 2013.

Statement of Revenues, Expenses and Changes in Net Position

Changes in total net position as presented in the Statements of Net Position is based on activity shown in the Statements of Revenues, Expenses, and Changes in Net Position. The purpose of these statements is to present the Medical Center's operating and non-operating revenues and expenses and any other revenues, expenses, gains, and losses. A summarized comparison of revenues, expenses and other changes in net position for the years ended June 30, 2013 and 2012 is as follows:

Statement of Revenues, Expenses and Changes in Net Position For the years ended June 30, 2013 and 2012

	<u>2013</u>	<u>2012</u>	Increase(Decrease) <u>Amount</u>	<u>Percent</u>
Net patient service revenue	\$1,165.7	\$1,115.8	\$49.9	4.5%

*-in millions

Operating Revenue

Net patient service revenue for fiscal year 2013 was 4.5 percent above prior year. Contributing to the increase in net patient service revenue were inpatient discharges increasing 1.6 percent and adjusted discharges by 3.2 percent. As part of the Medical Center's Strategic Plan there has been focused efforts to grow patient activity through-out Central Virginia expanding the Medical Center's primary service areas and to increase the number of patients that come to the Medical Center from secondary service areas. The Medical Center has negotiated annual payment increases with managed care companies and receives annual payment updates from the Medicare program.

In fiscal year 2013, the Medical Center received \$5.2 million in meaningful use incentive payments from The Center for Medicare and Medicaid Services (CMS). Meaningful use sets specific objectives that hospitals must achieve to qualify for incentive payments. Meaningful use is using certified electronic health record technology to: improve quality, safety, engage patients in the care process, improve care coordination, and maintain privacy and security of patient health information.

It has been widely reported that due to the current unemployment rates and slow economic growth indigent care has been increasing across the nation. For fiscal year 2013 indigent care has totaled \$234.1 million which is 6.7 percent of gross revenue. Unlike most other hospitals, the Medical Center receives cost based payments from a combination of State and Federal dollars to pay the Medical Center and its Faculty. However, the trend in indigent care and issues with the State budget and healthcare reform are reasons for concern as we look to future years.

Operating Expenses

Total operating expenses for fiscal year 2013 were 4.5 percent above the prior year.

Total labor expenses (including salaries and wages, fringe benefits and contract labor) grew 7.5 percent from the prior year, due to increased staffing to meet patient demand, adjustments to employee compensation to remain market competitive, and fiscal year 2012 included a \$13.0 million reduction in fringe benefits related to interest paid to the Medical Center on a FICA settlement with the IRS.

Total labor expense grew 4.6 percent excluding the one-time reduction fringe benefit expense. Total FTEs increased from 6,757 in fiscal 2012, to 6,886 in fiscal 2013 or 1.9 percent. The average salary, wage and benefit cost per FTE increased from \$74,580 in the prior fiscal year, to \$76,136 in fiscal year 2013, a 2.1 percent increase.

Total paid employees, including contracted employees, are summarized below:

Other operating expenses rose 2.3 percent from the prior year, primarily due to servicing greater patient volume, contractual increases in purchased services, inflationary pressures from suppliers of pharmaceuticals and medical supplies, depreciation and utilities. In fiscal year 2013, purchased services were reduced by a one-time settlement with a vendor. Other operating expenses rose 3.5 percent excluding the vendor settlement.

* in millions

Statement of Cash Flows

The Statement of Cash Flows provides additional information about the Medical Center's financial results by reporting the major sources and uses of cash. A comparative summary of the statement of cash flows for the years ended June 30, 2013 and 2012 is as follows:

Statement of Cash Flows

For the years ended June 30, 2013 and 2012

	<u>2013</u>	<u>2012</u>	<u>Increase(Decrease)</u>	
			<u>Amount</u>	<u>Percent</u>
Cash flows from operating activities	\$ 201.8	\$ 102.6	\$ 99.2	96.6%
Cash flows from non-capital financing activities	(3.8)	4.4	(8.2)	-186.4%
Cash flows from capital and related financing activities	(130.9)	(61.1)	(69.8)	114.3%
Cash flows from investing activities	<u>10.1</u>	<u>(52.6)</u>	<u>62.7</u>	-119.2%
Net increase(decrease) in cash and cash equivalents	77.2	(6.7)	83.9	-1258.4%
Cash and cash equivalents-beginning of the year	<u>148.4</u>	<u>155.2</u>	<u>(6.8)</u>	-4.4%
Cash and cash equivalents-end of the year	<u>\$225.6</u>	<u>\$148.5</u>	<u>\$77.1</u>	52.0%

* in millions

The cash generated from operating activities increased by 99.3 percent from fiscal year 2012 to fiscal year 2013 because of changes in patient accounts receivable, settlements from governmental third parties, and working capital needs.

Cash flows from non-capital financing activities decreased \$8.2 million from fiscal year 2012. During fiscal year 2013, the Medical Center received \$1.4 million less gift funds and paid Buchanan grants of \$6.8 million.

Cash flows from capital and related financing activities increased \$69.8 million in fiscal 2013. The primary reason for the increase is the Medical Center acquired \$85.1 million less in debt, while decreasing the amount spent for capital by \$20.7 million. In addition, interest expense increased by \$3.6 million from the previous year.

Cash flows from investing activities increased \$62.7 million from fiscal year 2012 due to higher realized investment income and unrealized changes in the fair market value investments.

Economic Factors Affecting the Future

Since 1996, Medicare has implemented several initiatives to prevent improper payments to health care providers. The latest such initiative is Recovery Audit Contractors. The overall goal is to reduce payments due to billing errors. Recovery Audit Contractors are private companies with whom Medicare has contracted to perform audits. The Recovery Audit Contractor has recently began work with Virginia providers

including the Medical Center. To prepare for the Recovery Audit initiative a multidisciplinary team consisting of Audit, Compliance, Medical Records, Revenue Cycle and Finance leaders in the Medical Center have built tools and workflows to support this process.

The Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 were signed into law in March 2010. The two Acts provide for a number of changes that will affect the health care industry over the next decade. The regulations to implement the Acts are beginning to take effect; however, the substantive portions of the Acts are deferred until 2014. The impact on the Medical Center cannot be known at this time but rather will emerge over the next three years.

Another factor is the expansion of Medicaid in the Commonwealth. If Medicaid is not expanded in Virginia there is potential for significant negative impacts to the Medical Center's net patient service revenues.

NOTES TO FINANCIAL STATEMENTS

UNIVERSITY OF VIRGINIA MEDICAL CENTER

NOTES TO FINANCIAL STATEMENTS

AS OF JUNE 30, 2013

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Organization and Mission

The Medical Center is a division of the University of Virginia. The Medical Center's mission is to provide excellence, innovation, and superlative quality in the care of patients, the training of health professionals, and the creation and sharing of health knowledge within a culture that promotes equity, diversity and inclusiveness. Only those activities directly associated with the furtherance of this mission are considered to be operating activities. Other activities that result in gains or losses unrelated to the Medical Center's primary mission are considered to be non-operating.

A separate report is prepared for the Commonwealth that includes all agencies, boards, commissions, and authorities over which the Commonwealth exercises or has the ability to exercise oversight authority. The University is a component unit of the Commonwealth and is included in the basic financial statements of the Commonwealth.

B. Basis of Accounting

The Medical Center has adopted the accrual basis of accounting in accordance with Generally Accepted Accounting Principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB) and the Financial Accounting Standards Board (FASB) for providers of healthcare services.

Pursuant to GASB Statement 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*, the Medical Center has elected to apply the provisions of all relevant pronouncements of FASB, including those issued after November 30, 1989.

The financial statements have been prepared in accordance with GASB Statement 34, *Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments*, and GASB Statement 35, *Basic Financial Statements and Management's Discussion and Analysis of Public College and Universities*.

Pursuant to GASB Statement 65, *Items previously reported as Assets and Liabilities*, the Medical Center has elected early application of the accounting changes required to conform to the provisions of this statement.

C. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at

the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

D. Subsidiary and Affiliated Companies

The consolidated financial statements include the accounts of the following controlled subsidiary companies where ownership is greater than 50 percent.

University of Virginia Imaging, LLC

On March 26, 2002, the Medical Center entered into an agreement with Outpatient Imaging Affiliates of Virginia, LLC to establish University of Virginia Imaging, LLC (UVI). The limited liability corporation was formed to operate an outpatient diagnostic imaging center to help respond to the need for radiology services in the Charlottesville area.

The Medical Center currently operates an outpatient imaging department offering MRI, plain film radiography, fluoroscopy, and ultrasound in office space at the Fontaine Research Park and at the Transitional Care Hospital. UVI provides services to outpatients from the Medical Center's primary and secondary service areas.

Since the Medical Center owns 80 percent of UVI, its financial activity is presented under the consolidation method.

Community Medicine, LLC

On November 14, 2000, the University established the Community Medicine University of Virginia, LLC (Community Medicine). Community Medicine was established as a limited liability corporation (LLC) under the laws of the Commonwealth to house physician practices. This model gives physicians an organizational structure that allows them the opportunity to practice independently in a virtual private practice environment with all the risks and gains associated with an independent model. As an LLC, which is a wholly owned subsidiary of the University, Community Medicine is considered a disregarded entity for tax purposes and its financial activity is accounted for under the consolidation method.

Community Medicine commenced operations on July 1, 2001 and the Medical Center's investment totaled \$1,810,000.

Hematology Oncology Patient Enterprises, Inc.

The Medical Center purchased Hematology Oncology Patient Enterprises, Inc. (HOPE) on July 15, 2012 for \$15,000,000. HOPE is wholly owned by the Medical Center, and is comprised of the following clinics: Pantops, Farmville, Culpeper, and Augusta. The purchase was the cornerstone of forming UVA HOPE Cancer Care which is a network of doctors and nurses who deliver high quality cancer treatment throughout the region. The physicians at HOPE explore all treatment with a patient focused approach using the latest medical, surgical, and radiological therapies along with support therapies, massage, nutrition, mind and body medicine, naturopathy and spiritual wellness.

Investments in affiliates in which the Medical Center has substantial interest (approximately 20 to 50 percent), or for which the Medical Center exercises significant influence, but not

control, over policy decisions are accounted for by the equity method and are described in Note 4.

E. Net Patient Service Revenue

Net patient service revenue is reported at the estimated net realizable amounts from patients, third-party payers, and others for services rendered. Net patient service revenue also includes funds from the Commonwealth's Department of Medical Assistance Services for disproportionate share and indirect medical education payments and funds from third-party payers for estimated retroactive adjustments under reimbursement agreements. Retroactive adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as final settlements are determined.

F. Indigent Care

The Medical Center accepts all patients regardless of their ability to pay. A patient is classified as indigent by reference to established Commonwealth policies. The criteria for identifying indigent patients are based on asset and income guidelines that are updated annually in accordance with the federal poverty income guidelines as provided by the federal Office of Management and Budget. Because the Medical Center does not pursue collection of amounts determined to qualify as indigent care, they are not reported as revenue.

G. Receivables From Third Parties and Contractual Adjustments

A significant portion of the Medical Center's services is rendered to patients covered by Medicare, Medicaid, or other third-party payers. The Medical Center entered into contractual agreements with these third parties to accept payment for services in amounts less than scheduled charges.

Certain annual settlements of amounts due for patient services covered by third parties are determined through cost reports that are subject to audit and retroactive adjustment by the third parties. Provisions for possible adjustments of cost reports have been estimated and reflected in the accompanying financial statements. Since the determination of cost reimbursement settlements of amounts earned in prior years has been based on reasonable estimation, the difference in any year between the originally estimated amount and the final determination is reported in the year of determination.

H. Cash, Cash Equivalents, and Investments

Cash and cash equivalents include cash and all highly liquid investments with maturity of three months or less when purchased. Donated investments are reported at the fair market value at the date of receipt. The major portion of the investments of the Medical Center's endowment funds is pooled under the University of Virginia Growth and Income Fund, the general endowment pool for the University. Annually, endowment earnings on the consolidated endowment pool are distributed to the participating funds based on the participating share of each fund in the pool.

Investments are carried at fair value as determined by quoted market prices. Unrealized appreciation or depreciation of investments is included in the current period net of earnings. All investment income, including changes in the fair value of investments

(unrealized gains and losses), is reported as non-operating revenue in the Statement of Revenues, Expenses, and Changes in Net Assets.

I. Inventories

Inventories are valued at the lower of cost, generally determined on the weighted average method, or market and consist primarily of expendable supplies held for consumption.

J. Property, Plant, and Equipment

Property, plant, and equipment are stated at cost, or if donated, at fair market value at the date of donation. The Medical Center capitalizes expenditures for equipment costing \$2,000 or more and having a useful life of two years or greater in accordance with the *Medicare Reimbursement Manual*.

Depreciation on property, plant, and equipment, excluding land and construction-in-progress, is computed over the estimated useful lives of the assets using the straight-line method. The general range of estimated useful lives is 10 to 40 years for buildings and fixtures and 3 to 20 years for equipment.

The Medical Center utilizes the half-year convention for recognizing depreciation expense related to equipment, both fixed and moveable. A half-year of depreciation is recognized on all equipment in the fiscal year of acquisition. Likewise, a half-year of depreciation is recognized in the fiscal year at the end of the equipment's useful life. Depreciation on buildings is recognized from the date that the asset is placed in service to the date on which it is retired.

K. Deferred Bond Issue Costs

In March 2012, The Governmental Accounting Standards Board has issued Statement Number 65, *Items Previously Reported as Assets and Liabilities*, effective. The guidance is that debt issuance cost, except any portion related to prepaid insurance costs, should be recognized as expense in the period incurred. The Medical Center has elected early adoption of the standard in fiscal year 2013, effective July 1, 2012. This statement establishes accounting and financial reporting standards that reclassify, as deferred outflows of resources or deferred inflows of resources, certain items that were previously reported as assets and liabilities. The concept of Net Position was also defined by GASB 65 which renames net assets as Net Position. The effect of the changes from the implementation of Statement No. 65 on the Medical Center's financial statements for the year ended June 30, 2012, was as follows:

NET POSITION	2012	Change	2012
	Beginning Balance previously issued		Ending Balance as restated
Current assets	\$ 348,582,376	\$ (2,000,008)	\$ 346,582,368
Noncurrent assets	<u>1,544,501,385</u>	<u>(27,417,694)</u>	<u>1,517,083,691</u>
Total assets	1,893,083,761	(29,417,703)	1,863,666,059
Deferred outflows of resources	<u>0</u>		<u>29,417,703</u>
Total assets and deferred outflows of resources	\$ 1,893,083,761	\$ -	\$ 1,893,083,762
Current liabilities	\$ 259,765,691	\$ (16,674,943)	\$ 243,090,748
Noncurrent liabilities	<u>433,672,227</u>	<u>-</u>	<u>433,672,227</u>
Total liabilities	693,437,918	(16,674,943)	676,762,975
Deferred inflows of resources	<u>0</u>	16,674,943	<u>16,674,943</u>
Total liabilities and deferred inflows of resources	\$ 693,437,918	\$ -	\$ 693,437,918

L. Accrued Leave

The amount of leave earned, but not taken by salaried employees is recorded as a liability on the Statement of Net Position. The amount reflects, as of June 30, all earned leave not taken and the amount payable under the catastrophic leave pay-out policy upon termination, which is the lesser of 25 percent of sick leave not taken or \$5,000 per employee with five or more years of service. The liability is based on the probability that an employee with less than five years of service will eventually become vested and has a right to receive payment for sick leave benefits. The applicable share of employer-related taxes payable on the eventual termination payments is also included.

M. Comparative Data

The Medical Center presents its financial information on a comparative basis. The basic financial statements include certain prior year summarized comparative information, in total, but not at the level of detail required for a presentation in conformity with generally accepted accounting principles. Accordingly, the prior year information should be read in conjunction with the Medical Center's financial statements for the year ended June 30, 2012, from which the summarized information is derived.

2. CREDIT RISK UNDERLYING CASH, CASH EQUIVALENTS AND INVESTMENTS

Cash, Cash Equivalents and Investments:

The following risk disclosures are required by GASB Statement Number 3, *Deposits with Financial Institutions, Investments (including Repurchase Agreement), and Reverse Repurchase Agreements* as amended by GASB Statement 40, *Deposit and Investment Risk Disclosures*:

Custodial Credit Risk (Category 3 deposits and investments) - The custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, a government will not be able to recover the value of investment or collateral securities that are in the possession of an outside party. The Medical Center has no category 3 deposits or investments for 2013.

Credit risk - The risk that an issuer or other counterparty to an investment will not fulfill its obligations. GASB Statement 40 requires the disclosure of the credit quality rating on any investments subject to credit risk. The Medical Center does not have any credit risk.

Concentration of credit risk - The risk of loss attributed to the magnitude of a government's investment in a single issuer. GASB Statement 40 requires disclosure of any issuer with more than five percent of the Medical Center investments are in the University of Virginia Growth and Income Fund. The Medical Center investments are 100 percent invested in the University of Virginia Growth and Income Fund.

Interest rate risk - The risk that changes in interest rates will adversely affect the fair value of an investment. GASB Statement 40 requires disclosure of maturities for any investments subject to interest rate risk. The Medical Center does not have an interest rate risk policy.

Foreign currency risk - The risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The Medical Center has no foreign investments or deposits for 2013.

The following information is provided with respect to the risks associated with the Medical Center's cash, cash equivalents, and investments at June 30, 2013.

Cash and Cash Equivalents

Pursuant to Section 2.2-1800, et seq., Code of Virginia, all state funds of the Medical Center are maintained by the Treasurer of Virginia who is responsible for the collection, disbursement, custody, and investment of state funds. Cash deposits held by the Medical Center are maintained in accounts collateralized in accordance with the Virginia Security for Public Deposits Act, Section 2.2-4400, et seq., Code of Virginia. The Virginia Security for Public Deposits Act eliminates any custodial credit risk for Medical Center's deposits. Cash and Cash Equivalents represent cash with the treasurer, cash on hand, certificates of deposit, and temporary investments with original maturities of 90 days or less, and cash equivalents with the Virginia State Non-Arbitrage Program (SNAP). SNAP is an open-end management investment company registered with the Securities and Exchange Commission (SEC). Cash and Cash Equivalents reporting requirements are defined by GASB

Statement 9, Reporting Cash Flows of Proprietary and Nonexpendable Trust Funds and Governmental Entities that Use Proprietary Fund Accounting.

Additional disclosures required for cash equivalents under GASB Statement Number 40 are presented with the investments in the following tables.

Investments

The investment policy of the Medical Center is established by the Board of Visitors and monitored by the Board's Finance and Audit Committee. Authorized investments are set forth in the "Investment of Public Funds Act", Sections 2.2-4500 through 2.2-4516, Code of Virginia. Authorized investments include U.S. Treasury and agency securities; corporate debt securities of domestic corporations, asset-backed securities, mortgage-backed securities, AAA rated obligations of foreign governments, bankers' acceptances and bank notes, negotiable certificates of deposit, repurchase agreements, and money market funds.

Investments fall into two groups: short and long-term. Short-term investments have an original maturity of over 90 days but less than or equal to one year. Long-term investments have an original maturity greater than one year.

Credit and Concentration of Credit Risks

Credit and Concentration of Credit Risks

Type of Investment	Fair Value	Credit Rating	Concentration Risk
<u>INVESTMENTS:</u>			
University of Virginia Long Term Pool	\$ 463,898,379		100%
Total Investments	<u>463,898,379</u>

Interest Rate Risk – Maturities

Interest Rate Risk: Maturities

Type of Investment	<1 year	1-5 years	6-10 years	Total
University of Virginia Long Term Pool	\$ 463,898,379			\$ 463,898,379
Total investments	<u>\$ 463,898,379</u>	<u>\$ -</u>		<u>\$ 463,898,379</u>

3. GOODWILL

In July 2004, the Medical Center purchased Virginia Ambulatory Surgery Center, (VASI), now known as the University of Virginia Outpatient Surgery Center. As a result of the purchase, the Medical Center recorded \$6.9 million of goodwill to be amortized over a period of 40 years.

In November 2004, the Medical Center purchased Amherst and Lynchburg renal facilities. As a result of the purchase, the Medical Center recorded goodwill of \$3.4 and \$4.0 million, respectively, for the Amherst and Lynchburg facilities. The goodwill is to be amortized over a period of 20 years.

4. AFFILIATED COMPANIES

Culpeper Regional Hospital

On December 31, 2008, the University of Virginia Medical Center and Culpeper Regional Hospital entered into a partnership agreement, whereby the Medical Center obtained a 49 percent interest in Culpeper Regional Hospital, with a \$41.2 million investment. The Medical Center uses the equity method of consolidation in order to reflect the Medical Center's investment in Culpeper Regional Hospital.

Central Virginia Health Network, Inc.

In May 1995, the Medical Center joined the Central Virginia Health Network, Inc. (CVHN), a partnership of eight Richmond area hospitals. CVHN was formed to provide an efficient and coordinated continuum of care, with services ranging from acute hospital treatment to primary physician care and home health services.

The Medical Center originally paid \$100 for 10,000 shares of common stock and \$109,900 as additional paid-in capital. In addition, the Medical Center is obligated for monthly dues to CVHN of \$15,913. Complete financial statements can be obtained from the registered agent: Steven D. Gravely, Esq., Mezzullo and McCandlish, Post Office Box 796, Richmond, Virginia 23206.

University of Virginia / HEALTHSOUTH, LLC

The Medical Center entered into a joint venture with HEALTHSOUTH Corporation to establish an acute rehabilitation facility located at the Fontaine Research Park to provide patient services to the region. The Medical Center made a capital contribution of \$2.2 million to the joint venture in May 1996, which represents a 50 percent interest. Complete financial statements can be obtained from the managing member: HEALTHSOUTH Corporation, 7700 East Parham Road, Richmond, Virginia 23294.

Valiance Health, LLC

In November 1997, the Medical Center became a participant with Rockingham Memorial Hospital and Augusta Health Care, Inc., in Valiance Health, LLC (Valiance), a joint venture integrating and coordinating the delivery of healthcare services in central and western Virginia. The Medical Center contributed \$100,000 in initial capital, which entitles it to a pro-rata distribution of

any profits and losses of Valiance. In October 2003, the Medical Center contributed an additional \$400,000 in capital to Valiance, bringing the Medical Center's total investment to \$500,000.

University Health System Consortium (UHC)

In December 1986, the Medical Center became a member of the University Health System Consortium (UHC). Founded in 1984, UHC is an alliance of the clinical enterprises of academic health centers. While focusing on the clinical mission, UHC is mindful of and supports the research and education missions. The mission of the UHC is to advance knowledge, foster collaboration, and promote change to help members compete in their respective healthcare markets. In keeping with this mission, UHC helps members pool resources, create economies of scale, improve clinical and operating efficiencies, and influence the direction and delivery of healthcare. Accordingly, UHC is organized and operated on a cooperative basis for the benefit of its member health systems as patrons.

UHC is a not-for-profit organization. It is incorporated as a nonstock corporation and designated as a nonexempt cooperative, which is taxable under Subchapter T, section 1382-1388, of the Internal Revenue Code. As such, UHC's bylaws provide for distributions of patronage dividends to its patrons. This allocation is based on the value of business done with or for each patron by UHC. The Medical Center records the portion of the patronage dividends that were held by UHC as patronage equity.

PACE

The Medical Center contributed \$245,000 for a 24.5% investment in Charlottesville PACE (Program of All Inclusive Care for the Elderly). The Charlottesville PACE financial transactions will be recorded using the equity method of accounting. The program delivers various medical and support services to senior residents in Charlottesville and surrounding counties. Patients in the program have an alternative to residential nursing home care providing daily access to doctors and physical therapists, home health care, and personal care.

As of June 30, 2013

	<u>Common Stock and Equity Contribution</u>	<u>Share of accumulated income (loss)</u>	<u>Net investment</u>
Central Virginia Health Network, Inc.	\$ 232,500	\$ (41,026)	\$ 191,474
HealtheSouth, LLC	\$ -	\$ 11,258,069	\$ 11,258,069

PACE Equity	\$ 245,000	\$ -	\$ 245,000

HealthCare Partners, Inc.

In May 1995, HealthCare Partners, Inc., a non-stock, non-profit corporation, was established to support networking, external business relationships with neighboring hospitals and physicians groups, and expansion of primary care activities. The Medical Center and the University Physicians' Group are the primary contributors to the funding of the corporation. Healthcare Partners, Inc. is governed by a board of directors composed of the following members: Medical Center Operating Board Chairman, the Chief Executive Officer and Chief Financial Officer of the Medical Center, University Physicians Group representatives, community members, and President appointees.

5. PROPERTY, PLANT, AND EQUIPMENT

A summary of the property, plant, and equipment accounts and the related accumulated depreciation as of June 30, 2013, is presented as follows:

	Beginning Balance	Additions	Reductions	Ending Balance
Land	\$ 17,392,966	\$ 489,361	\$ 244,680	\$ 17,637,647
Construction in Progress	173,281,345	111,668,283	168,169,329	116,780,299

6. ASSETS HELD BY TRUSTEES

Assets held by trustees consist of assets whose use is limited under indenture agreements. The Series 1998B, 1999A, 2003A, 2003B, 2006, 2008, 2009, 2010, 2011, 2012 and 2013 bond resolutions require deposits be made in a specific order to various accounts and funds held by the University of Virginia Internal Loan Program as follows:

- A. To the credit of the Interest Account on a monthly basis, the amount of interest due and payable on the first day of the succeeding month with respect to the bonds of each series then outstanding;
- B. To the credit of the Principal Account on an monthly basis, the amount sufficient to pay maturing principal of all bonds on the next principal payment date;
- C. To the credit of the Sinking Fund Account, the amount sufficient to retire all bonds to be called by mandatory redemption on the next ensuing mandatory redemption date;
- D. To the credit of any other fund or account created pursuant to an applicable Series Resolution.

Funds held by the Treasurer and restricted by bond agreements consist of the following as of June 30, 2013:

Bond Sinking Fund-2008	\$	761,146
Bond Sinking Fund-2009A	\$	9,244,412
Bond Sinking Fund-2009C	\$	1,207,040
Bond Sinking Fund-2010A	\$	2,099,840
Bond Sinking Fund-2010B	\$	608,885
Bond Sinking Fund-2010E	\$	174,075
Bond Sinking Fund-2011A	\$	94,765
Bond Sinking Fund-2012A	\$	35,175,865
Bond Sinking Fund-2013A	\$	17,300,000

*The Medical Center also participates in the Commonwealth's Public Higher Education Financing Program, Series 1999A ("Pooled Bond Program"). The indenture of the series specifies the Bank of New York as trustee and the Medical Center is required to make debt service payments to the trustee in the amount billed by the trustee semi-annually.

7. ACCOUNTS PAYABLE

As of June 30, 2013, the components of accounts payable and accrued expenses consist of the following:

Vendor accounts payable	\$35,896,982
Due to the University	29,408,426
Accrued leave	28,542,850
Accrued allotments	14,175,433
Other accounts payable	10,027,737
Accrued payroll	8,895,225
Due to employees-FICA	75,906
Other accrued expenses	<u>18,491,695</u>
	<u>\$145,514,254</u>

8. LONG-TERM DEBT

9. FINANCING OF MAJOR CONSTRUCTION AND RENOVATION PROJECTS

The Clinical Office Building at Fontaine Research Park was purchased in April 2004. The Medical Center borrowed \$17.6 million from the University's Pooled Bond Program to buy the building and complete its construction. In 2009, the University, through its Pooled Debt Loan Program, issued \$4,078,517 to complete construction and fit-out of the 3rd floor of the Fontaine building. The purpose of this building is to expand the outpatient clinic services for the Medical Center.

The Medical Center began the Hospital Bed Expansion Project in fiscal year 2008. The Medical Center will add 72 beds over a period of three years. The expected cost of the project is \$80.2 million funded using bonds issued under the University of Virginia Pooled Debt Program in May 2008. The Bed Expansion will include 6 12-bed units on floors 3 through 8 of the Hospital. The Bed Expansion was completed in fiscal year 2013. As part of the Bed Expansion Project, the Elevator Banks and Fire Alarm system are to be updated at an expected cost of \$8.2 million, using bonds issued under the University of Virginia Pooled Debt program.

At the end of fiscal year 2011, the Medical Center broke ground for the Battle Building. Once completed, the Battle Building will contain the University of Virginia Children's Hospital and replace the current University of Virginia Outpatient Surgery Center. During fiscal year 2012, \$99 million debt was issued through the Pooled Debt Loan Program. The project is expected to cost \$141 million with expected completion in fiscal year 2014.

10. NET PATIENT SERVICE REVENUE

The Medical Center's patient service revenue is as follows for the year ended June 30, 2013:

Gross patient service revenue:	
Inpatient	
Routine	\$414,616,032
Ancillary	1,462,332,577
Outpatient services	
Ancillary	1,617,409,224
Clinics	18,187,228
Total gross patient revenue	<u>3,512,545,061</u>
Allowances for indigent care and contractual adjustments	<u>(2,346,855,436)</u>
Net patient service revenue	<u>\$1,165,689,625</u>

The Medical Center received \$107,474,097 in fiscal year 2013 from the Commonwealth's Department of Medical Assistance Services. These payments are included in net patient service revenue as an adjustment to allowances for indigent care and contractual adjustments.

Of the payment received for disproportionate share, relating to the care provided to indigent patients, \$21,500,000 was transferred to Health Services Foundation (currently known as the University Physicians Group) for related physician services and is included in the purchased services expense.

11. UNIVERSITY ALLOCATIONS

The School of Medicine faculty assists the Medical Center in its mission of providing healthcare and medical education. A survey is conducted annually to determine the value of this effort. An allocation is made on the Statement of Revenues, Expenses, and Changes in Net Assets to reflect the value of this effort as income. This allocation is offset in the operating expenses by an equal amount in purchased services. The amount of this allocation for fiscal year 2013 was \$22,739,768.

Likewise, the University provides the Medical Center with various general and administrative support services. An analysis is prepared annually to determine the cost of providing these services. The same type of allocation as above is made to the Statement of Revenues, Expenses, and Changes in Net Assets to reflect the difference between the direct charge to the Medical Center and the actual cost of these services. The amount of this allocation for fiscal year 2013 was \$ 2,649,488.

Although these allocations have no direct effect on operating income, they do affect the Medical Center's reimbursement from third-party payers by increasing allowable costs.

12. GAIN SHARING WITH THE SCHOOL OF MEDICINE

Beginning with fiscal year 2003, the Medical Center and the School of Medicine entered into a Memorandum of Understanding for gain sharing. The amount of gain sharing with the School of Medicine is a tiered arrangement based on the Medical Center's income in excess of minimum requirements established by the Board of Visitors. As a result of the Medical Center exceeding the minimum requirements established by the Board of Visitors, for fiscal year 2013, the gain sharing amount is \$16,109,518 less the School of Medicine's loss for its ownership in HOPE of \$219,247, resulting in a net gainshare amount of \$15,890,271.

13. COMMITMENTS

Future minimum lease payments by year and in the aggregate under operating leases are:

Year Ending June 30,	Operating Leases
2014	\$ 9,216,284
2015	6,978,298
2016	4,669,749
2017	4,085,405
2018	3,938,878
2019-2023	6,811,966
2024-2028	4,011,276
2029-2033	823,200
2034-2038	823,200
2039-2043	823,200
2044-2048	823,200
2049-2050	164,640
Total	<u>\$43,169,296</u>

The total rental expense for operating leases for the year ended June 30, 2013, was \$9,516,575.

The Medical Center was party to construction contracts and commitments for the year ended June 30, 2013 totaling \$342,091,468 of which \$336,165,927 was incurred as of June 30, 2013.

14. UNIVERSITY OF VIRGINIA PHYSICIANS GROUP

The University of Virginia Physicians Group (UPG), a nonprofit educational, scientific, and charitable organization, began operating with the approval of the Board of Visitors as of June 30, 1980, to assist the University in providing hospital and medical care services, medical education programs, and programs of public charity at the University. Prior to August 1, 2011, UPG was formerly known as the University of Virginia Health Services Foundation (HSF).

On August 1, 2000, management of 63 outpatient clinics operated by HSF since July 1, 1994, transferred to the Medical Center. At that time, the Medical Center filed for provider-based status with the federal government and became responsible for all costs associated with the operations of these provider-based clinics except for physicians' costs. As of the end of FY13, there were 82 outpatient clinics. On August 1, 2000, the Medical Center entered into leased employment agreements with HSF for limited personnel who remained HSF employees, but were performing Medical Center duties.

The Medical Center recorded \$24,611,824 as expense payable to the Physicians Group for the provision of supervisory and administrative services, \$27,409,997 for other services which includes expenses related to the Strategic Investment Pool, and \$4,325,418 for rental of space for the year ended June 30, 2013. In addition, the Medical Center recorded non-operating expenses of \$6,199,584 payable to the Physicians Group. Prior to FY08 this expense had been recorded as supervisory and administrative services.

The Medical Center recorded income from the Physicians Group of \$19,051,426 for clinic facility fees and other services, and \$114,911 for the rental of space for clinics for the year ended June 30, 2013.

15. RISK MANAGEMENT AND SELF-INSURANCE

The Medical Center is a participant in the Commonwealth's self-insurance program administered by the Department of Treasury, Division of Risk Management. Participation in this program provides the Medical Center with medical malpractice insurance on an occurrence basis with no aggregate limitation and with such limits of coverage equal to the statutory malpractice recovery limits as specified in Section 8.01-581.15 of the Code of Virginia. In the opinion of management, such coverage is adequate to provide for the ultimate liability, if any, which might result from the settlement of claims currently asserted against the Medical Center, as well as the potential liability for medical incidents of which the Medical Center has knowledge, but for which claims have not yet been asserted against the Medical Center. Accordingly, no provision is included in the financial statements for such potential liabilities.

Sufficient information has not been developed by the Medical Center to provide a reasonable basis for estimation of the potential liability for incurred medical incidents, which have not been reported to the Medical Center; however, in the opinion of management, any potential liability for unreported medical incidents is not expected to have a material effect on the financial position of the Medical Center.

The University sponsors a self-funded, comprehensive program of health care benefits. The program covers all employees of the University and the Medical Center. Fringe benefit expenses include estimates for claims that have been incurred, but not reported. Additional information

regarding the medical benefits program is available for the entire University only in the University's annual President's Report.

University employees are covered by a self-insured workers' compensation benefits program administered by the Commonwealth's Department of Human Resources. Information regarding this plan is available at the statewide level only in the Commonwealth's Comprehensive Annual Financial Report (CAFR).

Other risk management insurance plans are administered by the Commonwealth's Department of Treasury, Division of Risk Management. Risk management insurance includes property, boiler and machinery, crime, employee dishonesty bond, general (tort) liability, professional liability, aviation and watercraft, and automobile liability. Detailed information relating to this policy is available at the statewide level only in the CAFR.

The University is self-insured for the first \$100,000 of each property and boiler and machinery loss, and for the first \$20,000 of each vehicle physical damage loss. The University also maintains excess crime/employee dishonesty insurance and insurance for vehicle physical damage insurance on vehicles valued in excess of \$20,000.

16. RETIREMENT PLANS

Employees of the Medical Center are employees of the Commonwealth. Approximately 10 percent of all full-time classified salaried employees participate in a defined benefit pension plan administered by the Virginia Retirement System (VRS) for the Medical Center. Information relating to this plan is available at the statewide level only in the CAFR. The Commonwealth, not the Medical Center, has overall responsibility for contributions to this plan.

Substantially, all full-time faculty, including certain administrative staff and health care professionals, participate in Faculty Optional Retirement Plans. These are fixed-contribution plans where the retirement benefits received are based upon the employer and employee contributions (all of which are paid by the Medical Center), and the interest and dividends. Individual contracts issued under the plans for full-time faculty, including certain administrative staff, provide for full and immediate vesting of both the Medical Center's and the participant's contributions. Health Care Professional's employer contributions fully vest after one year of employment.

Total pension costs under the plans were \$13,524,315 for the year ended June 30, 2013. Contributions to the Optional Retirement Plans were calculated using base salaries of \$260,403,489 for the year ended June 30, 2013. The contribution percentage amounted to five percent for the year ended June 30, 2013.

17. POST-EMPLOYMENT BENEFITS OTHER THAN PENSION BENEFITS

The Commonwealth participates in the VRS-administered statewide group life insurance program that provides post-employment life insurance benefits to eligible retired and terminated employees. The Medical Center also provides retiree life insurance to certain retirees.

The Commonwealth provides healthcare credits against the monthly health insurance premiums of its retirees who have at least 15 years of state service and participate in the Commonwealth's health plan. Additionally, some employees receive healthcare credits for

participation in the University of Virginia Health Plan. Information related to these plans is available at the statewide level in the CAFR.

18. CONTINGENCIES

In October 2010, the Medical Center was informed that the federal government's Center for Medicare Services (CMS) issued notices to Virginia's Department of Medical Assistance Services (DMAS) disallowing \$34,089,804 in Disproportionate Share Hospital adjustment payments to DMAS for fiscal years 2006 through 2009. Based on the receipt of final settlements in the years in question, the Medical Center's portion of the loss would be \$17,921,094 for the federal portion and DMAS could elect to recoup the state portion of another \$17,921,094. CMS contends that DMAS inappropriately applied payments against subsequent year allotments. DMAS has appealed this disallowance and any repayment is deferred, pending the appeals resolution. The appeal has not progressed sufficiently to determine whether DMAS will be required to return any payments to the federal program and, if so, whether DMAS will require any providers, including the Medical Center, to return any payments to DMAS. The financial impact of the final resolution of this case on the Medical Center is not known at this time; therefore, no liability has been recorded in the financial statements.

INDEPENDENT AUDITOR'S REPORT

Report on Financial Statements

We have audited the accompanying financial statements of the **University of Virginia Medical Center**, a division of the University of Virginia, as of and for the year ended June 30, 2013, and the related notes to the financial statements, which collectively comprise the University of Virginia Medical Center's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall financial statement presentation.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a reasonable basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the University of Virginia Medical Center as of June 30, 2013, and the changes in its financial position and its cash flows for the year ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

Change in Accounting Principle

The University of Virginia Medical Center's accompanying basic financial statements for the year ended June 30, 2013, reflect the provisions of the Governmental Accounting Standards Board's (GASB) Statement No. 65, *Items Previously Reported as Assets and Liabilities*. The University of Virginia Medical Center chose to implement the requirements of GASB Statement No. 65 one year in advance of the required effective date. See Note 1.K. in the accompanying financial statements for an explanation of the standard and the impact of the implementation. Our opinion is not modified with respect to this matter.

Relationship to the University of Virginia

As discussed in Note 1, the basic financial statements of the University of Virginia Medical Center are intended to present the financial position, the changes in financial position and cash flows of only that portion of the business-type activities of the University of Virginia that is attributable to the transactions of the University of Virginia Medical Center. They do not purport to, and do not, present fairly the University of Virginia's overall financial position as of June 30, 2013, and the changes in its financial position and its cash flows, where applicable, for the year then ended in conformity with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Other Matters

Prior-Year Summarized Comparative Information

We have previously audited the University of Virginia Medical Center's 2012 financial statements, and we expressed an unmodified audit opinion on the respective financial statements in our report dated November 19, 2012. In our opinion, the summarized comparative information presented herein as of and for the year ended June 30, 2012, is consistent, in all material respects, with the audited financial statements from which it has been derived.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis on pages 1 through 10 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of the financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's

responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also issued our report dated November 1, 2013, on our consideration of the University of Virginia's internal control over financial reporting, which also includes the University of Virginia Medical Center, and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the University of Virginia Medical Center's internal control over financial reporting and compliance.
