The Honorable Mayor, Members of Town Council, and Citizens of the Town of Strasburg

RE: FY 2022-2023 Annual Comprehensive Financial Report (ACFR)

Letter of Transmittal

The Annual Comprehensive Financial Report of the Town of Strasburg, Virginia ("Strasburg") documents Strasburg's financial position and results of operations as of and for the fiscal year ended June 30, 2023. This report has been prepared in accordance with Generally Accepted Accounting Principles (GAAP), set forth by the Governmental Accounting Standards Board.

Management is responsible for both the accuracy of the data and the completeness and fairness of the report. To ensure reliability of the information, management has established a comprehensive framework of internal control. Internal controls protect Strasburg's assets from loss, theft and misuse and help ensure that information is reliable for the preparation of this report. Because the cost of the internal controls should not outweigh their benefits, Strasburg's controls have been designed to provide reasonable, rather than absolute assurance that the financial statements are free of any material misstatements. On behalf of the management team, to the best of our knowledge and belief, this financial report is complete, accurate, and reliable in all material respects. All disclosures necessary to enable the reader to gain an understanding of the Town's financial activities have been included.

Independent certified public accountants at the firm of Robinson, Farmer, Cox Associates, Certified Public Accountants, audited the financial statements and concluded in an unmodified (commonly referred to as "clean") opinion that the financial statements present fairly in conformity with GAAP, in all material respects, Strasburg's financial position and changes in financial position. The goal for the audit is to provide reasonable assurance that the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and evaluating the overall financial statement presentation. This examination was conducted using guidelines set forth by Government Auditing Standards Board and the Specification for Audits of Counties, Cities and Towns, issued by the Auditor of Public Accounts. The independent auditor's report is presented as the first component of the financial section of this report.

Generally accepted accounting principles require that management provide a narrative introduction, overview, and analysis to accompany the basis financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The Town of Strasburg's MD&A can be found immediately following the report of the independent auditors.

Profile of the Town

Strasburg is located in north-central Shenandoah County approximately ten (10) miles west of the Town of Front Royal, seventy –eight (78) miles west of Washington, D.C., eighteen (18) miles south of the City of Winchester, and fifteen (15) miles east of the Virginia/West Virginia border. The Town has two interstate exits along I-81 (exits 296 and 298) and is located about four (4) miles from the I-66 and I-81 interchange. US Route 11 and State Route 55/US Route 48 intersect in the center of Town. The Town covers 2,274 acres, or roughly three and half (3.5) square miles, and has a population estimated at six thousand seven hundred sixteen 6,716).

In 1921, the Town annexed an area of the County, bringing its land area to a total of 448 acres, where it remained until the annexation effective Tuesday, January 1st, 1985, that added an additional 578 acres, for a total of 1,026 acres. As of Saturday, January 1st, 2000, Strasburg annexed the land surrounding Route 11 to Interstate 81. On Wednesday, January 1st, 2014, the Town annexed its 366-acre industrial park, in addition to more acreage to the east of the properties fronting on the east side of Route 11. Strasburg continues to grow and flourish with its rich history and community pride. The Town of Strasburg will continue to promote itself as one of the growth centers for Shenandoah County, while simultaneously retaining its small-town charm and character.

Overview of the Town Government

The Town of Strasburg was charted in 1761 and incorporated in 1922. It is well known for its pottery, antiques, American Civil War history, and breathtaking views of the surrounding natural environment. The Town is currently governed under a Council/Manager form of government. The Town Council, in its role as a legislative body, adopts all ordinances and resolutions, formulates, and adopts general policies, adopts the budget, and sets tax rates.

The Town Council is comprised of eight (8) members, who are elected at large to serve four-year terms. Elections for four (4) Council seats are held every two (2) years. The mayor, who serves a four (4) year term, presides over the Town Council, but votes only to break a tie. Elections for the Mayor and Town Council seats are conducted in November with the elected officials being seated on January 1st.

The Town Manager is appointed by the Town Council as the chief executive officer of the Town and is responsible to the Town Council and citizens for the proper administration of the Town government. Council also appoints the Treasurer, Clerk of Council, Town Attorney, and Chief of Police. Department head positions are hired and supervised by the Town Manager.

Budgetary Controls

The Town government exercises budgetary control over all spending, in order to ensure compliance with all legal provisions inherent in the appropriated budget approved by the Town Council. Additionally, Council and staff have collaboratively developed various fiscal policies which ensure compliance with the Virginia Public Procurement Act, safeguard fund balance amounts, limit the quantity of capital projects, etc. As demonstrated by the statements and schedules included in the financial section of the report, the Town government continues to meet its responsibilities for sound fiscal management.

The Council is required to adopt an initial budget for the fiscal year no later than June 30 preceding the beginning of the fiscal year on July 1. This annual budget serves as the foundation for the Town of Strasburg's financial planning and control. The budget is prepared by funds, function (e.g., general government administration, public safety, public works, health, and welfare), and department. The legal level of budgetary control (i.e., the level at which expenditures may not legally exceed appropriations) is at the department level. Department heads may transfer resources within a department as they see fit. Transfers between departments, however, need special approval from the Council.

Economic Outlook

Development and population growth have bene the main drivers n Strasburg's revenue growth for many years. An analysis of the development process and the volume of activity provides insight to current tax base growth. Development "in the pipeline" demonstrates potential for continued growth in the next few years because the process for developers from concept to permitted occupancy and full tax value can take several years or more.

The Town's General Fund revenues continue to remain stable due to proper fiscal management in years past. Barring any unforeseen influences on the economy, the General Fund is well positioned to handle future growth in the Town. The Town's Enterprise Funds have been steadily climbing towards fiscal sustainability with preprogrammed increases coming to an end.

With the conclusion of the water and sewer rate study, it is clear the inflationary increases paired with a shift in covering fixed costs with fixed fees, rather than larger consumption amounts, will allow for the continued sustainability of the Enterprise Funds.

Major Initiatives in FY 22/23

The Town continued implementation of Strategic Planning activities and the completion of existing grant programs in FY 22/23, while dealing with supply chain issues.

- Northern Shenandoah Business Park Phase 1 Improvements Project design is at 100% and remains in the ROW acquisition phase. Ongoing right of way negotiations, which should be complete in late 2023 early 2024. Bidding would follow and construction could extend into late 2024.
- AMI/AMR Water Meter Replacement Approved by Council for FY21/22, contract executed in July 2022; with implementation beginning in Spring 2023 and concluding in early 2024. Town Council approved a budget amendment to utilize American Rescue Plan Act (ARPA) funds for this project.
- USDA Sanitary Sewer Upgrade Engineering design underway. Bidding should occur in early 2024.

Awards and Acknowledgements

The Town of Strasburg continues to operate with the intent and achievement of a stable financial position through effective management of financial controls and operations paired with sound accounting and reporting practices. Gratitude is expressed to the Mayor and Town Council, who continue to show support for programs and practices as well as the management of Town finances, and their exceptional financial stewardship.

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Town of Strasburg for its comprehensive annual financial report (CAFR) for the fiscal year ended June 30, 2022. This was the 4th consecutive year that the Town of Strasburg has achieved this prestigious award. In order to be awarded a Certificate of Achievement, the Town of Strasburg had to publish an easily readable and efficiently organized CAFR that satisfied both generally accepted accounting principles and applicable program requirements. A Certificate of Achievement for Excellence in Financial Reporting is valid for a period of one year only. However, we believe that our current CAFR continues to meet the Certificate of Achievement for Excellence in Financial Reporting Program's requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

The preparation of this report would not have been possible without the skill, effort, and dedication of the entire staff of the Finance Department. We want to thank all Town of Strasburg departments for their assistance in providing the data necessary to prepare this report. Credit is also due to the Mayor and the Council for their unfailing support for maintaining the highest standards of professionalism in the management of the Town of Strasburg's finances.

Respectfully submitted,

Wouly Cogele

INDEPENDENT AUDITORS' REPORT

To the Honorable Members of the Town Council Town of Strasburg, Virginia

Report on the Audit of the Financial Statements

Opinions

We have audited the accompanying financial statements of the governmental activities, the business-type activities, and each major fund of the Town of Strasburg, Virginia, as of and for the year ended June 30, 2023, and the related notes to the financial statements, which collectively comprise the Town's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the governmental activities, the business type activities, and each major fund of the Town of Strasburg, Virginia, as of and for the year ended June 30, 2023, and the respective changes in financial position, and where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the *Specifications for Audits of Counties, Cities, and Towns*, issued by the Auditor of Public Accounts of the Commonwealth of Virginia. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Town of Strasburg, Virginia, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Town of Strasburg, Virginia's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards, *Government Auditing Standards*, and the *Specifications for Audits of Counties, Cities, and Towns* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, Government Auditing Standards, and the Specifications for Audits of Counties, Cities, and Towns, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, and design and perform audit procedures responsive to those risks. Such procedures
 include examining, on a test basis, evidence regarding the amounts and disclosures in the financial
 statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of Town of Strasburg, Virginia's internal control. Accordingly, no such opinion is
 expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that
 raise substantial doubt about Town of Strasburg, Virginia's ability to continue as a going concern for a
 reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, budgetary comparison information, and schedules related to pension and OPEB funding as listed in the table of contents to be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance. The budgetary comparison information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Supplementary Information

Our audit was conducted for the purpose of performing opinions on the financial statements that collectively comprise the Town of Strasburg, Virginia's basic financial statements. The accompanying schedule of expenditures of federal awards, as required by Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of expenditures of federal awards is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the introductory and statistical sections but does not include the basic financial statements and our auditors' report thereon. Our opinions on the basic financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated November 30, 2023, on our consideration of the Town of Strasburg, Virginia's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Town of Strasburg, Virginia's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Town of Strasburg, Virginia's internal control over financial reporting and compliance.

Staunton, Virginia

November 30, 2023

Robinson, Farmer, Cax Associates

MANAGEMENT'S DISCUSSION AND ANALYSIS

The Management Discussion and Analysis (MD&A) offers an overview and analysis of the financial activities of the Town of Strasburg for the fiscal year ended June 30, 2023. The information presented here should be considered in conjunction with additional information provided in the Comprehensive Annual Financial Report.

FINANCIAL HIGHLIGHTS

Government-wide Financial Statements

The assets and deferred outflows of resources of the Town exceeded its liabilities and deferred inflows of resources at June 30, 2023 by \$41,517,261 which equals the total net position of the Town. Of this amount, \$9,670,228 is unrestricted and may be used to meet the Town's future obligations. Of the \$9,670,228 unrestricted net position, approximately \$3,864,106 is related to governmental activities and is undesignated and available for future General Fund expenditures. The \$5,806,122 remaining balance of unrestricted net position is related to business-type activities, which includes the Town's enterprise fund.

The Town's total long-term debt decreased by \$410,955 from \$28,041,728 as of June 30, 2023, to \$27,630,773 as of June 30, 2023. The decrease was due to paying down debt and completing capital projects.

Fund Financial Statements

The fund financial statements provide more detailed information about the Town's most significant funds.

The Town's governmental funds reported revenues and other financing sources a surplus in the amount of \$225,469 for the fiscal year; with an ending fund balance of \$6,912,760 of that amount \$79,217 is restricted for proffers, \$111,589 is restricted for asset forfeiture for the Police Department, \$171,448 is restricted for debt service, and \$2,421,645 is restricted for unspent bond proceeds.

The Town's proprietary funds reported an increase in the net position of \$1,112,494. This is primarily due to capital grants and contributions (availability fees).

OVERVIEW OF THE FINANCIAL STATEMENTS

The Management Discussion and Analysis serves as an introduction to the Town's basic financial statements which are the government-wide financial statements, fund financial statements, and notes to the financial statements.

The Town's financial statements present two kinds of statements, each with a different view of the Town's finances. The government-wide financial statements provide both long and short-term information about the Town's overall financial status. The fund financial statements focus on individual parts of the Town's government, reporting the Town's operations in more detail than the government-wide statements. The basic financial statements also include notes to explain information in the financial statements and provide more detailed data. The statements and notes are followed by required supplementary information that contains more detailed data.

Government-wide Financial Statements

The government-wide financial statements report information about the Town uses accounting methods similar to those used by private-sector businesses. In addition, they report the Town's net position and how they have changed during the fiscal year.

The Statement of Net Position and the Statement of Activities report the Town's net position and changes in assets. One can think of the Town's net position – the difference between assets and liabilities – as one way to measure the Town's financial position.

<u>Governmental activities</u> – Most of the Town's basic services are reported here; general government, police, public works, and recreation. Property taxes, and other taxes, finance most of these activities.

<u>Business-type activities</u> – The financial activity of the water, sewer and trash are reported here. The Town charges a fee to customers to help cover all or most of the cost of services provided by these activities.

FUND FINANCIAL STATEMENTS

The fund financial statements provide more detailed information about the Town's most significant funds. Funds are accounting devices that the Town uses to keep track of specific sources of funding and spending for purposes. The Town uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The Town's funds can be divided into two categories: governmental funds and proprietary funds.

Governmental Funds

Governmental funds are used to report most of the Town's basic services. The funds focus on (1) how cash and other financial assets that can be readily converted to cash flow in and out and (2) the balances remaining at year-end that is available for spending. The governmental funds financial statements provide a detailed short-term view that shows whether there are more or fewer financial resources that can be spent in the near future to finance the Town's programs. Because this information does not encompass the additional long-term focus of the government-wide financial statements, additional information is provided with the fund financial statements to explain the relationship (or differences). The General Fund is the main operating account of the Town and consequently, the largest of the governmental funds. All other governmental funds, which include special revenue funds, debt service funds, and capital project funds, are collectively referred to as non-major governmental funds.

Proprietary Funds

Proprietary funds, which consist of enterprise funds and internal service funds, are used to account for operations that are financed and operated in a manner similar to private business enterprises in which costs are recovered primarily through user charges. Proprietary fund financial statements, like the government-wide financial statements, provide both long and short-term financial information. The Town maintains three proprietary funds. The Town uses enterprise funds to account for its water, sewer and trash.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

The Town's total assets, liabilities and net position on a government-wide basis are summarized below:

Summary of Statement of Net Position as of June 30, 2023 (in thousands)

	Governme	Activities		Business-	Тур	e Activities	Total				
	2023		2022	-	2023		2022		2023	_	2022
Current and other assets	\$ 15,227	\$	12,858	\$	6,829	\$	6,628	\$	22,056	\$	19,486
Capital assets	11,385		10,159		43,774		44,027		55,159		54,186
Total Assets	\$ 26,612	\$	23,017	\$	50,603	\$	50,655	\$	77,215	\$	73,672
Deferred outflows of resources	\$ 429	\$	523	\$	372	\$	463	\$_	801	\$_	986
Long-term debt											
outstanding	\$ 3,596	\$	3,572	\$	22,646	\$	24,470	\$	26,242	\$	28,042
Other liabilities	7,202		4,733		1,431		296		8,633		5,029
Total Liabilities	\$ 10,798	\$	8,305	\$	24,077	\$	24,766	\$	34,875	\$	33,071
Deferred inflows of resources	\$ 1,380	\$	1,967	\$	244	\$_	810	\$_	1,624	\$_	2,777
Net Position											
Net investment in capital assets	\$ 10,636	\$	9,146	\$	20,599	\$	19,770	\$	31,235	\$	28,916
Restricted asset forfeitures	111		97		-		-		111		97
Restricted for other purposes	252		388		249		377		501		765
Unrestricted	3,864		3,637		5,806		5,395		9,670		9,032
Total net position	\$ 14,863	\$	13,268	\$	26,654	\$	25,542	\$	41,517	\$	38,810

The Town's combined net position increased by 6.97% from \$38,810,324 at June 30, 2022 to \$41,517,261 at June 30, 2023 primarily due to an increase in capital assets in business type activities. The majority (72 percent) of the Town's net position of governmental activities is invested in capital assets (streets, drainage, constructions in progress, buildings, equipment, etc.) The capital assets are not available for future expenditures since they will not be sold. The Town has a strong financial position with 26 percent of net position in governmental activities unrestricted and available for providing services to the citizens of the Town of Strasburg.

The net position of the Town's business-type activities is \$26,654,772. The majority (77 percent) of the net position in the business-type activities is invested in capital assets. The Town uses the unrestricted net position (22 percent) to upgrade water and sewer lines, maintain the water treatment plant and wastewater treatment plant.

In summary, the Town of Strasburg's assets and deferred outflows of resources exceeded liabilities and deferred inflows of resources by \$41,517,261 at the close of the most recent fiscal year.

Statement of Activities

The Town's total revenues and expenses for governmental and business-type activities are reflected in the following chart:

		Governme Activitie			ness tiviti	s-type ies	Total

Governmental Activities

Revenues

Revenues from governmental activities totaled \$7,899,332. General property taxes and other taxes are the largest component of revenue (63 percent). General property tax revenues were \$2,343,684, an increase of 10.86% from June 30, 2022. The Town received reimbursement of \$138,898 from the Commonwealth of Virginia for taxes on individual automobiles.

Other local taxes and fees including revenue from local sales, franchise tax, business licenses, and meals taxes were \$2,575,863 an increase of 9.84 percent from June 30, 2023.

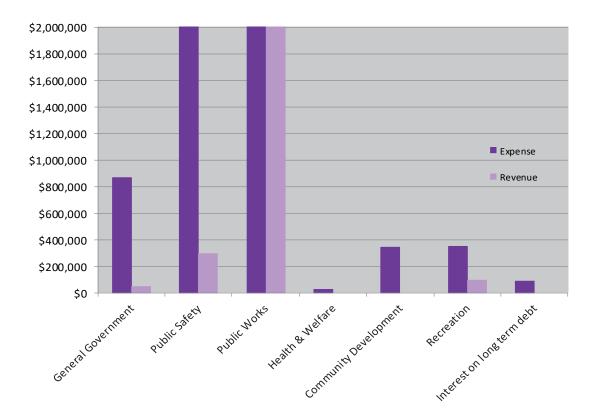

Revenue by Source-Governmental Activities

Expenses

Expenses for governmental activities totaled \$6,194,999, which was an increase of \$1,055,355 from the prior fiscal year. This increase is due to the purchase of 115 W. King Street. The Public Safety and Public Works departments account for 60 percent of the total expenses for governmental activities.

Program Expenses and Program Revenues – Governmental Activities

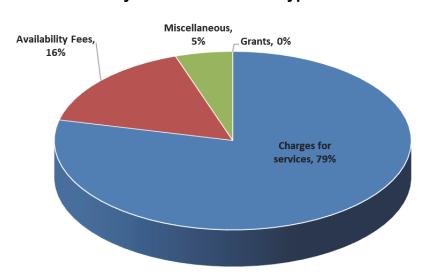

Business-type Activities

The Town's business-type activities are comprised of enterprise funds for water, sewer, and trash. For the Town of Strasburg's business-type activities, the results for the current fiscal year were a net position increase to reach an ending balance of \$26,654,772. The total increase in net position for business-type activities (water, sewer & trash funds) was \$1,112,494 from the prior fiscal year. The increase, in large part, is attributable to capital contributions, construction grants and tap/availability fees in utility revenues.

Revenues

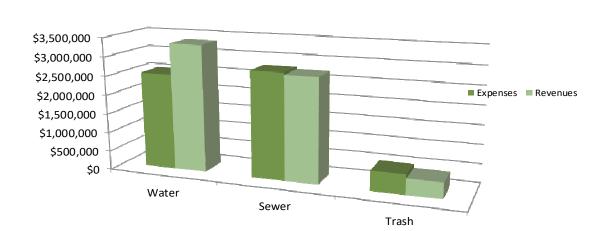

Revenue for all business-type activities totaled \$6,829,266 which is a 16.67 percent increase over 2022.

Revenues by Source - Business-type Activities

Expenses

Expenses totaled \$5,826,662 which was an increase of \$369,004 over 2022. The decrease is attributable to repairs and maintenance for water infrastructure being completed in the prior year.

Expenses and Program Revenues – Business-type Activities

The Town's Proprietary Funds provide the same type of information found in the government-wide financial statements for business-type activities but in more detail.

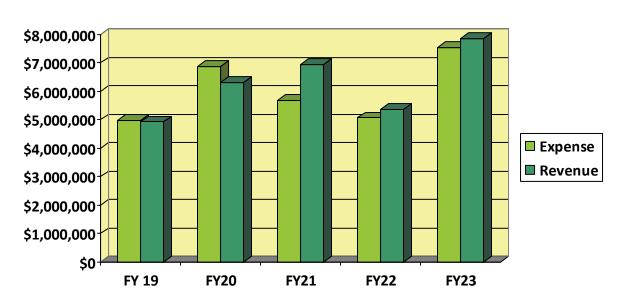

FUND FINANCIAL ANALYSIS

Governmental Funds

Governmental Funds include the General Fund of which the unreserved fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

General Fund

The chief operating fund of the Town is the General Fund. At the end of 2023, the unassigned fund balance was \$3,845,990 which reflects a decrease of \$128,029 over 2022. The graph below shows General Fund summary financial information for the past five years.

Five Year General Fund Financial Summary

General Fund Budgetary Highlights

Actual revenue exceeded expenditures by \$225,469 in the General Fund, 2023 actual revenues were \$2,494,404 more than fiscal year 2022 revenues. The increase was largely due to receiving grant monies and a reduction in capital outlay expenditures in the prior fiscal year.

Proprietary Funds

The Town's proprietary funds are comprised of water, sewer and trash. The Town accounts for these three proprietary accounts as enterprise funds.

Water Fund

The Water Fund ended 2023 with unrestricted net position of \$4,630,404 which can be used for future fund expenses.

Sewer Fund

The Sewer Fund ended 2023 with unrestricted net position of \$1,163,697 which can be used for future fund expenses.

Trash Fund The Trash Fund ended 2023 with unrestricted net position of \$12,021 which can be used for future fund expenses.

CAPITAL ASSETS AND DEBT ADMINISTRATION

Capital Assets

2023 primary government investment in capital assets for its governmental and business-type activities was \$55,158,627 net of depreciation/amortization (see chart below).

Capital Assets (net of depreciation/amortization in thousands)

		Gove Act	nental ties	Business-type Activities					Total Primary Government					
	_	2023	_	2022		2023		2022		2023		2022		
Land and improvements	\$	1,017	\$	639	\$	405	\$	405	\$	1,422	\$	1,044

Total	\$_	11,385	\$_	10,159	\$_	43,773	_\$_	44,027	\$_	55,158	_\$_	54,186		

Total Capital Assets at June 30, 2023 were \$55,158,627 compared to \$54,186,168 at June 30, 2022, resulting in an increase of \$972,459 in the total Capital Assets. Much of this increase is due to the purchase of 115 W. King Street.

Water and sewer lines account for most of the capital assets in the Business-type activity, with streets and roadways in the Government-type activity.

Additional information on the Town's capital assets may be found in the notes to financial statements, Note 7 – Capital Assets.

Long-term Debt

The Town's total outstanding debt at the end of 2023 was \$27,630,773 with \$23,778,857 in business-type activities and \$3,851,916 in governmental activities. Notes payable, lease liabilities, vacation pay and net OPEB liabilities are included in outstanding debt.

Additional information on the Town's long-term obligations can be found in the notes to the financial statements, Note 8-Long Term Obligations.

ECONOMIC FACTORS

Currently, the town has several developments that are being phased in over the next few years. There continues to be interest in available land in the Northern Shenandoah Business Park, as well as properties in the downtown area. Staff continues to support our local businesses through events, promotions and other resources.

The Town continues to work towards the extension of Borden Mowery Drive, which is scheduled to begin later this fiscal year.

CONTACT INFORMATION

This financial report is designed to provide a general overview of the Town's finances for those with an interest in the Town's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Director of Finance or Town Manager, Town of Strasburg, PO Box 351, Strasburg, VA 22657.

Fund balance, end of year	\$	6,912,760

Amounts reported for governmental activities in the statement of activities are different because:	
Net change in fund balances - total governmental funds	225,469
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation/amortization expense. This is the amount by which capital outlays exceeded depreciation in the current period.	
Capital outlays \$ 1,760,337	
Depreciation/amortization expense (534,392)	1,225,945
Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds. The change in unavailable property taxes is reported as revenues in the governmental funds.	
Property taxes	32,424
The issuance of long-term debt (e.g. bonds, leases) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net position. Also, governmental funds report the effect of premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities. This amount is the net effect of these differences in the treatment of long-term debt and related items.	
Amortization of premium on bond issue 18,329	460 204
Principal repayments 151,052 Some expenses reported in the statement of activities do not require the use of current financial resources and, therefore are not reported as expenditures in governmental funds. Change in accrued interest \$ 1,326 Change in compensated absences (4,342) Change in pension related items (64,605) Change in OPEB related items 8,845	169,381 (58,776)_

Notes to Financial Statements JUNE 30, 2023

NOTE 1 — SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

The Town of Strasburg, Virginia, (the "Town") was chartered as a Town in 1761. The Town is governed by a mayor and an eight-member Town Council, who are elected at large for staggered four-year terms.

A. Financial Reporting Entity

The Town of Strasburg, Virginia (the Town) is a municipal corporation governed by an elected mayor and eight-member Council. The accompanying financial statements present the government and its component units, entities for which the government is considered to be financially accountable. Blended component units, although legally separate entities, are, in substance, part of the government's operations. Each discretely presented component unit is reported in a separate column in the government-wide financial statements (see note below for description) to emphasize that it is legally separate from the government.

Blended component units – There were no blended component units for the Town for the year ended June 30, 2023.

Discretely Presented Component Units – There were no discretely presented component units for the Town for the year ended June 30, 2023.

B. Government-wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units. For the most part, the effect of interfund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business—type activities*, which rely to a significant extent on fees and charges for support. Likewise, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable.

Statement of Net Position - The Statement of Net Position is designed to display financial position of the primary government (government and business-type activities). Governments will report all capital assets in the government-wide Statement of Net Position and will report depreciation expense - the cost of "using up" capital assets - in the Statement of Activities. The net position of a government will be broken down into three categories - 1) net investment in capital assets; 2) restricted; and 3) unrestricted.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function or segment, are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized when they have been earned and they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service principal and interest expenditures on general long-term debt, including lease and subscription liabilities, as well as expenditures related to compensated absences, claims and judgments, postemployment benefits, and environmental obligations are based on specific accounting rules applicable to each, generally are recorded only when payment is due. General capital asset acquisitions, including entering into contracts giving the government the right-to-use lease and subscription assets, are reported as expenditures in the governmental funds. Issuance of long-term debt and financing through leases and subscriptions are reported as other financing sources.

Property taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Accordingly, real and personal property taxes are recorded as revenues and receivables when billed, net of allowances for uncollectible amounts. Property taxes not collected within 60 days after year-end are reflected as unavailable or deferred inflows. Sales, which are collected by the state and subsequently remitted to the Town, are recognized as revenues and receivables upon collection by the state or utility, which is generally in the month preceding receipt by the Town. Utility taxes are collected by the utilities and remitted directly to the Town.

Licenses, permits, fines and rents are recorded as revenues when received. Intergovernmental revenues, consisting primarily of federal, state and other grants for the purpose of funding specific expenditures, are recognized when earned or at the time of the specific expenditure. Revenues from general purpose grants are recognized in the period to which the grant applies. All other revenue items are considered to be measurable and available only when cash is received by the government.

The government reports the following major governmental fund:

The *general fund* is the Town's primary operating fund. It accounts for and reports all financial resources of the general government, except those required to be accounted for in another fund.

The government reports the following major proprietary funds:

The water and sewer funds provide maintenance to the water and sewer lines and pump stations and derive the majority of their revenues through user charges and fees.

The *trash fund* provides trash collection and landfill disposal to the Town and derives the majority of its revenue through user charges.

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation (continued)

As a general rule the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are other charges between the government's water and sewer function and various other functions of the government. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as *program revenues* include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes.

Proprietary funds distinguish *operating* revenues and expenses from *nonoperating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the water and sewer enterprise fund are charges to customers for sales and services. Operating expenses for enterprise funds and internal service funds include the cost of sales and services, administrative expense, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

D. Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance

1. Cash and Cash Equivalents

The Town's cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition. For purposes of the statement of cash flows, the government's proprietary funds consider their demand deposits and all highly liquid investments with an original maturity of three months or less when purchased to be cash equivalents.

Investments

Investments with a maturity of less than one year when purchased, non-negotiable certificates of deposit, other nonparticipating investments and external investment pools are stated at cost or amortized cost. Investments with a maturity greater than one year when purchased are stated at fair value. Fair value is the price that would be received to sell an investment in an orderly transaction at year end.

2. Receivables and Payables

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "due to/from other funds" (i.e., the current portion of interfund loans). All other outstanding balances between funds are reported as "advances to/from other funds" (i.e. the noncurrent portion of interfund loans.) Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds, as reported in the fund financial statements, are offset by a nonspendable fund balance in applicable governmental funds to indicate that they are not available for appropriation and are not expendable available financial resources.

D. Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance (continued)

3. Property Taxes

The Town collects real property taxes semi-annually and personal property taxes annually. Real property and personal property is assessed by the County of Shenandoah Commissioner of Revenue annually on property owned on January 1st and July 1st for real estate and January 1st for personal property. Town Council adopts tax rates in April of each year as a part of the budget process. Real and personal property taxes are levied as of January 1st and July 1st and are due on June 5th and December 5th of each year. Penalties accrue on the unpaid balances at this date. Interest is charged on unpaid balances beginning December 6th and June 6th. Unpaid real property taxes constitute a lien against the property. The Town bills and collects its own property taxes.

4. Allowance for Uncollectible Accounts

The Town calculates its allowance for uncollectible accounts using historical collection data and, in certain cases, specific account analysis. The allowance for uncollectible taxes amounted to approximately \$29,167 at June 30, 2023 and the allowance for uncollectible water, sewer and trash billings amounted to approximately \$13,858 at June 30, 2023.

5. Inventory

Inventory is valued at cost, using the *first in, first out* method. The cost is recorded as an expense at the time the individual inventory items are consumed, rather than when purchased.

6. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

7. Capital Assets

Capital assets are tangible and intangible assets, which include property, plant, equipment, lease, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), and are reported in the applicable governmental or business-type activities column in the government-wide financial statements. Capital assets, except for infrastructure assets, are defined by the Town as assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of two years.

As the Town constructs or acquires capital assets each period, including infrastructure assets, they are capitalized and reported at historical cost (except for intangible right-to-use lease assets (lease assets), the measurement of which is discussed in more detail below). The reported value excludes normal maintenance and repairs, which are amounts spent in relation to capital assets that do not increase the asset's capacity or efficiency or increases its estimated useful life.

D. Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance (continued)

7. Capital Assets (continued)

Donated capital assets are recorded at acquisition value at the date of donation. Acquisition value is the price that would be paid to acquire an asset with equivalent service potential on the date of the donation. Intangible assets follow the same capitalization policies as tangible capital assets and are reported with tangible assets in the appropriate capital asset class.

Land and construction in progress are not depreciated. The other tangible and intangible property, plant equipment, lease assets, and infrastructure of the Town, are depreciated/amortized using the straight-line method over the following estimated useful lives:

Water plant	50 years
Sewer plant	30-50 years
Reservoir and storage	10-20 years
Lines and meters	10-50 years
Buildings and improvements	20 years
Maintenance building and equipment	30 years
Furniture, equipment and vehicles	5-50 years
Lease equipment	5 years

8. Compensated Absences

It is the Town's policy to permit employees to accumulate earned but unused vacation and sick pay benefits. There is no liability for unpaid accumulated sick leave since the government does not have a policy to pay any amounts when employees separate from service with the government. All vacation pay is accrued when incurred in the government-wide and proprietary fund financial statements. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements.

9. Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Town's Retirement Plan and the additions to/deductions from the Town's Retirement Plan's fiduciary net position have been determined on the same basis as they were reported by the Virginia Retirement System (VRS). For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

10. Other Postemployment Benefits (OPEB)

For purposes of measuring the net VRS related OPEB liabilities, deferred outflows of resources and deferred inflows of resources related to the OPEB, and OPEB expense, information about the fiduciary net position of the VRS GLI, HIC, and VLDP OPEB Plans and the additions to/deductions from the VRS OPEB Plans' fiduciary net position have been determined on the same basis as they were reported by VRS. In addition, benefit payments are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

D. Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance (continued)

11. Long-term Obligations

In the government-wide financial statements, long-term debt other long-term obligations are reported as liabilities in the applicable governmental activities or business-type activities columns in the statement of net position. Bonds payable are reported net of the applicable bond premium or discount.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, during the current period. The face amount of debt issued and premiums on issuance are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds, are reported as debt service expenditures.

12. Fund Balance

The following classifications of fund balance describe the relative strength of the spending constraints placed on the purposes for which resources can be used:

- Nonspendable fund balance amounts that are not in spendable form (such as inventory and prepaids) or are required to be maintained intact (corpus of a permanent fund);
- Restricted fund balance amounts that can be spent only for the specific purposes stipulated by external resource providers such as grantors or enabling federal, state, or local legislation. Restrictions may be changed or lifted only with the consent of the resource providers;
- Committed fund balance amounts that can be used only for the specific purposes determined by the adoption of an ordinance committing fund balance for a specified purpose by the Town Council prior to the end of the fiscal year. Once adopted, the limitation imposed by the ordinance remains in place until the resources have been spent for the specified purpose or the Council adopts another ordinance to remove or revise the limitation;
- Assigned fund balance amounts a government intends to use for a specific purpose but do not meet the criteria to be classified as committed; intent can be expressed by the governing body or by an official or body to which the governing body delegates the authority. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment;
- Unassigned fund balance amounts that are available for any purpose; positive amounts are only reported in the general fund. Additionally, any deficit fund balance within the other governmental fund types is reported as unassigned.

When fund balance resources are available for a specific purpose in more than one classification, it is the Town's policy to use the most restrictive funds first in the following order: restricted, committed, assigned, and unassigned as they are needed.

D. Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance (continued)

12. Fund Balance (continued)

Town Council establishes (and modifies or rescinds) fund balance commitments by passage of an ordinance. This is typically done through adoption and amendment of the budget. A fund balance commitment is further indicated in the budget document as a designation or commitment of the fund (such as for special incentives). Assigned fund balance is established by Town Council through adoption or amendment of the budget as intended for specific purpose (such as the purchase of capital assets, construction, debt service, or for other purposes).

In the general fund, the Town strives to maintain an unassigned fund balance to be used to fund unanticipated emergencies of \$1.5 million or 30% of the total general fund operating expenditures.

13. Prepaid items

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements. The cost of prepaid items is recorded as expenditures/expenses when consumed rather than when purchased.

14. Net Position

For government-wide reporting as well as in proprietary funds, the difference between assets and deferred outflows of resources less liabilities and deferred inflows of resources is called net position. Net position is comprised of three components: net investment in capital assets, restricted, and unrestricted.

- Net investment in capital assets consists of capital assets, net of accumulated depreciation/amortization and reduced by outstanding balances of bonds, notes, and other debt that are attributable to the acquisition, construction, or improvement of those assets. Deferred outflows of resources and deferred inflows of resources that are attributable to the acquisition, construction, or improvement of those assets or related debt are included in this component of net position.
- Restricted net position consists of restricted assets reduced by liabilities and deferred inflows of resources related to those assets. Assets are reported as restricted when constraints are placed on asset use either by external parties or by law through constitutional provision or enabling legislation.
- Unrestricted net position is the net amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that does not meet the definition of the two preceding categories.

Sometimes the Town will fund outlays for a particular purpose from both restricted (e.g. restricted bond and grant proceeds) and unrestricted resources, in order to calculate the amounts to report as restricted net position and unrestricted net position in the financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the Town's policy to consider restricted net position to have been depleted before unrestricted net position is applied.

D. Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance (continued)

15. Deferred Outflows/Inflows of Resources

In addition to assets, the statement of financial position includes a separate section for deferred outflows of resources. Deferred outflows of resources represent a consumption of net assets that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The Town has one item that qualifies for reporting in this category. It is comprised of certain items related to pension and OPEB. For more detailed information on these items, reference the related notes.

In addition to liabilities, the statement of financial position includes a separate section for deferred inflows of resources. Deferred inflows of resources represent an acquisition of net asset that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The Town has multiple items that qualify for reporting in this category. Under a modified accrual basis of accounting, unavailable revenue representing property taxes receivable is reported in the governmental funds balance sheet. This amount is comprised of uncollected property taxes due prior to June 30, 2nd half installments levied during the fiscal year but due after June 30th, and amounts prepaid on the 2nd half installments and is deferred and recognized as an inflow of resources in the period that the amount becomes available. Under the accrual basis, 2nd half installments levied during the fiscal year but due after June 30th and amounts prepaid on the 2nd half installments are reported as deferred inflows of resources. In addition, certain items related to pension, OPEB, and leases are reported as deferred inflows of resources. For more detailed information on these items, reference the related notes.

16. Leases

The Town leases various assets requiring recognition. A lease is a contract that conveys control for the right to use another entity's nonfinancial asset. Lease recognition does not apply to short-term leases, contracts that transfer ownership, leases of assets that are investments, or certain regulated leases.

Lessee

The Town recognizes lease liabilities and intangible right-to-use lease assets (lease assets) with an initial value of \$5,000, individually or in the aggregate in the government-wide financial statements. At the commencement of the lease, the lease liability is measured at the present value of payments expected to be made during the lease term (less any lease incentives). The lease liability is reduced by the principal portion of payments made. The lease asset is measured at the initial amount of the lease liability, plus any payments made to the lessor at or before the commencement of the lease term and certain direct costs. The lease asset is amortized over the shorter of the lease term or the useful life of the underlying asset.

Notes to Financial Statements JUNE 30, 2023 (CONTINUED)

NOTE 1 — SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES: (CONTINUED)

D. Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance (continued)

16. Leases (continued)

Lessor

The Town recognizes leases receivable and deferred inflows of resources in the business-type financial statements. At commencement of the lease, the lease receivable is measured at the present value of lease payments expected to be received during the lease term, reduced by any provision for estimated uncollectible amounts. Subsequently, the lease receivable is reduced by the principal portion of lease payments received. The deferred inflow of resources is measured at the initial amount of the lease receivable, less lease payments received from the lessee at or before the commencement of the lease term (less any lease incentives).

Key Estimates and Judgments

Lease accounting includes estimates and judgments for determining the (1) rate used to discount the expected lease payments to present value, (2) lease term, and (3) lease payments.

- The Town uses the interest rate stated in lease contracts. When the interest rate is not provided or the implicit rate cannot be readily determined, the Town uses its estimated incremental borrowing rate as the discount rate for leases.
- The lease term includes the noncancellable period of the lease and certain periods covered by options to extend to reflect how long the lease is expected to be in effect, with terms and conditions varying by the type of underlying asset.
- Fixed and certain variable payments as well as lease incentives and certain other payments are included in the measurement of the lease liability (lessee) or lease receivable (lessor).

The Town monitors changes in circumstances that would require a remeasurement or modification of its leases. The Town will remeasure the lease asset and liability (lessee) or the lease receivable and deferred inflows of resources (lessor) if certain changes occur that are expected to significantly affect the amount of the lease liability or lease receivable.

THIS SPACE LEFT BLANK INTENTIONALLY

NOTE 2 — STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY:

A. Budgetary Information

The following procedures are used by the Town in establishing the budgetary data reflected in the financial statements:

- 1. Prior to April 1, the Town Manager submits to the Town Council a proposed operating and capital budget for the fiscal year commencing the following July 1. The operating and capital budget includes proposed expenditures and the means of financing them.
- 2. Public hearings are conducted to obtain citizen comments.
- 3. Prior to June 30, the budget is legally enacted through passage of an Appropriations Resolution.
- 4. The Appropriations Resolution places legal restrictions on expenditures at the department level. The appropriation for each department can be revised only by the Town Council. The Town Council is authorized to transfer budgeted amounts within departments.
- 5. Formal budgetary integration is employed as a management control device during the year for all funds.
- 6. All budgets are adopted on a basis consistent with generally accepted accounting principles (GAAP).
- 7. Appropriations lapse on June 30, except for the capital expense budget.
- 8. All budgetary data presented in the accompanying financial statements is the amended budget as of June 30.

B. Excess of Expenditures over Appropriations

			Excess of
			Expenditures
Fund	Function		Over Appropriations
		<u>.</u>	
General	Public works	\$	141,600
General	Health and welfare		23,366
Total Gen	eral Fund	\$	164,966

C. Deficit Fund Equity

At June 30, 2023, none of the funds reported deficit fund equity.

NOTE 3 — DEPOSITS AND INVESTMENTS:

Deposits with banks are covered by the Federal Deposit Insurance Corporation (FDIC) and collateralized in accordance with the Virginia Security for Public Deposits Act (the "Act") Section 2.2-4400 et. seq. of the Code of Virginia. Under the Act, banks and savings institutions holding public deposits in excess of the amount insured by the FDIC must pledge collateral to the Commonwealth of Virginia Treasury Board. Financial Institutions may choose between two collateralization methodologies and depending upon that choice, will pledge collateral that ranges in the amounts from 50% to 130% of excess deposits. Accordingly, all deposits are considered fully collateralized.

Notes to Financial Statements JUNE 30, 2023 (CONTINUED)

NOTE 3 — DEPOSITS AND INVESTMENTS: (CONTINUED)

Statutes authorize local governments and other public bodies to invest in obligations of the United States or agencies thereof, obligations of the Commonwealth of Virginia or political subdivisions thereof, obligations of the International Bank for Reconstruction and Development (World Bank), the Asian Development Bank, the African Development Bank, "prime quality" commercial paper that has received at least two of the following ratings: P-1 by Moody's Investors Service, Inc.; A-1 by Standard & Poor's; or F1 by Fitch Ratings, Inc. (Section 2.2-4502), banker's acceptances, repurchase agreements, and the State Treasurer's Local Government Investment Pool (LGIP).

Credit Risk of Debt Securities

The Town's investment policy for credit risk is consistent with the investments allowed by statutes as detailed above. The Town does not have a formal policy for investment-related risk.

The Town rated debt investments as of June 30, 2023 were rated by Standard & Poor's and the ratings are presented below using the Standard & Poor's rating scale.

Rated Debt Investments' Values

Rated Debt Investments	 Fair Qua	ality	y Rating
	 AAAm		AA+f/S1
Virginia State Non-Arbitrage Pool	\$ 2,665,107	\$	-
Virginia Investment Pool - Stable NAV Liquidity Pool	1,299,279		-
Virginia Investment Pool - 1-3 Year High Quality Bond Fund	-		5,435,380
First American Government Obligation	171,448		-
Total	\$ 4,135,834	\$	5,435,380

Redemption Restrictions

The Town has the option to have access to withdraw funds twice a month, with a five-day period notice. Additionally, funds are available to meet unexpected needs such as fluctuations in revenue sources, one time outlays (disasters, immediate capital needs, state budget cuts, etc.).

Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Town has measured fair value of the above Virginia Investment Pool Investment at the net asset value (NAV).

Concentration of Credit Risk

Concentration of credit risk is defined as the risk of loss attributed to the magnitude of a government's investment in a single issuer. If certain investments in an one issuer represent 5% of total investments, there must be a disclosure for the amount and issuer. At June 30, 2023, there is no portion of the Town's portfolio that exceeds 5% of the total portfolio. The Town does not have a formal policy related to custodial credit risk.

Notes to Financial Statements JUNE 30, 2023 (CONTINUED)

NOTE 3 — DEPOSITS AND INVESTMENTS: (CONTINUED)

Interest Rate Risk

The Town invests funds in low risk investments backed by U.S. government agencies.

Investment Maturities (in years)

		Less Than		
Investment Type	Fair Value	 1 Year		1-5 Years
Virginia State Non-Arbitrage Pool	\$ 2,665,107	\$ 2,665,107	\$	-
Virginia Investment Pool - Stable NAV Liquidity Pool	1,299,279	1,299,279		-
Virginia Investment Pool - 1-3 Year High Quality Bond Fund	5,435,380	-		5,435,380
First American Government Obligation	166,418	 166,418	_	
Total	\$ 9,566,184	\$ 4,130,804	\$	5,435,380

External Investment Pool

The fair value of the positions in the external investment pool is the same as the value of the pool shares. As the State Non–Arbitrage Pool is not SEC registered, regulatory oversight of the pool rests with the Virginia State Treasury. The State Non–Arbitrage Pool is an amortized cost basis portfolio. There are no withdrawal limitations or restrictions imposed on participants.

NOTE 4 — FAIR VALUE MEASUREMENTS:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Town categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. The Town maximizes the use of observable inputs and minimizes the use of unobservable inputs. Observable inputs are inputs that market participants would use in pricing the asset or liability based on market data obtained from independent sources. Unobservable inputs reflect assumptions that market participants would use in pricing the asset or liability based on the best information available in the circumstances. The fair value hierarchy categorizes the inputs to valuation techniques used to measure fair value into three levels as follows:

- Level 1. Quoted prices (unadjusted) for identical assets or liabilities in active markets that a
 government can access at a measurement date
- Level 2. Directly or indirectly observable inputs for the asset or liability other than guoted prices
- Level 3. Unobservable inputs that are supported by little or no market activity for the asset or liability

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk.

			Fair V	alue Measuremer	its U	sing
			Quoted Prices in	Significant		Significant
Investment type		6/30/23	Active Markets or Identical Assets (Level 1)	Other Observabl Inputs (Level 2)	e 	Unobservable Inputs (Level 3)
First American Government Obligation	\$_	166,418 \$	166,418		\$

NOTE 10 — PENSION PLAN:

Plan Description

All full-time, salaried permanent employees of the Town are automatically covered by a VRS Retirement Plan upon employment. This is an agent multiple-employer plan administered by the Virginia Retirement System (the System) along with plans for other employer groups in the Commonwealth of Virginia. Members earn one month of service credit for each month they are employed and for which they and their employer pay contributions to VRS. Members are eligible to purchase prior service, based on specific criteria as defined in the <u>Code of Virginia</u>, as amended. Eligible prior service that may be purchased includes prior public service, active military service, certain periods of leave, and previously refunded service.

Benefit Structures

The System administers three different benefit structures for covered employees – Plan 1, Plan 2, and Hybrid. Each of these benefit structures has different eligibility criteria, as detailed below.

- a. Employees with a membership date before July 1, 2010, vested as of January 1, 2013, and have not taken a refund, are covered under Plan 1, a defined benefit plan. Non-hazardous duty employees are eligible for an unreduced retirement benefit beginning at age 65 with at least 5 years of service credit or age 50 with at least 30 years of service credit. Non-hazardous duty employees may retire with a reduced benefit as early as age 55 with at least 5 years of service credit or age 50 with at least 10 years of service credit. Hazardous duty employees (law enforcement officers, firefighters, and sheriffs) are eligible for an unreduced benefit beginning at age 60 with at least 5 years of service credit or age 50 with at least 25 years of service credit. Hazardous duty employees may retire with a reduced benefit as early as age 50 with at least 5 years of service credit.
- b. Employees with a membership date from July 1, 2010 to December 31, 2013, that have not taken a refund or employees with a membership date prior to July 1, 2010 and not vested before January 1, 2013, are covered under Plan 2, a defined benefit plan. Non-hazardous duty employees are eligible for an unreduced benefit beginning at their normal social security retirement age with at least 5 years of service credit or when the sum of their age plus service credit equals 90. Non-hazardous duty employees may retire with a reduced benefit as early as age 60 with at least 5 years of service credit. Hazardous duty employees are eligible for an unreduced benefit beginning at age 60 with at least 5 years of service credit or age 50 with at least 25 years of service credit. Hazardous duty employees may retire with a reduced benefit as early as age 50 with at least 5 years of service credit.
- c. Non-hazardous duty employees with a membership date on or after January 1, 2014 are covered by the Hybrid Plan combining the features of a defined benefit plan and a defined contribution plan. Plan 1 and Plan 2 members also had the option of opting into this plan during the election window held January 1 April 30, 2014 with an effective date of July 1, 2014. Employees covered by this plan are eligible for an unreduced benefit beginning at their normal social security retirement age with at least 5 years of service credit, or when the sum of their age plus service credit equals 90. Employees may retire with a reduced benefit as early as age 60 with at least 5 years of service credit. For the defined contribution component, members are eligible to receive distributions upon leaving employment, subject to restrictions.

Notes to Financial Statements JUNE 30, 2023 (CONTINUED)

NOTE 10 — PENSION PLAN: (CONTINUED)

Average Final Compensation and Service Retirement Multiplier

The VRS defined benefit is a lifetime monthly benefit based on a retirement multiplier as a percentage of the employee's average final compensation multiplied by the employee's total service credit. Under Plan 1, average final compensation is the average of the employee's 36 consecutive months of highest compensation and the multiplier is 1.70% for non-hazardous duty employees, 1.85% for sheriffs and regional jail superintendents, and 1.70% or 1.85% for hazardous duty employees as elected by the employer. Under Plan 2, average final compensation is the average of the employee's 60 consecutive months of highest compensation and the retirement multiplier is 1.65% for non-hazardous duty employees, 1.85% for sheriffs and regional jail superintendents, and 1.70% or 1.85% for hazardous duty employees as elected by the employer. Under the Hybrid Plan, average final compensation is the average of the employee's 60 consecutive months of highest compensation and the multiplier is 1.00%. For members who opted into the Hybrid Retirement Plan from Plan 1 or Plan 2, the applicable multipliers for those plans will be used to calculate the retirement benefit for service credited in those plans.

Cost-of-Living Adjustment (COLA) in Retirement and Death and Disability Benefits

Retirees with an unreduced benefit or with a reduced benefit with at least 20 years of service credit are eligible for an annual COLA beginning July 1 after one full calendar year from the retirement date. Retirees with a reduced benefit and who have less than 20 years of service credit are eligible for an annual COLA beginning on July 1 after one calendar year following the unreduced retirement eligibility date. Under Plan 1, the COLA cannot exceed 5.00%. Under Plan 2 and the Hybrid Plan, the COLA cannot exceed 3.00%. The VRS also provides death and disability benefits. Title 51.1 of the Code of Virginia, as amended, assigns the authority to establish and amend benefit provisions to the General Assembly of Virginia.

Employees Covered by Benefit Terms

As of the June 30, 2021 actuarial valuation, the following employees were covered by the benefit terms of the pension plan:

	Number
Inactive members or their beneficiaries currently receiving benefits	48
Inactive members: Vested inactive members	13
Non-vested inactive members	15
Inactive members active elsewhere in VRS	44
Total inactive members	72
Active members	59
Total covered employees	179

Notes to Financial Statements JUNE 30, 2023 (CONTINUED)

NOTE 10 — PENSION PLAN: (CONTINUED)

Contributions

The contribution requirement for active employees is governed by §51.1-145 of the <u>Code of Virginia</u>, as amended, but may be impacted as a result of funding options provided to political subdivisions by the Virginia General Assembly. Employees are required to contribute 5.00% of their compensation toward their retirement.

The Town's contractually required employer contribution rate for the year ended June 30, 2023 was 12.04% of covered employee compensation. This rate was based on an actuarially determined rate from an actuarial valuation as of June 30, 2021.

This rate, when combined with employee contributions, was expected to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. Contributions to the pension plan from the Town were \$360,498 and \$227,564 for the years ended June 30, 2023 and June 30, 2022, respectively.

Net Pension Liability

The net pension liability (NPL) is calculated separately for each employer and represents that particular employer's total pension liability determined in accordance with GASB Statement No. 68, less that employer's fiduciary net position. The Town's net pension liability was measured as of June 30, 2022. The total pension liability used to calculate the net pension liability was determined by an actuarial valuation performed as of June 30, 2021, and rolled forward to the measurement date of June 30, 2022.

Actuarial Assumptions - General Employees

The total pension liability for General Employees in the Town's Retirement Plan was based on an actuarial valuation as of June 30, 2021, using the Entry Age Normal actuarial cost method and the following assumptions, applied to all periods included in the measurement and rolled forward to the measurement date of June 30, 2022.

Inflation 2.50%

Salary increases, including inflation 3.50% – 5.35%

Investment rate of return 6.75%, net of pension plan investment

expenses, including inflation

Discount Rate	No change

Long-Term Expected Rate of Return

The long-term expected rate of return on pension System investments was determined using a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of pension System investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target asset allocation and best estimate of arithmetic real rates of return for each major asset class are summarized in the following table:

Weighted

Asset Class (Strategy)	Long-Term Target Asset Allocation	Arithmetic Long-term Expected Rate of Return	Average Long-term Expected Rate of Return*
Public Equity	34.00%	5.71%	1.94%
Fixed Income	15.00%	2.04%	0.31%
Credit Strategies	14.00%	4.78%	0.67%
Real Assets	14.00%	4.47%	0.63%
Private Equity	14.00%	9.73%	1.36%
MAPS - Multi-Asset Public Strategies	6.00%	3.73%	0.22%
PIP - Private Investment Partnership	3.00%	6.55%	0.20%
Total	100.00%		5.33%
		Inflation	2.50%
	Expected arithmet	ic nominal return**	7.83%

Notes to Financial Statements JUNE 30, 2023 (CONTINUED)

NOTE 10 — PENSION PLAN: (CONTINUED)

Long-Term Expected Rate of Return (continued)

- * The above allocation provides a one-year expected return of 7.83%. However, one-year returns do not take into account the volatility present in each of the asset classes. In setting the long-term expected return for the System, stochastic projections are employed to model future returns under various economic conditions. These results provide a range of returns over various time periods that ultimately provide a median return of 6.72%, including expected inflation of 2.50%.
- ** On October 10, 2019, the VRS Board elected a long-term rate of return of 6.75% which was roughly at the 40th percentile of expected long-term results of the VRS fund asset allocation at that time, providing a median return of 7.11%, including expected inflation of 2.50%.

Discount Rate

The discount rate used to measure the total pension liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that System member contributions will be made per the VRS Statutes and the employer contributions will be made in accordance with the VRS funding policy at rates equal to the difference between actuarially determined contribution rates adopted by the VRS Board of Trustees and the member rate. Consistent with the phased-in funding provided by the General Assembly for state and teacher employer contributions; the Town was also provided with an opportunity to use an alternative employer contribution rate. For the year ended June 30, 2023, the alternate rate was the employer contribution rate used in FY 2012 or 100% of the actuarially determined employer contribution rate from the June 30, 2021 actuarial valuations, whichever was greater. From July 1, 2022 on, participating employers are assumed to continue to contribute 100% of the actuarially determined contribution rates. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return was applied to all periods of projected benefit payments to determine the total pension liability.

A copy of the 2022 VRS Annual Report may be downloaded from the VRS website at http://www.varetire.org/Pdf/Publications/2022-annual-report.pdf, or by writing to the System's Chief Financial Officer at P.O. Box 2500, Richmond, VA 23218-2500.

Notes to Financial Statements JUNE 30, 2023 (CONTINUED)

NOTE 11 — GROUP LIFE INSURANCE (GLI) PLAN (OPEB PLAN):

Plan Description

The Group Life Insurance (GLI) Plan was established pursuant to §51.1-500 et seq. of the Code of Virginia, as amended, and which provides the authority under which benefit terms are established or may be amended. All full-time, salaried permanent employees of the state agencies, teachers, and employees of participating political subdivisions are automatically covered by the VRS GLI Plan upon employment. This is a cost-sharing multiple-employer plan administered by the Virginia Retirement System (the System), along with pensions and other OPEB plans, for public employer groups in the Commonwealth of Virginia.

In addition to the Basic GLI benefit, members are also eligible to elect additional coverage for themselves as well as a spouse or dependent children through the Optional GLI Plan. For members who elect the optional group life insurance coverage, the insurer bills employers directly for the premiums. Employers deduct these premiums from members' paychecks and pay the premiums to the insurer. Since this is a separate and fully insured plan, it is not included as part of the GLI Plan OPEB.

The specific information for GLI Plan OPEB, including eligibility, coverage and benefits is described below:

Eligible Employees

The GLI Plan was established July 1, 1960, for state employees, teachers, and employees of political subdivisions that elect the plan. Basic GLI coverage is automatic upon employment. Coverage ends for employees who leave their position before retirement eligibility or who take a refund of their accumulated retirement member contributions and accrued interest.

Benefit Amounts

The GLI Plan is a defined benefit plan with several components. The natural death benefit is equal to the employee's covered compensation rounded to the next highest thousand and then doubled. The accidental death benefit is double the natural death benefit. In addition to basic natural and accidental death benefits, the plan provides additional benefits provided under specific circumstances that include the following: accidental dismemberment benefit, seatbelt benefit, repatriation benefit, felonious assault benefit, and accelerated death benefit option. The benefit amounts are subject to a reduction factor. The benefit amount reduces by 25% on January 1 following one calendar year of separation. The benefit amount reduces by an additional 25% on each subsequent January 1 until it reaches 25% of its original value. For covered members with at least 30 years of service credit, the minimum benefit payable was set at \$8,000 by statute in 2015. This will be increased annually based on the VRS Plan 2 cost-of-living adjustment calculation. The minimum benefit adjusted for the COLA was \$8,984 as of June 30, 2023.

NOTE 11 — GROUP LIFE INSURANCE (GLI) PLAN (OPEB PLAN): (CONTINUED)

Contributions

The contribution requirements for the GLI Plan are governed by §51.1-506 and §51.1-508 of the <u>Code of Virginia</u>, as amended, but may be impacted as a result of funding provided to state agencies and school divisions by the Virginia General Assembly. The total rate for the GLI Plan was 1.34% of covered employee compensation. This was allocated into an employee and an employer component using a 60/40 split. The employee component was 0.80% (1.34% x 60%) and the employer component was 0.54% (1.34% x 40%). Employers may elect to pay all or part of the employee contribution; however, the employer must pay all of the employer contribution. Each employer's contractually required employer contribution rate for the year ended June 30, 2023 was 0.54% of covered employee compensation. This rate was based on an actuarially determined rate from an actuarial valuation as of June 30, 2021. The actuarially determined rate, when combined with employee contributions, was expected to finance the costs of benefits payable during the year, with an additional amount to finance any unfunded accrued liability. Contributions to the GLI Plan from the entity were \$16,902 and \$15,972 for the years ended June 30, 2023 and June 30, 2022, respectively.

In June 2022, the Commonwealth made a special contribution of approximately \$30.4 million to the Group Life Insurance Plan. This special payment was authorized by a budget amendment included in Chapter 1 of the 2022 Appropriation Act, and is classified as a non-employer contribution.

GLI OPEB Liabilities, GLI OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to the GLI Plan OPEB

At June 30, 2023, the entity reported a liability of \$163,757 for its proportionate share of the Net GLI OPEB Liability. The Net GLI OPEB Liability was measured as of June 30, 2022 and the total GLI OPEB liability used to calculate the Net GLI OPEB Liability was determined by an actuarial valuation performed as of June 30, 2021, and rolled forward to the measurement date of June 30, 2022. The covered employer's proportion of the Net GLI OPEB Liability was based on the covered employer's actuarially determined employer contributions to the GLI Plan for the year ended June 30, 2022 relative to the total of the actuarially determined employer contributions for all participating employers. At June 30, 2022, the participating employer's proportion was 0.01360% as compared to 0.01510% at June 30, 2021.

For the year ended June 30, 2023, the participating employer recognized GLI OPEB expense of \$1,981. Since there was a change in proportionate share between measurement dates, a portion of the GLI OPEB expense was related to deferred amounts from changes in proportion.

At June 30, 2023, the employer reported deferred outflows of resources and deferred inflows of resources related to the GLI OPEB from the following sources:

_	Deferred Outflows of Resources		Deferred Inflows of Resources
\$	12,968	\$	6,570
	-		10,232
	6,108		15,951
	4,156		20,537
_	16,902		
\$	40,134	\$	53,290
	_	of Resources \$ 12,968 - 6,108 4,156 16,902	of Resources \$ 12,968 \$ - 6,108 4,156 16,902

NOTE 11 — GROUP LIFE INSURANCE (GLI) PLAN (OPEB PLAN): (CONTINUED)

GLI OPEB Liabilities, GLI OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to the Group Life Insurance Plan OPEB (continued)

\$16,902 reported as deferred outflows of resources related to the GLI OPEB resulting from the employer's contributions subsequent to the measurement date will be recognized as a reduction of the Net GLI OPEB Liability in the fiscal year ending June 30, 2024. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to the GLI OPEB will be recognized in the GLI OPEB expense in future reporting periods as follows:

Year Ended June 30,	_	
2024	\$	(6,488)
2025		(5,908)
2026		(11,200)
2027		(1,693)
2028		(4,769)
Thereafter		_

Actuarial Assumptions

The total GLI OPEB liability was based on an actuarial valuation as of June 30, 2021, using the Entry Age Normal actuarial cost method and the following assumptions, applied to all periods included in the measurement and rolled forward to the measurement date of June 30, 2022. The assumptions include several employer groups. Salary increases and mortality rates herein are for relevant employer groups. Information for other groups can be referenced in the VRS Annual Report.

Inflation	2.50%
-----------	-------

Salary increases, including inflation:

Locality - General employees 3.50%-5.35% Locality - Hazardous Duty employees 3.50%-4.75%

Investment rate of return 6.75%, net of investment expenses,

NET GLI OPEB Liability

The net OPEB liability (NOL) for the GLI Plan represents the plan's total OPEB liability determined in accordance with GASB Statement No. 74, less the associated fiduciary net position. As of the measurement date of June 30, 2022, NOL amounts for the GLI Plan are as follows (amounts expressed in thousands):

	 GLI OPEB Plan
Total GLI OPEB Liability	\$ 3,672,085
Plan Fiduciary Net Position	2,467,989
GLI Net OPEB Liability (Asset)	\$ 1,204,096
Plan Fiduciary Net Position as a Percentage	
of the Total GLI OPEB Liability	67.21%

The total GLI OPEB liability is calculated by the System's actuary, and each plan's fiduciary net position is reported in the System's financial statements. The net GLI OPEB liability is disclosed in accordance with the requirements of GASB Statement No. 74 in the System's notes to the financial statements and required supplementary information.

THIS SPACE LEFT BLANK INTENTIONALLY

NOTE 11 — GROUP LIFE INSURANCE (GLI) PLAN (OPEB PLAN): (CONTINUED)

Long-Term Expected Rate of Return

The long-term expected rate of return on the System's investments was determined using a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of System's investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target asset allocation and best estimate of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Class (Strategy)	Long-Term Asset Target Allocation	Arithmetic Long-term Expected Rate of Return	Average Long-term Expected Rate of Return*
Public Equity	34.00%	5.71%	1.94%
Fixed Income	15.00%	2.04%	0.31%
Credit Strategies	14.00%	4.78%	0.67%
Real Assets	14.00%	4.47%	0.63%
Private Equity	14.00%	9.73%	1.36%
MAPS - Multi-Asset Public Strategies	6.00%	3.73%	0.22%
PIP - Private Investment Partnership	3.00%	6.55%	0.20%
Total	100.00%		5.33%
		Inflation	2.50%
	Expected arithmet	ic nominal return**	7.83%

^{*}The above allocation provides a one-year return of 7.83%. However, one-year returns do not take into account the volatility present in each of the asset classes. In setting the long-term expected return for the System, stochastic projections are employed to model future returns under various economic conditions. These results provide a range of returns over various time periods that ultimately provide a median return of 6.72%, including expected inflation of 2.50%.

Discount Rate

The discount rate used to measure the total GLI OPEB liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that employer contributions will be made in accordance with the VRS funding policy and at rates equal to the actuarially determined contribution rates adopted by the VRS Board of Trustees. Through the fiscal year ended June 30, 2022, the rate contributed by the entity for the GLI OPEB will be subject to the portion of the VRS Board-certified rates that are funded by the Virginia General Assembly which was 100% of the actuarially determined contribution rate. From July 1, 2022 on, employers are assumed to continue to contribute 100% of the actuarially determined contribution rates. Based on those assumptions, the GLI OPEB's fiduciary net position was projected to be available to make all projected future benefit payments of eligible employees. Therefore, the long-term expected rate of return was applied to all periods of projected benefit payments to determine the total GLI OPEB liability.

^{**} On October 10, 2019, the VRS Board elected a long-term rate of return of 6.75% which was roughly at the 40th percentile of expected long-term results of the VRS fund asset allocation at that time, providing a median return of 7.11%, including expected inflation of 2.50%.

A copy of the 2022 VRS Annual Report may be downloaded from the VRS website at http://www.varetire.org/Pdf/Publications/2022-annual-report.pdf, or by writing to the System's Chief Financial Officer at P.O. Box 2500, Richmond, VA, 23218-2500.

NOTE 12 — HEALTH INSURANCE CREDIT (HIC) PLAN (OPEB PLAN):

Plan Description

The Political Subdivision Health Insurance Credit (HIC) Plan was established pursuant to §51.1-1400 et seq. of the Code of Virginia, as amended, and which provides the authority under which benefit terms are established or may be amended. All full-time, salaried permanent employees of participating political subdivisions are automatically covered by the VRS Political Subdivision HIC Plan upon employment. This is an agent multiple-employer plan administered by the Virginia Retirement System (the System), along with pension and other OPEB plans, for public employer groups in the Commonwealth of Virginia. Members earn one month of service credit toward the benefit for each month they are employed and for which their employer pays contributions to VRS. The HIC is a tax-free reimbursement in an amount set by the General Assembly for each year of service credit against qualified health insurance premiums retirees pay for single coverage, excluding any portion covering the spouse or dependents. The credit cannot exceed the amount of the premiums and ends upon the retiree's death.

The specific information about the Political Subdivision HIC Plan OPEB, including eligibility, coverage and benefits is described below:

Eligible Employees

The Political Subdivision Retiree HIC Plan was established July 1, 1993 for retired political subdivision employees of employers who elect the benefit and retire with at least 15 years of service credit. Eligible employees include full-time permanent salaried employees of the participating political subdivision who are covered under the VRS pension plan. These employees are enrolled automatically upon employment.

Notes to Financial Statements JUNE 30, 2023 (CONTINUED)

NOTE 12 — HEALTH INSURANCE CREDIT (HIC) PLAN (OPEB PLAN): (CONTINUED)

Benefit Amounts

The Political Subdivision Retiree HIC Plan is a defined benefit plan that provides a credit toward the cost of health insurance coverage for retired political subdivision employees of participating employers. For employees who retire, the monthly benefit is \$1.50 per year of service per month with a maximum benefit of \$45.00 per month. For employees who retire on disability or go on long-term disability under the Virginia Local Disability Program (VLDP), the monthly benefit is \$45.00 per month.

HIC Plan Notes

The monthly HIC benefit cannot exceed the individual premium amount. There is no HIC for premiums paid and qualified under LODA; however, the employee may receive the credit for premiums paid for other qualified health plans. Employees who retire after being on long-term disability under VLDP must have at least 15 years of service credit to qualify for the HIC as a retiree.

Employees Covered by Benefit Terms

As of the June 30, 2021 actuarial valuation, the following employees were covered by the benefit terms of the HIC OPEB plan:

	Number
Inactive members or their beneficiaries currently	
receiving benefits	8
Total inactive members	8
Active members	59
Total covered employees	67

Contributions

The contribution requirements for active employees is governed by §51.1-1402(E) of the <u>Code of Virginia</u>, as amended, but may be impacted as a result of funding options provided to political subdivisions by the Virginia General Assembly. The Town contractually required employer contribution rate for the year ended June 30, 2023 was 0.10% of covered employee compensation. This rate was based on an actuarially determined rate from an actuarial valuation as of June 30, 2021. The actuarially determined rate was expected to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. Contributions from the Town to the HIC Plan were \$3,130 and \$3,549 for the years ended June 30, 2023 and June 30, 2022, respectively.

Net HIC OPEB Liability

The Town's net HIC OPEB liability was measured as of June 30, 2022. The total HIC OPEB liability was determined by an actuarial valuation performed as of June 30, 2021, using updated actuarial assumptions, applied to all periods included in the measurement and rolled forward to the measurement date of June 30, 2022.

Notes to Financial Statements JUNE 30, 2023 (CONTINUED)

Long-Term Expected Rate of Return

The long-term expected rate of return on the System's investments was determined using a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of System's investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target asset allocation and best estimate of arithmetic real rates of return for each major asset class are summarized in the following table:

Weighted

Asset Class (Strategy)	Long-Term Target Asset Allocation	Arithmetic Long-term Expected Rate of Return	Average Long-term Expected Rate of Return*
Public Equity	34.00%	5.71%	1.94%
Fixed Income	15.00%	2.04%	0.31%
Credit Strategies	14.00%	4.78%	0.67%
Real Assets	14.00%	4.47%	0.63%
Private Equity	14.00%	9.73%	1.36%
MAPS - Multi-Asset Public Strategies	6.00%	3.73%	0.22%
PIP - Private Investment Partnership	3.00%	6.55%	0.20%
Total	100.00%		5.33%
		Inflation	2.50%
	Expected arithmet	ic nominal return**	7.83%

NOTE 12 — HEALTH INSURANCE CREDIT (HIC) PLAN (OPEB PLAN): (CONTINUED)

Long-Term Expected Rate of Return (continued)

*The above allocation provides a one-year return of 7.83%. However, one-year returns do not take into account the volatility present in each of the asset classes. In setting the long-term expected return for the System, stochastic projections are employed to model future returns under various economic conditions. These results provide a range of returns over various time periods that ultimately provide a median return of 6.72%, including expected inflation of 2.50%.

Discount Rate

The discount rate used to measure the total HIC OPEB liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that employer contributions will be made in accordance with the VRS funding policy at rates equal to the difference between actuarially determined contribution rates adopted by the VRS Board of Trustees and the member rate. Through the fiscal year ended June 30, 2022, the rate contributed by the entity for the HIC OPEB was 100% of the actuarially determined contribution rate. From July 1, 2022 on, employers are assumed to continue to contribute 100% of the actuarially determined contribution rates. Based on those assumptions, the HIC OPEB's fiduciary net position was projected to be available to make all projected future benefit payments of eligible employees. Therefore, the long-term expected rate of return was applied to all periods of projected benefit payments to determine the total HIC OPEB liability.

Changes in Net HIC OPEB Liability (Asset)

	Incre	ase (Decrease)	
	Total HIC OPEB Liability (a)	Plan Fiduciary Net Position (b)	Net HIC OPEB Liability (Asset) (a) - (b)

HIC Plan Data

Information about the VRS Political Subdivision HIC Plan is available in the separately issued VRS 2022 Annual Comprehensive Financial Report (Annual Report). A copy of the 2022 VRS Annual Report may be downloaded from the VRS website at http://www.varetire.org/Pdf/Publications/2022-annual-report.pdf, or by writing to the System's Chief Financial Officer at P.O. Box 2500, Richmond, VA, 23218-2500.

Notes to Financial Statements JUNE 30, 2023 (CONTINUED)

NOTE 13 — VIRGINIA LOCAL DISABILITY PROGRAM (VLDP) (OPEB PLAN):

Plan Description

Political subdivisions are required by Title 51.1 of the <u>Code of Virginia</u>, as amended, to provide short-term and long-term disability benefits for their hybrid plan employees either through a local plan or through the Virginia Local Disability Program (VLDP). This is a multiple-employer, cost-sharing plan administered by the Virginia Retirement System (the System), along with pension and other OPEB plans, for eligible public employer groups in the Commonwealth of Virginia.

The specific information for the VLDP OPEB, including eligibility, coverage, and benefits is described below:

Eligible Employees

The Political Subdivision VLDP was implemented January 1, 2014 to provide disability benefits for non-work-related and work-related disabilities for employees with hybrid plan retirement benefits. All full-time, salaried general employees; including local law enforcement officers, firefighters, or emergency medical technicians of political subdivisions who do not provide enhanced hazardous duty benefits; who are in the VRS Hybrid Retirement Plan benefit structure and whose employer has not elected to opt out of the VRS-sponsored program are automatically covered by the VRS Political Subdivision VLDP.

Benefit Amounts

The VLDP provides a short-term disability benefit beginning after a seven-calendar-day waiting period from the first day of disability. Employees become eligible for non-work-related short-term disability coverage after one year of continuous participation in VLDP with their current employer. During the first five years of continuous participation in VLDP with their current employer, employees are eligible for 60% of their predisability income if they go out on non-work-related or work-related disability. Once the eligibility period is satisfied, employees are eligible for higher income replacement levels.

The VLDP provides a long-term disability benefit beginning after 125 workdays of short-term disability. Members are eligible if they are unable to work at all or are working fewer than 20 hours per week. Members approved for long-term disability will receive 60% of their pre-disability income. If approved for work-related long-term disability, the VLDP benefit will be offset by the workers' compensation benefit. Members will not receive a VLDP benefit if their workers' compensation benefit is greater than the VLDP benefit.

VLDP Notes

Members approved for short-term or long-term disability at age 60 or older will be eligible for a benefit, provided they remain medically eligible. VLDP Long-Term Care Plan is a self-funded program that assists with the cost of covered long-term care services.

Contributions

The contribution requirements for active hybrid plan employees is governed by §51.1-1178(C) of the <u>Code of Virginia</u>, as amended, but may be impacted as a result of funding provided to political subdivisions by the Virginia General Assembly. Each political subdivision's contractually required employer contribution rate for the year ended June 30, 2023 was 0.85% of covered employee compensation for employees in the VRS Political Subdivision VDLP. This rate was based on an actuarially determined rate from an actuarial valuation as of June 30, 2021. The actuarially determined rate was expected to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. Contributions from the Town to the VRS Political Subdivision VDLP were \$6,253 and \$4,919 for the years ended June 30, 2023 and June 30, 2022, respectively.

NOTE 13 — VIRGINIA LOCAL DISABILITY PROGRAM (VLDP) (OPEB PLAN): (CONTINUED)

VLDP OPEB Liabilities, VLDP OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to VLDP OPEB

At June 30, 2023, the Town reported a liability (asset) of \$(744) for its proportionate share of the VLDP Net OPEB Liability (Asset). The Net VLDP OPEB Liability (Asset) was measured as of June 30, 2022 and the total VLDP OPEB liability used to calculate the Net VLDP OPEB Liability (Asset) was determined by an actuarial valuation as of June 30, 2021, and rolled forward to the measurement date of June 30, 2022. The Town's proportion of the Net VLDP OPEB Liability (Asset) was based on the Town's actuarially determined employer contributions to the VLDP OPEB plan for the year ended June 30, 2022 relative to the total of the actuarially determined employer contributions for all participating employers. At June 30, 2022, the Town's proportion of the VLDP was 0.12650% as compared to 0.18502% at June 30, 2021.

For the year ended June 30, 2023, the Town recognized VLDP OPEB expense of \$4,011. Since there was a change in proportionate share between measurement dates, a portion of the VLDP Net OPEB expense was related to deferred amounts from changes in proportion.

At June 30, 2023, the Town reported deferred outflows of resources and deferred inflows of resources related to the VLDP OPEB from the following sources:

	_	Deferred Outflows of Resources	 Deferred Inflows of Resources
Differences between expected and actual experience	\$	1,046	\$ 1,591
Net difference between projected and actual earnings on VLDP OPEB program investments		-	3
Change of assumptions		28	267
Changes in proportionate share		110	548
Employer contributions subsequent to the measurement date	_	6,253	
Total	\$	7,437	\$ 2,409

\$6,253 reported as deferred outflows of resources related to the VLDP OPEB resulting from the Town's contributions subsequent to the measurement date will be recognized as a reduction of the Net VLDP OPEB Liability in the fiscal year ending June 30, 2024. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to the VLDP OPEB will be recognized in the VLDP OPEB expense in future reporting periods as follows:

Year Ended June 30.

rour Enaca cano co,	
2024	\$ (111)

Notes to Financial Statements JUNE 30, 2023 (CONTINUED)

NOTE 13 — VIRGINIA LOCAL DISABILITY PROGRAM (VLDP) (OPEB PLAN): (CONTINUED)

Actuarial Assumptions

The total VLDP OPEB liability for the VLDP was based on an actuarial valuation as of June 30, 2021, using the Entry Age Normal actuarial cost method and the following assumptions, applied to all periods included in the measurement and rolled forward to the measurement date of June 30, 2022.

Inflation 2.50%

Salary increases, including inflation:

Political Subdivision Employees 3.50%-5.35%

Investment rate of return 6.75%, net of program investment expenses,

including inflation

Mortality Rates – Non-Largest Ten Locality Employers – General and Non-Hazardous Duty Employees

Pre-Retirement:

Pub-2010 Amount Weighted General Employee Rates projected generationally; males set forward 2 years; 105% of rates for females set forward 3 years

Post-Retirement:

Pub-2010 Amount Weighted General Healthy Retiree Rates projected generationally; 95% of rates for males set forward 2 years; 95% of rates for females set forward 1 year

Post-Disablement:

Pub-2010 Amount Weighted General Disabled Rates projected generationally; 110% of rates for males set forward 3 years; 110% of rates for females set forward 2 years

Beneficiaries and Survivors:

Pub-2010 Amount Weighted General Contingent Annuitant Rates projected generationally

Mortality Improvement Scale:

Rates projected generationally with Modified MP-2020 Improvement Scale that is 75% of the MP-2020 rates

The actuarial assumptions used in the June 30, 2021 valuation were based on the results of an actuarial experience study for the period from July 1, 2016 through June 30, 2020, except the change in the discount rate, which was based on VRS Board action effective as of July 1, 2019. Changes to the actuarial assumptions as a result of the experience study and VRS Board action are as follows:

Mortality Rates (pre-retirement, post-retirement	Update to Pub-2010 public sector mortality tables. For future
healthy, and disabled)	mortality improvements, replace load with a modified
	Mortality Improvement Scale of MP-2020
Retirement Rates	Adjusted rates to better fit experience for Plan 1; set
	separate rates based on experience for Plan 2/Hybrid;
	changed final retirement age from 75 to 80 for all
Withdrawal Rates	Adjusted rates to better fit experience at each age and
	service decrement through 9 years of service
Disability Rates	No change
Salary Scale	No change
Line of Duty Disability	No change
Discount Rate	No change

NOTE 13 — VIRGINIA LOCAL DISABILITY PROGRAM (VLDP) (OPEB PLAN): (CONTINUED)

Net VLDP OPEB Liability (Asset)

The net OPEB liability (asset) (NOL) for the Political Subdivision VLDP represents the program's total OPEB liability determined in accordance with GASB Statement No. 74, less the associated fiduciary net position. As of June 30, 2022, NOL amounts for the VRS Political Subdivision VLDP is as follows (amounts expressed in thousands):

	F	Political Subdivision VLDP
		OPEB Plan
Total Political Subdivision VLDP OPEB Liability Plan Fiduciary Net Position	\$	7,360 7,948
Political Subdivision VLDP Net OPEB Liability (Asset)	\$	(588)
Plan Fiduciary Net Position as a Percentage of the		
Total Political Subdivision VLDP OPEB Liability		107.99%

The total Political Subdivision VLDP OPEB liability is calculated by the System's actuary, and the plan's fiduciary net position is reported in the System's financial statements. The net Political Subdivision VLDP OPEB liability is disclosed in accordance with the requirements of GASB Statement No. 74 in the System's notes to the financial statements and required supplementary information.

Long-Term Expected Rate of Return

The long-term expected rate of return on VRS System investments was determined using a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of VRS System investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target asset allocation and best estimate of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Class (Strategy)	Long-Term Target Asset Allocation	Arithmetic Long-term Expected Rate of Return	Weighted Average Long-term Expected Rate of Return
Public Equity	34.00%	5.71%	1.94%
Fixed Income	15.00%	2.04%	0.31%
Credit Strategies	14.00%	4.78%	0.67%
Real Assets	14.00%	4.47%	0.63%
Private Equity	14.00%	9.73%	1.36%
MAPS - Multi-Asset Public Strategies	6.00%	3.73%	0.22%
PIP - Private Investment Partnership	3.00%	6.55%	0.20%
Total	100.00%		5.33%
		Inflation	2.50%
	Expected arithmet	ic nominal return**	7.83%

Notes to Financial Statements JUNE 30, 2023 (CONTINUED)

NOTE 13 — VIRGINIA LOCAL DISABILITY PROGRAM (VLDP) (OPEB PLAN): (CONTINUED)

Long-Term Expected Rate of Return (continued)

*The above allocation provides a one-year return of 7.83%. However, one-year returns do not take into account the volatility present in each of the asset classes. In setting the long-term expected return for the System, stochastic projections are employed to model future returns under various economic conditions. These results provide a range of returns over various time periods that ultimately provide a median return of 6.72%, including expected inflation of 2.50%.

** On October 10, 2019, the VRS Board elected a long-term rate of return of 6.75% which was roughly at the 40th percentile of expected long-term results of the VRS fund asset allocation at that time, providing a median return of 7.11%, including expected inflation of 2.50%.

Discount Rate

The discount rate used to measure the total VLDP OPEB was 6.75%. The projection of cash flows used to determine the discount rate assumed that employer contributions will be made in accordance with the VRS funding policy at rates equal to the actuarially determined contribution rates adopted by the VRS Board of Trustees. Through the fiscal year ended June 30, 2022, the rate contributed by the Town for the VLDP was subject to the portion of the VRS Board-certified rates that are funded by the Virginia General Assembly, which was 100% of the actuarially determined contribution rate. From July 1, 2022 on, all agencies are assumed to continue to contribute 100% of the actuarially determined contribution rates. Based on those assumptions, the VLDP OPEB plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return was applied to all periods of projected benefit payments to determine the total VLDP OPEB liability.

Sensitivity of the Town's Proportionate Share of the VLDP Net OPEB Liability (Asset) to Changes in the Discount Rate

The following presents the Town's proportionate share of the net VLDP OPEB liability (asset) using the discount rate of 6.75%, as well as what the Town's proportionate share of the net VLDP OPEB liability would be if it were calculated using a discount rate that is one percentage point lower (5.75%) or one percentage point higher (7.75%) than the current rate:

			Rate	
	1% Decrease	С	urrent Discount	1% Increase
	(5.75%)		(6.75%)	(7.75%)
Town's proportionate share of the	 _			
VLDP Net OPEB Liability (Asset)	\$ 79	\$	(744) \$	(1,458)

VLDP OPEB Fiduciary Net Position

Detailed information about the VRS Political Subdivision VLDP's Fiduciary Net Position is available in the separately issued VRS 2022 Annual Comprehensive Financial Report (Annual Report). A copy of the 2022 VRS Annual Report may be downloaded from the VRS website at http://www.varetire.org/Pdf/Publications/2022-annual-report.pdf, or by writing to the System's Chief Financial Officer at P.O. Box 2500, Richmond, VA, 23218-2500.

Notes to Financial Statements JUNE 30, 2023 (CONTINUED)

Totals	\$ 73,162	\$ 71,973	\$ 179,360	\$	744	\$ 8,209

NOTE 15— LINE OF DUTY ACT (LODA) (OPEB BENEFITS)

The Line of Duty Act (LODA) provides death and healthcare benefits to certain law enforcement and rescue personnel, and their beneficiaries, who were disabled or killed in the line of duty. Benefit provisions and eligibility requirements are established by title 9.1 Chapter 4 of the <u>Code of Virginia</u>. Funding of LODA benefits is provided by employers in one of two ways: (a) participation in the Line of Duty and Health Benefits Trust Fund (LODA Fund), administered by the Virginia Retirement System (VRS) or (b) self-funding by the employer through an insurance company.

The Town has elected to provide LODA benefits through an insurance company. The obligation for the payment of benefits has been effectively transferred from the Town to Virginia Risk Sharing Association (VRSA). VRSA assumes all liability for the Town's LODA claims that are approved by VRS. The pool purchases reinsurance to protect the pool from extreme claim costs.

The current year OPEB expense for the insured benefits is defined as the amount of premiums or other payments required for the insured benefits for the reporting period in accordance with the agreement with the insured company for LODA and change in liability to the insurer equal the different between amounts recognized as OPEB expense and amounts paid by the employer to the insurer. The Town's LODA coverage is fully covered or "insured" through VRSA. This is built into the LODA coverage cost presented in the annual renewals. The Town's LODA premium for the year ended June 30, 2023 was \$15,352.

NOTE 16 — LEASES RECEIVABLE:

The Town entered into a noncancellable lease agreement for telecommunication equipment with a lease term of 5 years and interest rate of 3.00% as the discount rate for leases. The lease agreement requires monthly payments of \$1,513. The Town recognized lease revenue of \$17,284 and interest revenue of \$332. As of June 30, 2023, the lease receivable balance was \$3,014.

NOTE 17 — SURETY BONDS:

	_	Amount
VRSA Insurance - Surety	_	
Public Employees Blanket Bond	\$_	550,000

Notes to Financial Statements JUNE 30, 2023 (CONTINUED)

NOTE 18 — RISK MANAGEMENT:

The Town is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; and natural disasters for which the Town carries commercial insurance. The Town also provides a risk management program for workers' compensation. Premiums are paid by the general fund and all other funds and are available to pay claims, claim reserves and administrative costs of the program.

The Town is a member of the Virginia Risk Sharing Association for workers' compensation. This program is administered by a servicing contractor, which furnishes claims review and processing.

Each Association member jointly and severally agrees to assume, pay and discharge any liability. The Town pays Virginia Risk Sharing Association contributions and assessments based upon classification and rates into a designated cash reserve fund out of which expenses of the Association and claims and awards are to be paid. In the event of a loss deficit and depletion of all available excess insurance, the Association may assess all members in the proportion which the premium of each bears to the total premiums of all members in the year in which such deficit occurs. Settled claims resulting from these risks have not exceeded commercial insurance in any of the past three fiscal years.

NOTE 19 – INTERFUND TRANSFERS:

Interfund transfers for the year ended June 30, 2023 consisted of the following:

		Transfers In	_	Transfers Out
General Fund	\$	-	\$	109,890
Trash Fund	_	109,890		
Total	\$	109,890	\$	109,890

NOTE 20 — COMMITMENTS AND CONTINGENCIES:

The Town is obligated to the Shenandoah County School Board under an agreement dated September 4, 1973, whereby the Town has agreed to pay to the School Board \$200 for each water and sewer connection made to the primary school water and sewer lines until such time as seventy-percent of their investment is realized. The agreement does not state the method of determining the School Board's investment nor the duration of the agreement.

Amounts received or receivable from grantor agencies are subject to audit and adjustment by grantor agencies, principally the federal government. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount, if any, of expenditure which may be disallowed by the grantor cannot be determined at this time although the government expects such amounts, if any, to be immaterial.

Under an agreement dated August 27, 1996 the Town is obligated to reimburse a developer for availability fees collected for connections to a sewer line paid for by the developer. The reimbursement shall not, in the aggregate, exceed \$250,000.

Notes to Financial Statements JUNE 30, 2023 (CONTINUED)

NOTE 21 — DEFERRED, UNAVAILABLE, AND UNEARNED REVENUE:

Deferred and unavailable revenue represents amounts for which asset recognition criteria have been met, but for which revenue recognition criteria have not been met. Deferred, unavailable, and unearned revenue in the government-wide financial statements and fund financial statements totaling \$1,133,792, \$1,394,159, and \$6,617,600, respectively, is comprised of the following:

- A. <u>Prepaid Property Taxes</u> -Property taxes due subsequent to June 30, 2023 but paid in advance by the taxpayers totaled \$92,872 at June 30, 2023.
- B. <u>Unbilled Property Taxes Property taxes for the second half of 2023 that had not been billed as of June 30, 2023 amounted to \$1,040,920.</u>
- C. <u>Unavailable Property Taxes</u> Uncollected tax billings not available for funding of current expenditures totaled \$260,367.
- D. <u>Unearned Revenue</u> VDOT carryover unearned revenue representing VDOT highway maintenance funds not available to fund current expenditures totaled \$864,513. In addition, unearned revenue representing American Rescue Plan Act funds not expended at year end totaled \$5,753,087.

NOTE 22 — LITIGATION:

At June 30, 2023, there were no matters of litigation involving the Town or which would materially affect the Town's financial position should any court decisions on pending matters not be favorable to such entities.

NOTE 23 — UPCOMING PRONOUNCEMENTS:

Statement No. 99, *Omnibus 2022*, addresses (1) practice issues that have been identified during implementation and application of certain GASB Statements and (2) accounting and financial reporting for financial guarantees. The effective dates differ based on the requirements of the Statement, ranging from April 2022 to for fiscal years beginning after June 15, 2023.

Statement No. 100, Accounting Changes and Error Corrections – an amendment of GASB Statement No. 62, provides more understandable, reliable, relevant, consistent, and comparable information for making decisions or assessing accountability for accounting changes and error corrections. The requirements of this Statement are effective for fiscal years beginning after June 15, 2023.

Statement No. 101, *Compensated Absences*, updates the recognition and measurement guidance for compensated absences. It aligns the recognition and measurement guidance under a unified model and amends certain previously required disclosures. The requirements of this Statement are effective for fiscal years beginning after December 15, 2023.

Implementation Guide No. 2021-1, *Implementation Guidance Update—2021*, with dates ranging from reporting periods beginning after June 15, 2022 to reporting periods beginning after June 15, 2023.

Implementation Guide No. 2023-1, *Implementation Guidance Update*—2023, effective for fiscal years beginning after June 15, 2023.

Management is currently evaluating the impact these standards will have on the financial statements when adopted.

Town of Strasburg, Virginia

Notes to Required Supplementary Information Pension Plan For the Year Ended June 30, 2023

Changes of benefit terms – There have been no actuarially material changes to the System benefit provisions since the prior actuarial valuation.

Changes of assumptions – The actuarial assumptions used in the June 30, 2021 valuation were based on the results of an actuarial experience study for the period from July 1, 2016 thorugh June 30, 2020, except the change in the discount rate, which was based on VRS Board action effective as of July 1, 2019. Changes to the actuarial assumptions as a result of the experience study and VRS Board action are as follows:

All Others (Non-10 Largest) - Non-Hazardous Duty:

Mortality Rates (pre-retirement, post-retirement healthy, and disabled)	Update to Pub-2010 public sector mortality tables. For future mortality improvements, replace load with a modified Mortality Improvement Scale MP-2020
Retirement Rates	Adjusted rates to better fit experience for Plan 1; set separate rates based on experience for Plan 2/Hybrid; changed final retirement age
Withdrawal Rates	Adjusted rates to better fit experience at each age and service decrement through 9 years of service
Disability Rates	No change
Salary Scale	No change
Line of Duty Disability	No change
Discount Rate	No change

All Others (Non-10 Largest) – Hazardous Duty:

Mortality Rates (pre-retirement, post-retirement healthy, and disabled)	Update to Pub-2010 public sector mortality tables. Increased disability life expectancy. For future mortality improvements, replace load with a modified Mortality Improvement Scale MP-2020
Retirement Rates	Adjusted rates to better fit experience and changed final retirement age from 65 to 70
Withdrawal Rates	Decreased rates and changed from rates based on age and service to rates based on service only to better fit experience and to be more consistent with Locals Largest 10 Hazardous Duty
Disability Rates	No change
Salary Scale	No change
Line of Duty Disability	No change
Discount Rate	No change

2017	2,307	2,307	-		384,513	0.60%
2016	1,304	1,304	-		217,359	0.60%
2015	718	718	-		119,629	0.60%

Schedule is intended to show information for 10 years. Information prior to the 2015 valuation is not available. However, additional years will be included as they become available.

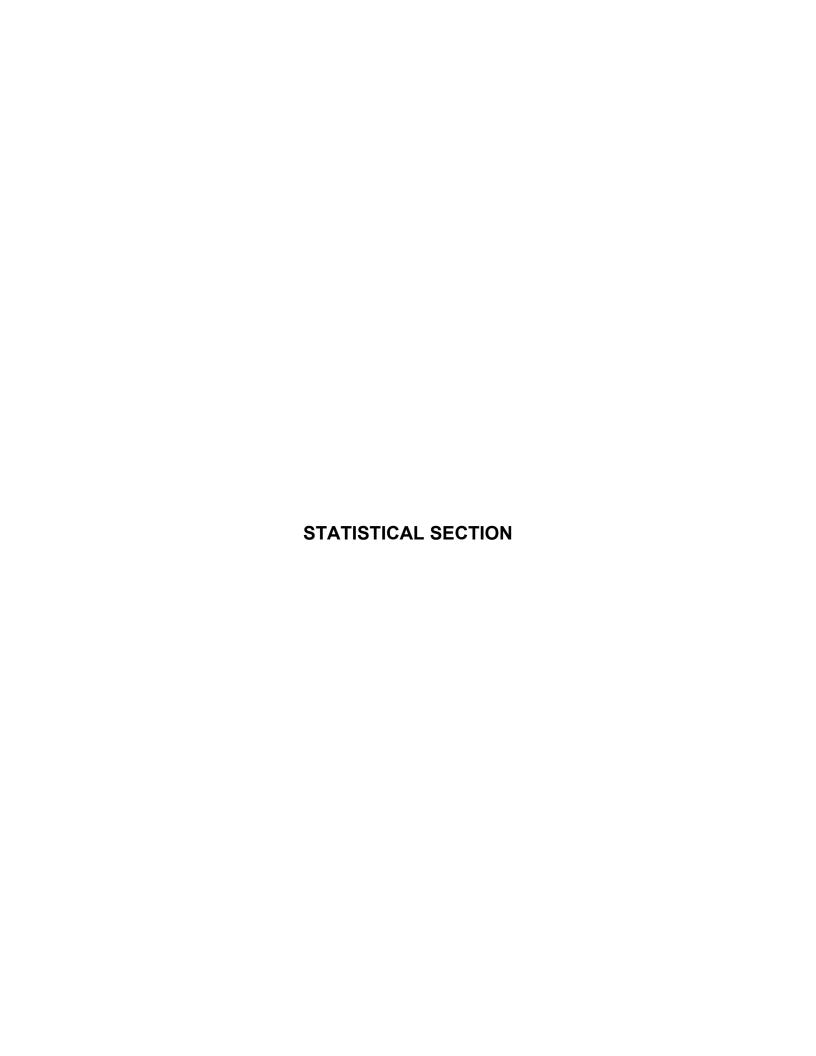

Notes to Required Supplementary Information Virginia Local Disability Program (VLDP) For the Year Ended June 30, 2023

Changes of benefit terms – There have been no actuarially material changes to the System benefit provisions since the prior actuarial valuation.

Changes of assumptions – The actuarial assumptions used in the June 30, 2021 valuation were based on the results of an actuarial experience study for the period from July 1, 2016 thorugh June 30, 2020, except the change in the discount rate, which was based on VRS Board action effective as of July 1, 2019. Changes of the actuarial assumptions as a result of the experience study and VRS Board action are as follows:

Non-Largest Ten Locality Employers - General and Non-Hazardous Duty Employees

Mortality Rates (pre-retirement, post-retirement healthy, and disabled)	Update to Pub-2010 public sector mortality tables. For future mortality improvements, replace load with a modified Mortality Improvement Scale MP-2020
Retirement Rates	Adjusted rates to better fit experience for Plan 1; set separate rates based on experience for Plan 2/Hybrid; changed final retirement age from 75 to 80 for all
Withdrawal Rates	Adjusted rates to better fit experience at each age and service decrement through 9 years of service
Disability Rates	No change
Salary Scale	No change
Line of Duty Disability	No change
Discount Rate	No change

STATISTICAL SECTION

This part of the Town of Strasburg's annual comprehensive financial report presents detailed information as a context for understanding what the information in the financial statements, notes disclosures, and required supplementary information says about the Town's overall financial health. This information has not been audited by the independent auditors.

Contents	<u>Tables</u>
Financial Trends	
These tables contain trend information to help the reader understand how the Town's financial performance and well-being have changed over time.	1-4
Revenue Capacity	
These tables contain information to help the reader assess the factors affecting the Town's ability to generate its property and sales taxes.	5-9
Debt Capacity	
These tables present information to help the reader assess the affordability of the Town's current levels of outstanding debt and the Town's ability to issue debt in the future.	10-13
Demographic and Economic Information	
These tables offers demographic and economic indicators to help the reader understand the environment within which the Town's financial activities take place and to help make comparisons over time and with other governments.	14
Operating Information	
These tables contain information about the Town's operations and resources to help the reader understand how the Town's financial information relates to the services the Town provides and the activities it performs.	15-17
Sources:	

Unless otherwise noted, the information in these tables is derived from the

annual comprehensive financial reports for the relevant year.

County of Shenandoah, Virginia	\$ 43,405,584	16.05%	\$	6,968,175
Town of Strasburg, Virginia direct debt			_	3,171,017
Total direct and overlapping debt			\$_	10,139,192

Sources: Outstanding debt and applicable percentages provided by the County of Shenandoah, Virginia

Note: Overlapping governments are those that coincide, at least in part, with geographic boundaries of the Town. This schedule estimates the portion of the outstanding debt of those overlapping governments that is borne by the property taxpayers of the Town of Strasburg, Virginia. This process recognizes that, when considering the Town's ability to issue and repay long-term debt, the entire debt burden borne by the property taxpayers should be taken into account. However, this does not imply that every taxpayer is a resident, and therefore responsible for repaying the debt, of each overlapping government.

Independent Auditors' Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards

To the Honorable Members of the Town Council Town of Strasburg, Virginia

We have audited, in accordance with the auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the *Specifications for Audits of Counties, Cities, and Towns*, issued by the Auditor of Public Accounts of the Commonwealth of Virginia, the financial statements of the governmental activities, the business-type activities, and each major fund of the Town of Strasburg, Virginia, as of and for the year ended June 30, 2023, and the related notes to the financial statements, which collectively comprise the Town of Strasburg, Virginia's basic financial statements, and have issued our report thereon dated November 30, 2023.

Report on Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Town of Strasburg, Virginia's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Town of Strasburg, Virginia's internal control. Accordingly, we do not express an opinion on the effectiveness of the Town of Strasburg, Virginia's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that were not identified.

Report on Compliance and Other Matters

Rabinson, Farmer, Cax Associates

As part of obtaining reasonable assurance about whether the Town of Strasburg, Virginia's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of This Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Staunton, Virginia

ROBINSON, FARMER, COX ASSOCIATES, PLLC

INDEPENDENT AUDITORS' REPORT ON COMPLIANCE FOR EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY THE UNIFORM GUIDANCE

To the Honorable Members of the Town Council Town of Strasburg, Virginia

Report on Compliance for Each Major Federal Program

Opinion on Each Major Federal Program

We have audited the Town of Strasburg, Virginia's compliance with the types of compliance requirements identified as subject to audit in the *OMB Compliance Supplement* that could have a direct and material effect on each of the Town of Strasburg, Virginia's major federal programs for the year ended June 30, 2023. Town of Strasburg, Virginia's major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs.

In our opinion, the Town of Strasburg, Virginia complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2023.

Basis for Opinion on Each Major Federal Program

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Our responsibilities under those standards and the Uniform Guidance are further described in the Auditors' Responsibilities for the Audit of Compliance section of our report.

We are required to be independent of the Town of Strasburg, Virginia and to meet our other ethical responsibilities, in accordance with relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on compliance for each major federal program. Our audit does not provide a legal determination of the Town of Strasburg, Virginia's compliance with the compliance requirements referred to above.

Responsibilities of Management for Compliance

Management is responsible for compliance with the requirements referred to above and for the design, implementation, and maintenance of effective internal control over compliance with the requirements of laws, statutes, regulations, rules, and provisions of contracts or grant agreements applicable to the Town of Strasburg, Virginia's federal programs.

Auditors' Responsibilities for the Audit of Compliance

Our objectives are to obtain reasonable assurance about whether material noncompliance with the compliance requirements referred to above occurred, whether due to fraud or error, and express an opinion on the Town of Strasburg, Virginia's compliance based on our audit. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards, *Government Auditing Standards*, and the Uniform Guidance will always detect material noncompliance when it exists. The risk of not detecting material noncompliance resulting from fraud is higher than for that resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Noncompliance with the compliance requirements referred to above is considered material if there is a substantial likelihood that, individually or in the aggregate, it would influence the judgment made by a reasonable user of the report on compliance about the Town of Strasburg, Virginia's compliance with the requirements of each major federal program as a whole.

In performing an audit in accordance with generally accepted auditing standards, *Government Auditing Standards*, and the Uniform Guidance, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material noncompliance, whether due to fraud or error, and design
 and perform audit procedures responsive to those risks. Such procedures include examining, on a
 test basis, evidence regarding the Town of Strasburg, Virginia's compliance with the compliance
 requirements referred to above and performing such other procedures as we considered necessary
 in the circumstances.
- Obtain an understanding of the Town of Strasburg, Virginia's internal control over compliance relevant to the audit in order to design audit procedures that are appropriate in the circumstances and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of the Town of Strasburg, Virginia's internal control over compliance. Accordingly, no such opinion is expressed.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and any significant deficiencies and material weaknesses in internal control over compliance that we identified during the audit.

Report on Internal Control over Compliance

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the Auditors' Responsibilities for the Audit of Compliance section above and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies in internal control over compliance. Given these limitations, during our audit we did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above. However, material weaknesses or significant deficiencies in internal control over compliance may exist that were not identified.

Our audit was not designed for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, no such opinion is expressed.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

Notes to Schedule of Expenditures of Federal Awards:

NOTE A - BASIS OF PRESENTATION

The accompanying schedule of expenditures of federal awards (the Schedule) includes the federal award activity of the Town of Strasburg, Virginia under programs of the federal government for the year ended June 30, 2023. The information in this Schedule is presented in accordance with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). Because the Schedule presents only a selected portion of the operations of the Town of Strasburg, Virginia, it is not intended to and does not present the financial position, change in net position, or cash flows of the Town of Strasburg, Virginia.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Expenditures reported on the Schedule are reported on the accrual basis of accounting. Such expenditures are recognized following the cost principles contained in the Uniform Guidance, wherein certain types of expenditures are not allowable or are limited as to reimbursement.

The Town of Strasburg, Virginia has elected not to use the 10 percent de minimis indirect cost rate as allowed under the Uniform Guidance.

Pass-through identifying numbers are presented where available.

NOTE C - SUBRECIPIENTS

No awards were passed through to subrecipients.

NOTE D - LOANS

The Town did not have any loans or loan guarantees which are subject to reporting requirements in the current year.

NOTE E - RELATIONSHIP TO FINANCIAL STATEMENTS

Federal expenditures, revenues, and capital contributions are reported in the Town's basic financial statements as follows:

Intergovernmental federal revenues per the basic financial statements:

Primary government:	
Governmental funds	\$ 893,153
Enterprise funds	 820,332
Total primary government	\$ 1,713,485
Total federal expenditures per the Schedule of Expenditures of	
Federal awards	\$ 1,713,485
