# REVIEW OF THE COMMONWEALTH'S HOMELAND SECURITY FUNDING

**MAY 2005** 

### REPORT SUMMARY

This report summarizes the primary sources of funding the Commonwealth receives from the federal government for homeland security and bio-terrorism. It is important to properly categorize those activities that are within the purview of the U.S. Department of Homeland Security versus the broader array of homeland security activities that cross into many areas of government and the private sector. Throughout this report, we will use the term 'homeland security' to denote the general issue; and the 'U.S. Department of Homeland Security' to denote its programs and activities.

The Commonwealth receives funding from various federal agencies, which consists of a combination of new and existing programs. We reviewed the state agencies that received significant amounts of federal homeland security funding through the U.S. Departments of Homeland Security and Health and Human Services – the two largest providers to states and local entities. We concentrated our efforts on the Department of Emergency Management, Virginia Department of Health, Virginia State Police, and Virginia Port Authority who directly receive the majority of these funds. The scope of this report does not include funds that went to localities from the federal level as direct grants, though this information is included in the appendices. Joint Legislative Audit and Review Commission staff are currently examining the use of homeland security funding.

In performing our review, we found that the Commonwealth expects federal funding for most homeland security programs to decrease over the next several years. This may affect the Commonwealth in two areas. While current grants allow recipients and subrecipients to use a certain percentage for administrative costs, the expected decrease in funding may prevent some state and local entities from hiring additional staff to administer and monitor these grants. Consequently, both the Commonwealth and localities have limited resources to perform these duties and must make the decision to either accept additional risk or hire additional staff, using state and local funds if adequate federal funds are not available.

The anticipated decrease in federal funding will also affect the replenishment and maintenance of equipment and training on both state and local levels. The Commonwealth and local entities have purchased a significant amount of equipment and supplies and developed programs with federal homeland security and bio-terrorism funds. State and local entities have purchased protective, communication, and search and rescue equipment, such as gas masks, drugs, batteries, and medical supplies. Over time, much of the equipment and supplies will require maintenance or replacement. With the decrease in federal funding, the Commonwealth and localities will need to decide whether to provide funds towards this effort or choose not to maintain and replenish certain equipment or supplies. Not maintaining equipment and supplies purchased with homeland security funds could negatively impact the Commonwealth's ability to respond to terrorist events. Additionally, not replenishing expended materials and supplies for these programs timely would negate the effects of resources already spent on homeland security efforts.

### **OVERVIEW**

This report summarizes the primary sources of funding the Commonwealth receives from the federal government for homeland security and bio-terrorism. It is important to properly categorize those activities that are within the purview of the U.S. Department of Homeland Security versus the broader array of homeland security activities that cross into many areas of government and the private sector. Throughout this report, we will use the term 'homeland security' to denote the general issue; and the 'U.S. Department of Homeland Security' to denote its programs and activities.

The Commonwealth receives funding from various federal agencies, and the funding is a combination of new and existing programs. We reviewed the state agencies that received significant amounts of federal homeland security funding through the U.S. Departments of Homeland Security and Health and Human Services – the two largest providers to states and local entities. We concentrated our efforts on the Department of Emergency Management (Emergency Management), the Virginia Department of Health (Health), Virginia State Police (State Police), and Virginia Port Authority (Port Authority) who directly receive the majority of these funds. The scope of this report does not include funds that went to localities from the federal level as direct grants, though this information is included in the appendices. Joint Legislative Audit and Review Commission staff are currently examining the use of homeland security funding.

The U.S. Department of Homeland Security is an agency created by Congress as a composition of numerous existing departments, agencies, and divisions. Homeland Security assumed and continued funding a number of federal grants and contracts. As an example, the Federal Emergency Management Agency (FEMA) was an independent agency of the federal government and its operations are now part of the U.S. Department of Homeland Security. FEMA provided the Commonwealth and its agencies, localities, and citizens, funds to prepare, respond, and recover from emergencies and disasters. As part of the U.S. Department of Homeland Security, FEMA continues to provide this funding, but with a more specific focus on terrorism. Throughout this report, we will attempt to discuss both the new and existing revenue under the U.S. Department of Homeland Security. In some cases, it is not possible to separate and discuss whether the funding stream was pre-existing.

Also included in the homeland security effort are bio-terrorism preparedness programs. The primary difference between biological terrorism and conventional terrorism, such as bombings and hijackings, is the duration from the time of attack to the determination of the victims and effects of the attacks. For bio-terrorism, hospitals and local health departments will be the first to recognize a bio-terrorism event. To address this threat, the U.S. Department of Health and Human Services distributes bio-terrorism funds to Health. For the purposes of this report, we included these programs, as well as similar federal programs when analyzing new and existing revenue under homeland security efforts.

For homeland security funding, the federal government notifies the Governor of the potential funding available to the Commonwealth. The Governor, using the Office of Commonwealth Preparedness, designates which state agency will operate as the state administrator of these funds. Currently four state agencies primarily receive federal homeland security: Emergency Management, Health, State Police and Port Authority. The Commonwealth's homeland security efforts began after the first bombing of the World Trade Center in 1993 and increased significantly after the September 2001 terrorist attacks.

To identify federal funding received before and after the attacks, we examined federal award documents, interviewed key agency personnel, and analyzed program expenses. We found that federal grants fell into three categories. First, if the program existed prior to the 2001 attacks and funding remained steady over the past six fiscal years, we designated this to be an "Existing Program." Next, we designated any programs beginning after the 2001 attacks as a "New Program." Finally, if the program existed prior to the 2001 terrorist attacks, but experienced a significant increase in funding after the attacks, we designated

awards granted prior to the attacks as "Existing" and awards granted after the attacks as "New." The following summarizes our results.

### Summary of Homeland Security Federal Awards and Expenses For Fiscal Years 1999 - 2004

Homeland Security Grants	Existing Program Awards	New ProgramAwards	Actual Expenses
Emergency Management:			
Emergency Management Performance grants	\$19,275,487	\$ -	\$ 17,738,088
State homeland security grants	1,221,000	105,711,999	36,173,990
Citizen Corps and Community Emergency Response team	-	1,673,000	775,933
Health:			
Centers for Disease Control-Public health preparedness and			
response to bioterrorism	2,368,513	49,057,082	41,705,357
Health Resources and Services Administration - Hospital			
bioterrorism preparedness	=	14,882,312	10,104,685
Medical Reserve Corps	-	338,225	59,262
State Police:			
Congressional appropriation	=	13,900,000	9,078,790
Port Authority:			
Port security grants		11,378,622	8,076,123
Total	\$22,865,000	<u>\$196,941,240</u>	\$123,712,228

### VIRGINIA DEPARTMENT OF EMERGENCY MANAGEMENT

Over the past six fiscal years, Emergency Management received over \$344 million through federal programs currently with the U.S. Department of Homeland Security. Natural disaster grants make up the largest portion of the federal funds received. In fiscal year 2004, natural disaster relief increased significantly due to relief efforts related to Hurricane Isabel. Planning and Other Assistance includes costs for planning, boating and fire safety, and crisis counseling.

For the purposes of this report, we will only discuss funds the Commonwealth receives for homeland security. Although, funding for natural disasters and planning and other assistance comes from the U.S. Department of Homeland Security, we excluded this information from further discussion in this report.

### Federal Natural Disaster and Homeland Security Expenses

Program Type	FY 1999	FY 2000	FY 2001	FY 2002	FY 2003	FY 2004	Total
Natural disaster Homeland security	\$13,272,575 2,344,196		\$14,736,917 3,350,569	\$15,223,655 3,253,355	\$11,703,432 10,261,020	\$183,119,555 32,655,491	\$259,141,117 54,688,011
Planning and other assistance	4,217,691	2,506,938	5,273,654	7,103,406	7,366,235	4,343,337	30,811,261
Total	<u>\$19,834,462</u>	\$26,415,301	\$23,361,140	<u>\$25,580,416</u>	<u>\$29,330,687</u>	<u>\$220,118,383</u>	<u>\$344,640,389</u>

Source: Commonwealth Schedule of Expenditures of Federal Awards

The State Homeland Security grants and Emergency Management Performance grants provide most of the homeland security funding. The Commonwealth may use these funds for equipment, training, exercises, and planning. Emergency Management passes a large portion of these funds through to other state agencies, higher education institutions, localities, and first responders.

As illustrated below, the Commonwealth received Emergency Management Performance grants before the 2001 attacks and funding has remained steady for the past six years. New U.S. Department of Homeland Security funding primarily consists of State Homeland Security grants. Of the \$106 million awarded, the Commonwealth expects to pass-through \$77 million to localities and other entities. As of June 30, 2004, the Commonwealth received over \$36 million in Homeland Security grants.

### VIRGINIA DEPARTMENT OF HEALTH

Health receives federal grants from the U.S. Department of Health and Human Services to assist the state and localities in upgrading health and medical preparedness and improving response capabilities for bioterrorism attacks, outbreaks of infectious disease, and other public health threats. Health investigates and evaluates methods of controlling or preventing disease and disability by providing epidemic aid, surveillance, technical assistance, consultation, program support, and leadership and coordination of joint national, state, and local efforts.

### Virginia Department of Health's Federal Expenses

	FY 1999	FY 2000	FY 2001	FY 2002	FY 2003	FY 2004	Total
Centers for Disease Control public health preparedness Health and Resource	\$ -	\$936,509	\$1,421,819	\$ -	\$19,420,338	\$19,926,691	\$41,705,357

Source: Commonwealth Schedule of Expenditures of Federal Awards

### VIRGINIA STATE POLICE

In fiscal year 2002, the State Police received a congressional appropriation of \$13.9 million to purchase anti-terrorism equipment and perform training exercises. As of June 30, 2004, State Police spent \$9 million towards this effort. State Police expects that they will expend the total grant before the end of the grant period in fiscal year 2006.

### Virginia State Police Grant Expenses

### VIRGINIA PORT AUTHORITY

The Port Authority received federal awards of over \$12.6 million to implement threat mitigation and security improvements at state-owned port facilities in Norfolk, Portsmouth, and Newport News, and at the Virginia Inland Port. The Port Authority contracted with a third party to function as its grant administrator. As of June 30, 2004, the Port Authority has spent approximately \$8 million towards this effort.

### Virginia Port Authority Grant Expenses

### OFFICE OF COMMONWEALTH PREPAREDNESS

In 2002, the Governor created the Office of Commonwealth Preparedness (Office) to provide strategic leadership and coordination to the Commonwealth's emergency and disaster preparedness activities. The Office reports directly to the Governor. Its mission is to work with federal, state, and local officials and the private sector to develop a seamless, coordinated security and preparedness strategy.

The Office provides strategic direction in the development of policies, programs, and plans for the Commonwealth and its agencies for emergencies and disasters of all kinds, including terrorism. The Office does not directly administer any federal grants, but designates and works with state administering agencies and ensures uses are consistent with statewide strategy and priorities. The Office serves the role of the federally-required "state homeland security advisor" while serving as the predominate point of contact between the U.S. Department of Homeland Security, the White House Homeland Security Council, other federal entities, and the Governor on homeland security issues. It works with federal officials to obtain additional federal resources and coordinate policy development and information exchange. The Office also serves as a direct liaison between the Governor, state agencies, local governments, and first responders on issues of emergency preparedness.

The U.S. Department of Homeland Security requires that states receiving funding for homeland security efforts establish a senior advisory committee. The Commonwealth of Virginia has done so by adding this responsibility to the Secure Commonwealth Panel. This panel is a 28 member panel that consists of local and state emergency management officials and other community leaders. Under the direction of the Office of Commonwealth Preparedness and the Secretary of Public Safety, the Secure Commonwealth Panel assesses the Commonwealth's readiness and makes recommendations to the Governor on actions to improve prevention and preparedness efforts.

To coordinate state agency preparedness implementation and information sharing, the Office of Commonwealth Preparedness has a 31 member working group with representatives from 13 different state entities.

The Office also participates in the National Capital Region policy group. The National Capital Region is an urban area defined in the federal Homeland Security Act of 2002. As such, the region qualifies for federal Urban Area Security Initiative grants. The National Capital Region includes five counties or cities in Northern Virginia (Arlington, Alexandria, Fairfax, Loudoun, and Prince William), three counties in Maryland and the District of Columbia. The National Capital Region policy group collaborates planning among local, state, federal and private sectors within the region. While this policy group provides overall direction on behalf of the two states and Washington D.C., for the efforts between the federal, state and local jurisdictions, the District actually manages and monitors these federal grant activities and funds.

### STATE HOMELAND SECURITY GRANT PROCESSING

The State Homeland Security grant allows states and localities to acquire first responder equipment, training and planning to enhance among other capabilities, fire, emergency medical services, hazardous materials, law enforcement, public works, public health and emergency management capabilities.

Initially, pass-through entities received these federal funds on a reimbursement basis. Because some subrecipients, particularly localities, had difficulty in providing the initial outlay to purchase equipment and services, the U.S. Department of Homeland Security changed processing procedures. Currently, subrecipients receive funds similar to a cash advance. When applying for a grant award, subrecipients must show how they will use the federal funds and how the goods or services purchased support the subrecipients' homeland security strategic plan. Subrecipients receive federal funds upon grant approval and must provide quarterly status reports to Emergency Management, who provides regular reporting updates to the Office of Commonwealth Preparedness.

In order to monitor subrecipients, Emergency Management performs paperwork audits by reviewing receipts and other supporting documentation provided by subrecipients. Emergency Management also relies on independent audits performed at the local level to provide additional assurance that localities are spending funds in accordance with grant agreements. Emergency Management intends to perform site visits; however, staffing limitations have prevented the agency from implementing this monitoring procedure. As discussed below, the State Homeland Security grant allows Emergency Management to keep a percentage of funds to pay administrative costs, though the agency expects future funding to decrease over time. Additionally, this percentage may not always cover administrative costs. These uncertainties prevent Emergency Management from hiring additional staff to administer and monitor this program. Consequently, the agency must either hire additional staff using state funds if federal funds are inadequate or accept the additional risk.

### FUTURE ISSUES FACING COMMONWEALTH HOMELAND SECURITY EFFORTS

### **Future Funding**

The Commonwealth expects future federal funding for most homeland security programs to decrease over the next few years and that the focus will likely move away from "first responder" activities. While current grants allow recipients and subrecipients to use a certain percentage of funds for administrative costs, the expected decrease in funding prevents some state and local entities from hiring additional staff to administer and monitor these grants. Consequently, both the Commonwealth and localities have limited resources to perform these duties and must make the decision to either accept additional risk or hire additional staff, for which future federal funds may not be available.

Also affecting future funding is an anticipated change in the federal allocation process. Currently, the U.S. Department of Homeland Security uses a formula and population statistics to determine state allocation amounts. The Commonwealth and other states use this same methodology to allocate funds among state and local jurisdictions. Consequently, this has created some disparity in per capita amounts. For example, Henrico County receives \$2.8 million resulting in a \$10.70 per capita amount. At the same time, Norton City in Wise County receives approximately \$200,000, which results in a \$51.09 per capita amount. The Commonwealth expects that the federal government will move towards a risk-based allocation methodology, which may affect future federal funding.

### Replenishment and Maintenance Equipment and Training

The Commonwealth and local entities have purchased a significant amount of equipment and supplies and developed programs with federal homeland security and bio-terrorism funds. State and local entities have purchased protective, communication, and search and rescue equipment, such as gas masks, drugs, batteries, and medical supplies. Over time, much of the equipment and supplies will require maintenance or replacement. However, the Commonwealth expects federal homeland security and bio-terrorism funding to level off or even decrease. For example, Health expects a 15 percent nationwide reduction for bio-terrorism grants for 2006.

Without federal funding, the Commonwealth and localities will need to decide whether to provide funds towards this effort or choose not to maintain and replenish certain equipment or supplies. Not maintaining equipment and supplies purchased with homeland security and bio-terrorism funds could negatively impact the Commonwealth's ability to respond to terrorist events. Additionally, not replenishing expended materials and supplies for these programs timely would negate the effects of resources already spent on homeland security and bio-terrorism efforts.

### Future for the Office of Commonwealth Preparedness

The Office plays a role in coordinating federal, state, and local prevention and preparedness efforts for emergencies and disasters of all kinds, including terrorism. Local entities depend on the Office's oversight to provide assurance that the Commonwealth is allocating federal homeland security, including bioterrorism funding, fairly. Since the Governor created the Office through executive order rather than by state statute, it is uncertain what the Office's role will be in any future administrations. Due to the numerous and diverse parties involved, the Commonwealth should determine if maintaining a central office that coordinates the broader homeland security efforts between state, local, federal, and private entities should be considered.

# Commonwealth of Hirginia

Walter J. Kucharski, Auditor

Auditor of Public Accounts P.O. Box 1295 Richmond, Virginia 23218

April 15, 2005

The Honorable Mark R. Warner Governor of Virginia State Capitol Richmond, Virginia The Honorable Lacey E. Putney Chairman, Joint Legislative Audit and Review Commission General Assembly Building Richmond, Virginia

We have completed a review of the Commonwealth's Homeland Security funding. Joint Legislative Audit and Review Commission staff are currently examining the use of homeland security funding. .

### **Objectives**

We had four objectives for our review. These objectives were to:

- 1. identify state agencies and other entities involved in the Commonwealth's homeland security efforts and determine their roles and responsibilities;
- 2. determine the role of the Office of Commonwealth Preparedness;
- 3. identify the Commonwealth's funding sources for homeland security efforts, and determine how the Commonwealth allocates, administers and spends these funds; and,
- 4. compare federal homeland security funding received by the Commonwealth before and after the September 2001 terrorism attacks.

### Scope

In conducting this review, we interviewed key personnel to determine the roles and responsibilities of state agencies and other entities. We obtained and analyzed data to identify funding sources, allocation methodology, and expenses related to the Commonwealth's homeland security efforts.

We also reviewed original grant agreements and other agency documentation. Through observation and review of agency policies and procedures, we gained an understanding of processes related to federal grants administration and subrecipient monitoring. Additionally, we reviewed the Catalogue of Federal Domestic Assistance and other federal documents to obtain knowledge on pertinent laws and regulations.

We discussed this	report with the O	ffice of Commonwe	alth Preparedness,	Department of	Emergency
Management, Department	of Health, Virgini	a State Police, and th	ne Virginia Port A	uthority on Apr	il 27, 2005.

AUDITOR OF PUBLIC ACCOUNTS

JP/kva

# **APPENDIX A**

### FEDERAL GOVERNMENT GRANTS

This appendix outlines the various grants the Commonwealth and localities receive from the Federal government. The description of the grants comes from the Catalog of Federal Domestic Assistance.

The following outlines the various grants that the Commonwealth of Virginia receives from Homeland Security.

CFDA	D. M	
Number	Program Name	Funded To
97.004	State Homeland Security Grants	Virginia Department of Emergency Management (passed through to other state agencies and the Chesapeake Bay Bridge Tunnel)
97.008	Urban Area Security Initiative (UASI)	Virginia Railway Express, Richmond UASI, Nation Capital Region UASI, and the Hampton Roads planning district
97.018	National Fire Academy Training Assistance	Virginia Department of Fire Programs
97.019	National Fire Academy Educational Program	Virginia Department of Fire Programs
97.042	Emergency Management Performance Grants	Virginia Department of Emergency Management (passed through to localities)
97.044	Assistance to Firefighters Grant	Localities
97.053	Citizen Corps	Virginia Department of Emergency Management
97.054	Community Emergency Response Teams	Emergency Management (passed through to localities and the Central Shenandoah Valley and Northern Neck planning districts)
97.071	Metropolitan Medical Response System	Localities and the Hampton Roads planning district
97.073	State Homeland Security Program	Virginia Department of Emergency Management (passed through to localities, colleges/universities, commercial airports, and the Chesapeake Bay Bridge Tunnel)
97.074	Law Enforcement Terrorism Prevention Program	Department of Criminal Justice Services (passed through to other state agencies and localities)

### CFDA 97.004 - State Homeland Security Grants

Homeland Security provides funds to states for the purchase of specialized equipment for fire, emergency medical, hazardous material response services, and law enforcement agencies. These funds are to enhance the capabilities of state and local units of government to respond to acts of terrorism involving chemical and biological agents, as well as radiological, nuclear, and incendiary devices. Funding is part of the U.S. Patriot Act of 2001, Public Law 107-56, which provides grants to acquire personal protective; chemical, biological, and radiological detection; decontamination; and communications equipment.

### CFDA 97.008 - Urban Areas Security Initiative

Homeland Security provides large urban areas and mass transit authorities funding to enhance local emergency, prevention, and response agencies. These funds are available to identify, prepare for, and respond to threats or incidents of terrorism involving weapons of mass destruction. Funds can also enhance selected mass transit authorities' protection of critical infrastructure and emergency preparedness activities. It is a two-year grant for equipment, training, exercises, and planning. Homeland Security determines eligibility by using a combination of current threat estimates, critical assets within the urban area, and population density. If an area or mass transit authority is determined eligible, Homeland Security will notify the state to apply for the grant.

# CFDA 97.018 and 97.019 - National Fire Academy Training Assistance and National Fire Academy Educational Program

U.S. Fire Administration provides both of these programs for training to members of a fire department or persons who have significant responsibilities for fire prevention and control. Training occurs at the resident facility in Emmitsburg, Maryland, and in the field in cooperation with state or local fire training agencies on specific subjects. In addition, the National Fire Academy Training Assistance Program covers reimbursement for travel costs to the resident facility and provides stipends for selected regional delivery courses.

### CFDA 97.042 - Emergency Management Performance Grants

Currently provided by FEMA, the program encourages the development of comprehensive emergency management, including terrorism consequence management, at the state and local level and improvement of emergency planning, preparedness, mitigation, response, and recovery capabilities. This is not a disaster grant. FEMA tries to ensure that recipients have the flexibility necessary to achieve measurable results in key functional areas of emergency management. This grant allows states to allocate funds according to risk and to address the most urgent state and local needs in emergency preparedness, response, and recovery. As of federal fiscal year 2005, this program is the responsibility of Homeland Security.

### CFDA 97.044 - Assistance to Firefighters Grant

The U.S. Fire Administration provides this grant directly to fire departments for enhancing the departments' ability to protect the health and safety of the public as well as that of firefighting personnel facing fire and fire-related hazards. Although the funds go directly to the fire departments, the U.S. Fire Administration provides the chief executive of the state with information concerning the total number and dollar amount of awards made to fire departments in the Commonwealth of Virginia. Fund usage includes training, wellness and fitness, firefighting equipment, personal protective equipment, and other equipment and supplies.

### CFDA 97.053 and 97.054 - Citizens Corp and Community Emergency Response Team

These grants provide assistance to state and local efforts to expand Citizen Corps, which includes Community Emergency Response Team training, create Citizen Corps Councils, and support the oversight and outreach responsibilities of the councils. Citizen Corps funds are available to promote efforts to involve volunteer groups in activities that enhance individual, community, and family preparedness and to ultimately contribute to the strengthening of homeland security. Similar to Citizen Corps, Community Emergency Response Team program funds are available to assist state and local efforts to start or expand Community Emergency Response Team training.

### CFDA 97.071 - Metropolitan Medical Response System

Homeland Security directly funds localities to further enhance and maintain integrated, systematic preparedness for local response to weapons of mass destruction high-casualty events until significant external assistance arrives. This program permits jurisdictions to focus on being prepared for terrorist events that involve radiological, nuclear, chemical, biological, or explosive agents, as well as epidemic disease outbreaks, large scale hazardous materials accidents, and major natural disasters. This program originated in the U.S. Department of Health and Human Services in 1996 and transferred to Homeland Security upon its development. Specifically, this program is provided to address National Incident Management System compliance, interoperable communications, enhanced mutual aid, and regional expansion.

### CFDA 97.073 - State Homeland Security Program

Homeland Security provide funds to state and localities to enhance the capability to prevent, deter, respond to, and recover from incidents of terrorism involving the use of chemical, biological, radiological, nuclear, and explosive (CBRNE) weapons and cyber attacks. Funds support planning, training, exercises, and equipment and costs related to:

- homeland security and emergency operations planning activities;
- purchases of specialized equipment;
- design, development, conduct, and evaluation of statewide CBRNE and cyber security training programs and exercises and attendance at approved courses; and
- management and administration of implementing the state homeland security strategy and managing the program.

### CFDA 97.074 - Law Enforcement Terrorism Prevention Program

This program provides grants to state and local law enforcement for planning, organization, training, exercises, and equipment to support terrorism prevention activities. Funds are used for the following terrorism prevention activities:

- information sharing to prevent terrorist attacks;
- target hardening to reduce vulnerability of selected high value targets;
- recognition and mapping of potential or developing threats;
- interoperable communications; and
- prohibition of terrorists before they can execute a threat or intervention activities that prevent terrorists from executing a threat.

### U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES

Homeland security and bio-terrorism efforts include the ability of the health care system (including hospitals, emergency departments, emergency medical services systems, outpatient facilities, and poison control centers) to respond to terrorist events and other public health emergencies. The U.S. Department of Health and Human Services provides funds to upgrade state and local public health jurisdictions' preparedness for and response to bioterrorism, outbreaks of infectious disease, and other public health threats and emergencies.

The following outlines the various grants that the Commonwealth of Virginia receives from the U.S. Department of Health and Human Services:

CFDA Number	Program Name	Funded To
93.003	Health Resources and Services Administration – Hospital Bioterrorism Preparedness Program	Virginia Department of Health (passed through to the Virginia Hospital and Healthcare Association)
93.008	Medical Reserve Corps Small Grant Program	Localities
93.283	Center for Disease Control and Prevention – public health preparedness and response for bioterrorism	Virginia Department of Health

### CFDA 93.003 - Health Resources and Services Administration - Bioterrorism Hospital Preparedness Program

The Department of Health and Human Services has a hospital preparedness cooperative agreement administered by the Health Resources and Services Administration. Through the agreement, states can prepare hospitals and support health care systems to provide effective and coordinated care to the victims of terrorism and other public health emergencies. With this grant, states develop and implement regional plans to improve the capacity of the health care system, so that these facilities may better respond to incidents requiring mass immunization, isolation decontamination, diagnosis, and treatment in the aftermath of terrorism or other public health emergencies.

### CFDA 93.008 - Medical Reserve Corps

This program funds localities or local nonprofit, non-governmental community-based organizations to develop local volunteer medical emergency and public health response capabilities. Funds support organization, volunteer recruitment, assessment of risks and vulnerabilities, strategy development, planning, training, drills/practice, supplies, and equipment. Funds also support the development of the Medical Reserve Corps to increase capacity at the community level to respond during emergencies with medical consequences and to improve public health in communities through volunteerism on an ongoing basis.

# <u>CFDA 93.283 - Centers for Disease Control and Prevention – Public Health Preparedness and Response for Bioterrorism</u>

This program from the Centers for Disease Control and Prevention provides funding to upgrade state and local health jurisdictions' preparedness to respond to attacks of bioterrorism, outbreaks of infectious disease, and other public health threats and emergencies. Investigation and evaluation of all methods of controlling or preventing disease and disability are carried out by providing epidemic aid, surveillance, technical assistance, consultation, program support; and leadership and coordination of joint national, state, and local efforts.
