Board of Directors
Richmond Metropolitan Transportation Authority
Richmond, Virginia

Honorable Members of the Board:

The comprehensive annual financial report (“CAFR”) of the Richmond Metropolitan Transportation Authority (“RMTA” or the “Authority”) for the fiscal year ended June 30, 2020 is hereby submitted. Section 710 of a resolution, adopted October 18, 2011, creating and establishing an issue of revenue bonds of the Authority, requires an annual audit of the Authority’s financial statements by independent certified public accountants.

Management assumes full responsibility for the completeness and reliability of the information contained in this report, based upon a comprehensive framework of internal control that it has established for this purpose. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

Cherry Bekaert LLP has issued an unmodified (“clean”) audit opinion on the Authority’s financial statements for the year ended June 30, 2020. The report of the independent auditor is located at the front of the financial section of this report.

Management’s discussion and analysis (“MD&A”) immediately follows the independent auditor’s report and provides a narrative introduction, overview, and analysis of the basic financial statements. MD&A complements this letter of transmittal and should be read in conjunction with it.

Profile of the Authority

The Authority was created in March 1966 by an Act of the General Assembly of the Commonwealth of Virginia to plan, finance, build, and maintain a toll expressway system to serve the Richmond metropolitan area. In 1973, the Act was amended to authorize the Authority to provide vehicular parking facilities for the Richmond metropolitan area. An additional amendment in 1984 authorized the Authority to acquire land, to construct and own a baseball stadium, and to lease such land, stadium, and attendant facilities. In 1992, another amendment authorized the Authority to own and operate sports facilities of any nature, including facilities reasonably related thereto and lease such facilities as the Authority may prescribe. In 2016, another amendment expanded the Authority’s powers to include the construction, ownership, and operation of coliseums and arenas.

Legislation was introduced and passed during the 2014 General Assembly session that changed the Authority’s name to the Richmond Metropolitan Transportation Authority and equalized representation on the Authority’s sixteen member Board of Directors.

Transmittal Letter

The City and Counties each are authorized to appoint five members to the Board, with the option of one member from each jurisdiction being an elected official. The Commonwealth Transportation Commissioner is authorized to appoint the sixteenth member from the Commonwealth Transportation Board. Reappointment remains the sole responsibility of the aforementioned entities.

The Authority's Board is required to adopt a budget for the fiscal year no less than 30 days prior to the beginning of each fiscal year. The annual budget serves as the foundation for the Authority's financial planning and control. The Authority maintains budgetary monitoring as part of its system of internal controls, with monthly financial reports presented to management and the Authority's Board. As an additional budgetary control, existing bond documents require the Authority's Consulting Engineers and Traffic and Revenue Consultant to certify that the annual operating budget provides sufficient revenues to meet budgeted expenses and to maintain the quality of the Authority's facilities. These bond documents also require the Consulting Engineers to annually certify the amount to be deposited into the Authority's Repair and Contingency fund to pay the extraordinary and non-recurring costs of operation, maintenance, repairs, and replacements to the Expressway System.

Operations of the Authority

The Authority is a self-supporting entity, depending solely on the revenues derived from operations and proceeds from the issuance of revenue bonds to fund the Expressway System. The resolutions authorizing the issuance of bonds prohibit the commingling of funds between the Authority's different operations (tolls cannot be used to support any of the Authority's other facilities).

Comprised of the Powhite Parkway, Downtown Expressway, and Boulevard Bridge, the Expressway System contains over 50 lane miles of roads and 36 bridges. The Expressway System continues to provide a vital urban transportation link for the Richmond metropolitan area, as annual traffic has grown from 17 million in 1976 to approximately 65 million in 2019.

Powhite Parkway – Opening in 1973, the Powhite Parkway provides the only high speed crossing of the James River located in the geographical center of the region. It links expressways running north-south and east-west through the heart of the metropolitan area.

Downtown Expressway – Opening in 1976, the Downtown Expressway connects the Powhite Parkway to downtown Richmond and Interstate 95. The Downtown Expressway extends 2.5 miles from the Meadow Street Ramp in the west to I-95 in the east. The continuation of the Downtown Expressway to the west of Meadow Street is maintained by the Virginia Department of Transportation and offers a connection to I-195 to the north and the Powhite Parkway to the south.

Boulevard Bridge – Purchased in November 1969, the Boulevard Bridge was the first acquisition for the Authority. The steel truss bridge was built in 1925 to improve connectivity of the Westover Hills neighborhood south of the river to areas north of the river.

Main Street Station - In June 2003, the City of Richmond completed the renovation of Main Street Station and related parking lots. Upon completion of the renovation, the Authority was requested by the City to provide management services for both the station and parking facilities. In March 2018, the City of Richmond completed renovations to the Train Shed, making it a venue for larger events such as concerts, festivals, and weddings. The Authority was requested by the City to provide management services for the Train Shed upon its completion. The Authority was not responsible for any facility debt and the facilities remained property of the City. The City agreed to pay all operating expenses in excess of revenues associated with the Authority's management of the facilities – this contribution was budgeted so net

Transmittal Letter

revenue over expenses equals zero. The Authority submitted monthly financial reports, annual budgets, and audited financial statements to the City. The Authority's operation of the facilities was subject to periodic renewals of the operating agreement. On July 1, 2019, the operating agreement with the City of Richmond to provide management services for Main Street Station expired and was not renewed. All Main Street Station fund assets were remitted to the City and the City took over the remaining receivables and liabilities of the Main Street Station. There were no revenues or expenses for this operation in fiscal year 2020.

Economic Condition and Outlook

Traffic on the Authority's Expressway System is primarily commuter-based, with area employment levels directly impacting the number of daily commuter trips. While the unemployment rate indicates the general direction of the economy, area employment is a more appropriate economic indicator to correlate to the Authority's traffic. Due to the COVID-19 pandemic, economic conditions have deteriorated rapidly and traffic volume has decreased significantly for the RMTA Expressway system. *Figure 1* compares the 12 month moving average of area employment to the 12 month moving average of daily transactions on the Expressway System. As shown in Q2 in 2020, the COVID-19 pandemic and the Virginia Governor's Stay at Home Order significantly impacted both employment and system traffic in the Richmond MSA:

Figure 1: Richmond MSA Total Employment Levels, Fiscal Years 2014 – 2020

The employment levels have steadily increased over the last five years. It was anticipated that the Richmond area was set on a course of stable growth. However, the COVID-19 pandemic negatively impacted employment due to the Stay at Home Order and only essential businesses remaining open during that time. As businesses began to re-open with restrictions, employment levels and traffic volumes increased slightly from the initial COVID impact.

Transmittal Letter

Figure 2 notes the total employment levels for the Richmond MSA for fiscal years 2015 through 2020. The impact of the COVID-19 pandemic is first identified in March and April 2020.

Figure 2: Richmond MSA Total Employment Levels, Fiscal Years 2015 – 2020

Fuel price volatility can impact system traffic levels. For the fiscal year 2021 forecast, it is estimated that gas prices will remain well below \$3.00. As of June 2020, gas prices were averaging approximately \$1.90. Due to the COVID-19 pandemic impact on the economy, the prices could stay close to \$2.00 for some time. It is estimated that gas prices would have to increase substantially higher than \$4 per gallon and be sustained over many months to have a negative impact on the traffic forecast. It should be noted that Richmond gas prices have been generally below those of the United States as a whole.

Figure 3 notes average regular gas price per gallon for the previous 36 months for Richmond and the nation.

Figure 3: Gas Prices, Last 36 Months

Transmittal Letter

Revenue for FY2021 is projected to decrease to \$36.3 million. This decrease is driven by reduced traffic volume due to current economic conditions and uncertainty surrounding the continued impact of the COVID-19 pandemic. A toll rate adjustment planned in FY2018 was removed from the long-term financial plan based upon traffic growth. The timing and extent of future rate adjustments will continue to be analyzed as projections are updated and revised based on actual results.

While the Authority believes the traffic and revenue forecast is conservative, objective, and realistic in light of the current environment, the forecast is stressed to determine how a decline in revenue would impact the Authority's financial position. Even in the event of a 10% loss in budgeted traffic and toll revenue, it is estimated that all debt service coverage requirements would be satisfied during FY2021; in an extreme case of a 20-30% loss in traffic and toll revenue, FY2021 revenue and significant cash reserves would still be sufficient to pay for operations and required debt service.

In addition to employment levels, continued demand for the Expressway System is generated by new development and construction in the Richmond MSA. Opportunity Zones ("OZ"), a new federally enabled tool developers are touting to raise additional capital to jumpstart projects, initiated several new developments.

- Richmond-based Lynx Ventures is using an OZ fund to help construct *The Current*, a \$68 million, two-building office, retail and residential project on a 2-acre surface lot in Manchester.
- WVS Cos., plan to use OZ funding for their *South Falls* development this year. The two-phase project includes a six-story, 135,000-square-foot office building at 111 Hull St. and a 14-story, 255-unit apartment building, and a seven-story mixed-use building, at 3 Manchester Road.
- In Scott's Addition, Henrico-based Capital Square is making its first foray into development using OZ funds to help build its *Scott's Collection*, a \$90 million, three-phase project that eventually will house hundreds of new apartments along Moore and Clay streets.
- Eagle Construction of VA broke ground on a townhome development site in Manchester, dubbed *McRae & Lacy*, next door to Legend Brewing Co. It also plans to construct 21 townhomes on a surface parking lot in Monroe Ward.
- Corinthian Construction is set to launch construction on a \$3 million, two-story, 23-unit apartment building at 1510 Bainbridge St.
- PepsiCo opened its newest distribution plant at 1608 Willis Road in Chesterfield in 2019 after investing \$25.9 million for the facility that was built by Armada Hoffer.
- Hummus maker Sabra Dipping Co. completed a 38,000-square-foot expansion of its 220,000-square-foot plant at 15900 Sabra Way.
- Bissell Inc. opened a 611,500-square-foot facility in the James River Industrial Center in Chesterfield in 2019.
- Brother International Corp. relocated its East Coast distribution operations from New Jersey to Panattoni Development Co.'s new Virginia I-95 Distribution development.

Transmittal Letter

- Wegmans Food Markets is set to build a 1.1 million-square-foot facility on about 220 acres just east of Hanover County Municipal Airport. The \$175 million project would create 700 full-time jobs, 140 or so of which would be executive-level positions.
- Facebook continues to build a \$2 billion data center campus that eventually will house 2.4 million square feet on 172 acres in the White Oak Technology Park.
- QTS Data Centers is planning to construct about 1.2 million square feet of new data center space and grow its footprint on 210 acres it owns nearby at 6020 Technology Blvd.
- Virginia Commonwealth University (“VCU”), located in the heart of Richmond with an enrollment in excess of 31,000 students, continues to be a key factor in new development. VCU and its health system plan to invest \$3.5 billion in the region over the next 12 to 15 years. Recently completed projects include an \$80 million, 154,100 square foot, technology infused, state-of-the-art, School of Allied Health Professions building.
- In the Riverfront area, Locks Tower was completed in 2020 with 3 buildings featuring an 11-story residential tower, parking garage, and 4-story building facing the Canal Walk. There are 237 luxury apartments and 11 roof top penthouses, 4,000 square foot street level commercial space, and 358 parking spaces.
- The Virginia War Memorial completed a 28,000 square foot expansion in February 2020 which includes an underground parking deck with 170+ spaces, 300-seat auditorium, long-distance learning center, additional gallery, and office space. This includes expansion of the Memory Wall which creates more space to honor those who have died in Afghanistan, Iraq, and the ongoing War on Terrorism.
- In Chesterfield County, the Meadowville Technology Park continues to be a cornerstone of future economic growth in the County. Located at Interstate 295 and Meadowville Road, development in the park includes a one million square foot Amazon fulfillment center, a 242,000 square foot data center for Capital One, a 404,000 square foot distribution center for Medline Industries, and a 557,000 square foot manufacturing and bottling operation for Niagara Bottling.

Financial Policies

The Authority’s financial policies serve as guidelines for both the financial planning and internal financial management of the Authority. These policies represent a combination of required practices under existing bond documents and recommended best practices. The Authority’s Board of Directors formally adopted a comprehensive set of financial policies with a focus on five key areas: financial planning, revenue and expenses, debt management, reserve funds, and accounting and financial reporting. In March 2016, the Board amended the reserve fund policy to establish a minimum balance of between one and two years of the annual Expressway System operating budget in order to meet liquidity goals.

Transmittal Letter

Awards and Acknowledgments

The Government Finance Officers Association of the United States and Canada ("GFOA") presented a Certificate of Achievement for Excellence in Financial Reporting to the Authority for its CAFR for the fiscal year ended June 30, 2019. This was the twenty-sixth consecutive year that the Authority has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized CAFR. This report must satisfy both generally accepted accounting principles and applicable legal requirements. A Certificate of Achievement is valid for a period of one year only. The Authority intends to submit its fiscal year 2020 CAFR to the GFOA for award consideration.

The Authority also received the GFOA's Distinguished Budget Presentation Award for its fiscal year 2020 budget for the sixth consecutive year. In order to receive this award, a governmental unit must publish a budget document that meets program criteria as a policy document, as an operations guide, as a financial plan, and as a communications device. This award is valid for a period of one year only. The Authority believes its fiscal year 2021 budget continues to conform to program requirements and has submitted it to the GFOA to determine its eligibility for another award.

Preparation of this report was made possible by the dedicated service of the staff of the Finance Department; we appreciate the contributions from each staff member in the preparation of this report. In closing, we would like to thank the Board of Directors for their continued leadership and support in planning and conducting the financial affairs of the Authority in a responsible and progressive manner.

Sincerely,

Joi Dean

Report of Independent Auditor

To the Board of Directors
Richmond Metropolitan Transportation Authority
Richmond, Virginia

Report on the Financial Statements

We have audited the accompanying financial statements of the Richmond Metropolitan Transportation Authority (the "Authority"), as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise the Authority's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America, the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, and the *Specifications for Audits of Authorities, Boards, and Commissions*, issued by the Auditor of Public Accounts of the Commonwealth of Virginia. Those standards and specifications require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the Richmond Metropolitan Transportation Authority, as of June 30, 2020, and the respective changes in its financial position and its cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, pension and other postemployment benefit trend information, and modified approach for reporting infrastructure information, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the Authority's basic financial statements. The Introductory and Statistical Sections are presented for purposes of additional analysis and are not a required part of the basic financial statements. The Introductory and Statistical Sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated September 30, 2020, on our consideration of the Authority's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Authority's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Authority's internal control over financial reporting and compliance.

Richmond, Virginia
September 30, 2020

Management's Discussion and Analysis

This section presents management's discussion and analysis of the financial performance of the Richmond Metropolitan Transportation Authority (the "Authority" or "RMTA") during the fiscal year ended June 30, 2020. This section should be read in conjunction with the transmittal letter in the introductory section of this report and the Authority's basic financial statements, which immediately follow this section.

Financial Highlights

Assets and deferred outflows of resources exceeded liabilities and deferred inflows of resources at the close of the fiscal year by \$151.5 million (net position), an increase of \$4.5 million or 3.1%. This increase in net position is primarily due to increases in assets and reduction of liabilities as a result of operations.

Operating revenues of \$37.1 million decreased by 15.2%, primarily from a significant decrease in traffic volume due to the novel coronavirus ("COVID-19") pandemic (13.7%) and rental revenues (93.4%) due to the transfer of Main Street operations to the City of Richmond, Virginia. Operating expenses of \$26.0 million decreased by 17.7% primarily due to schedule changes in planned Expressway System preservation and capital maintenance projects and lower depreciation.

Overview of the Financial Statements

The discussion and analysis provided here are intended to serve as an introduction to the Authority's basic financial statements. The Authority's basic financial statements consist of two components: 1) fund financial statements and 2) the notes to financial statements. This report also includes required supplementary information intended to furnish additional detail to support the basic financial statements themselves.

The financial statements provide both long-term and short-term information about the Authority's overall financial status. The financial statements also include notes that explain some of the information in the financial statements and provide more detailed data. The statements are followed by a section of required supplementary information and a section of other statistical information that further explains and supports the information in the financial statements.

The Authority's financial statements are prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP") as applied to government units on an accrual basis. Under this basis of accounting, revenues are recognized in the period in which they are earned, expenses are recognized in the period in which they are incurred, and depreciation of assets is recognized in the Statement of Revenues, Expenses, and Changes in Net Position. All assets, liabilities, and net position associated with the operation of the Authority are included in the Statement of Net Position. Net position – the difference between assets plus deferred outflows minus liabilities plus deferred inflows – is one way to measure the Authority's financial health or position.

Management's Discussion and Analysis

Overall Financial Position Analysis

The following table presents a summary of the Authority's financial position for fiscal years 2020 and 2019, followed by a description of significant changes. See Note 1 to the financial statements for additional information.

	<u>FY2020</u>	<u>FY2019</u>	<u>\$ Change</u>	<u>% Change</u>
Assets				
Current and other assets	\$ 88,321,008	\$ 90,502,286	\$ (2,181,278)	-2.4%
Capital assets	<u>212,257,798</u>	<u>212,380,064</u>	<u>(122,266)</u>	-0.1%
Total assets	<u>300,578,806</u>	<u>302,882,350</u>	<u>(2,303,544)</u>	-0.8%
Deferred outflows of resources	<u>6,616,051</u>	<u>7,582,587</u>	<u>(966,536)</u>	-12.7%
Total assets and deferred outflows of resources	<u>\$ 307,194,857</u>	<u>\$ 310,464,937</u>	<u>\$ (3,270,080)</u>	-1.1%
Liabilities				
Current liabilities	\$ 14,199,044	\$ 14,426,668	\$ (227,624)	-1.6%
Long-term liabilities	<u>140,438,435</u>	<u>148,420,067</u>	<u>(7,981,632)</u>	-5.4%
Total liabilities	<u>154,637,479</u>	<u>162,846,735</u>	<u>(8,209,256)</u>	-5.0%
Deferred inflows of resources	<u>1,105,000</u>	<u>704,178</u>	<u>400,822</u>	56.9%
Net position (deficit)				
Net investment in capital assets	113,156,510	107,301,010	5,855,500	5.5%
Restricted	51,225,587	52,681,124	(1,455,537)	-2.8%
Unrestricted	<u>(12,929,719)</u>	<u>(13,068,110)</u>	<u>138,391</u>	-1.1%
Total net position	<u>151,452,378</u>	<u>146,914,024</u>	<u>4,538,354</u>	3.1%
Total liabilities, deferred inflows of resources, and net position	<u>\$ 307,194,857</u>	<u>\$ 310,464,937</u>	<u>\$ (3,270,080)</u>	-1.1%

- Current and other assets of \$88.3 million decreased as a result of operations.
- Capital assets of \$212.3 million decreased due to routine depreciation (\$0.2 million).
- Deferred outflows of resources decreased primarily in FY2020 due to amortization of refunding losses (\$1.33 million) offset by a \$0.3 million increase related to pensions and a \$29 thousand increase related to Other Postemployment Benefits ("OPEB").
- Current liabilities decreased primarily due to a decrease in accounts payable at fiscal year-end as a result of timing and operating activity.
- Long-term liabilities decreased primarily as a result of debt service payments (\$7.3 million).
- Deferred inflows of resources increased primarily as a result of OPEB \$0.4 million.
- Restricted net position represents resources restricted for the payment of debt service or capital projects (repairs and contingency). Resources generated as a result of fiscal year 2020 operations were classified as restricted based on the Authority's upcoming capital needs.
- Net position, unrestricted represents the residual net position that does not meet the definition of "net investment in capital assets" or "restricted". Unrestricted net position is reduced by the outstanding principal liability for Series 2011-D debt.

Management's Discussion and Analysis

Overall Revenue and Expense Analysis

The following table presents a summary of the Authority's revenues, expenses, and change in net position for fiscal years 2020 and 2019, followed by a description of significant changes. See Note 1 to the financial statements for additional information.

	FY2020	FY2019	\$ Change	% Change
Tolls	\$ 37,004,506	\$ 42,876,941	\$ (5,872,435)	-13.7%
Rental	53,722	816,515	(762,793)	-93.4%
Other	1,132	23,669	(22,537)	-95.2%
Total operating revenues	37,059,360	43,717,125	(6,657,765)	-15.2%
Operating expenses	26,018,680	31,617,351	(5,598,671)	-17.7%
Operating income	11,040,680	12,099,774	(1,059,094)	-8.8%
Nonoperating expenses	(6,502,326)	(6,170,502)	(331,824)	5.4%
Change in net position	4,538,354	5,929,272	(1,390,918)	-23.5%
Beginning net position	146,914,024	140,984,752	5,929,272	4.2%
Ending net position	<u>\$ 151,452,378</u>	<u>\$ 146,914,024</u>	<u>\$ 4,538,354</u>	3.1%

- Operating revenues of \$37.1 million decreased primarily due to a decrease in traffic volume as a result of the COVID-19 pandemic. Additionally, rental revenues decreased (\$0.8 million) due to the transfer of Main Street operations to the City of Richmond.
- Operating expenses of \$26.0 million decreased primarily due to a decrease in fiscal year 2020 Expressway System preservation and capital maintenance projects due to schedule changes (\$3.6M), Main Street operations (\$1.3 million) and depreciation (\$0.2 million). Preservation and capital maintenance routinely varies between years based on capital plan requirements.

The following table summarizes the change in net position by fund.

	FY2020	FY2019	\$ Change	% Change
Expressway System	\$ 151,452,378	\$ 146,914,024	\$ 4,538,354	3.1%
Total	<u>\$ 151,452,378</u>	<u>\$ 146,914,024</u>	<u>\$ 4,538,354</u>	3.1%

Net position consists of the (1) net investment in capital assets, (2) restricted assets less liabilities and deferred inflows, and (3) unrestricted assets which is the residual amount of net position not included in net investment in capital assets and restricted assets.

Management's Discussion and Analysis

Capital Assets

The Authority's capital assets consist of roads, bridges, tunnels and land that comprise the Expressway System, along with other buildings, vehicles and equipment, and systems. As of June 30, 2020, capital assets net of accumulated depreciation decreased from \$212.4 million to \$212.3 million, primarily due to routine depreciation (\$0.2 million). The change in capital assets is summarized by asset type below:

	FY2020	FY2019	\$ Change	% Change
Expressway System	\$ 209,969,531	\$ 209,969,531	\$ -	0.0%
Buildings	2,049,806	2,122,947	(73,141)	-3.4%
Vehicles and equipment	185,965	228,233	(42,268)	-18.5%
Systems	-	-	-	-
Leasehold	52,496	59,353	(6,857)	100.0%
Total	<u>\$ 212,257,798</u>	<u>\$ 212,380,064</u>	<u>\$ (122,266)</u>	-0.1%

See Note 5 for additional information relative to capital assets.

The Authority has elected to use the modified approach to account for certain infrastructure assets, as provided for in GAAP wherein the Authority does not record depreciation expense nor are amounts capitalized in connection with improvements to these assets, unless the improvements expand the capacity, technology or efficiency of the asset; the Expressway System is accounted for using this modified approach. Utilization of this approach requires the Authority to commit to maintaining and preserving affected assets at or above a condition level established by the Authority, maintain an inventory of the assets, perform periodic condition assessments to ensure that the condition level is being maintained, and make annual estimates of the amounts that must be expended to maintain and preserve assets at the predetermined condition levels. For fiscal year 2020, the Authority spent approximately \$11.1 million to preserve and maintain the Expressway System at or above this level.

The Authority utilizes its independent Consulting Engineer to perform annual pavement condition assessments and bridge inspections. The latest condition assessment and inspection reports, along with the spending noted above, indicate the Authority is in compliance with its established condition levels. See additional information in the Required Supplementary Information section of this document.

Debt Administration

At June 30, 2020, outstanding bonds payable of \$148.3 million decreased by \$7.3 million or 4.7% from the prior year, primarily due to scheduled debt service payments. The total outstanding bonds payable is comprised of \$144.1 million in Expressway System parity debt and related issuance premiums of \$4.2 million. Principal in the amount of \$7.7 million is payable on July 15, 2020. See Notes 7 and 8 for additional detail.

Economic Factors and Next Year's Budget

Residents of the surrounding counties, commuting daily to employment centers and cultural activities in downtown Richmond, represent the primary users of the Authority's Expressway System. Expressway System traffic levels are closely related to area employment, which directly impacts the number of daily commuter trips.

Management's Discussion and Analysis

Due to the COVID-19 pandemic, unemployment has increased in the Richmond metropolitan area. Regional unemployment of 8.9% in June 2020 increased compared to 3.1% in the prior year. The regional unemployment rate is slightly higher than the state-wide rate of 8.1% and it compares favorably to the national rate of 11.1%. Regional population has increased over the past decade, as illustrated in Table 17 in the statistical section.

Traffic levels are illustrated at Table 18 in the statistical section for the past decade. FY2020 traffic volumes of 56.5 million decreased compared to the traffic levels in 2019 by 12.9%; accordingly, traffic and revenue forecasts were adjusted correspondingly and remain very conservative in light of the current economic environment. The FY2021 budget was prepared conservatively, incorporating the best known impact of the COVID-19 pandemic. FY2021 toll revenues are projected to total \$34.6 million with 54.9 million total transactions.

Expressway System tolls were last increased in September 2008 and remain unchanged for next fiscal year. Table 13 in the statistical section illustrates current and historical toll rates.

Contacting the Authority's Financial Management

This report is designed to provide our bondholders, patrons, and other interested parties with a general overview of the Authority's finances and to demonstrate the Authority's accountability for the money it receives. If you have questions concerning this report or require additional information, contact the Richmond Metropolitan Transportation Authority, Attention: Director of Finance, 901 East Byrd St., Suite 1120, Richmond, Virginia 23219. Interested parties may also call (804) 523-3300.

Net change in fair value of investments	\$ 554,616

The accompanying notes are an integral part of these statements.

Notes to Basic Financial Statements

Note 1 – Summary of significant accounting policies

Reporting entity

The Richmond Metropolitan Transportation Authority (the “Authority”) was created in March 1966 by an Act of the General Assembly of the Commonwealth of Virginia for the initial purpose of constructing and operating a toll expressway system to serve the Richmond metropolitan area. In 1973, the Act was amended to authorize the Authority to provide vehicular parking facilities for the Richmond metropolitan area. An additional amendment in 1984 authorized the Authority to acquire land, to construct and own a baseball stadium, and to lease such land, stadium, and attendant facilities. In 1992, another amendment authorized the Authority to own and operate sports facilities of any nature including facilities reasonably related thereto and lease such facilities as the Authority may prescribe. In 2016, another amendment authorized the Authority to construct, own, and operate coliseums and arenas.

The Authority is empowered to issue revenue bonds which shall be payable from revenues derived from the operation of the facilities. In addition, the Authority is empowered to issue bonds for the purpose of refunding any revenue bonds. Under the provisions of the Act, no bond issue of the Authority or any interest thereon is an obligation of the Commonwealth of Virginia or other government entity. The Expressway System bond resolution provides that when all related revenue bonds and interest thereon have been paid, the Expressway System will become the property of the City of Richmond, Virginia (the “City”). The resolution authorizing the issuance of bonds prohibit the commingling of funds of the Authority’s various enterprises and prescribe the establishment of certain funds and accounts to receive revenues and transfers and make payments in accordance with the prescribed sequence.

Legislation was introduced and passed during the 2014 General Assembly session that changed the Authority’s name to the Richmond Metropolitan Transportation Authority and equalized representation on the Authority’s Board of Directors. Previously, the Authority’s 11 member Board included six members appointed by the Mayor of the City, with the approval of City Council, and two each by the Boards of Supervisors of the Counties of Chesterfield and Henrico. The Commonwealth Transportation Commissioner appointed the 11th member from the Commonwealth Transportation Board.

The Authority’s Board is comprised of 16 members. The City and Counties of Chesterfield and Henrico each are authorized to appoint five members to the Board, with the option of one member from each jurisdiction being an elected official. The Commonwealth Transportation Commissioner is authorized to appoint the 16th member from the Commonwealth Transportation Board. Reappointment remains the sole responsibility of the aforementioned entities.

Basis of presentation

The Authority administers two enterprise funds: Expressway System and Main Street Station, and both are considered major funds. Each enterprise fund is used to separate the Authority’s resources and liabilities by facility. The Authority also maintains two sub-funds: Repair and Contingency and Central Administration.

The Repair and Contingency (“R&C”) sub-fund is used to account for all Expressway System preservation and capital maintenance expenses, as well as new construction projects. The bond indenture requires that the Authority maintain an R&C sub-fund for the purpose of accumulating funds, as determined by the Authority’s Consulting Engineers, sufficient to maintain the assets of the Expressway System. Monthly, after satisfying operating and debt service requirements as specified by the bond indenture, the Authority transfers excess funds from the Expressway System revenue account to the R&C sub-fund.

Notes to Basic Financial Statements

Qualifying expenses are capitalized in accordance with established policy, while the remaining expenses are reflected in the Expressway System fund at the Statement of Revenues, Expenses, and Change in Net Position as “Preservation and capital maintenance”.

The Central Administration sub-fund is used to accumulate and allocate central administration expenses. Monthly, budgeted costs are allocated to the enterprise funds based on an allocation formula established during the annual budget process. At year-end, budgeted allocations are adjusted to reflect actual expenses for the year, which results in zero change in net position (net income). Any assets or liabilities of the sub-fund at year end are reflected in Statement of Net Position in the Expressway System.

Measurement focus and basis of accounting

The funds of the Authority are reported using the economic resources measurement focus and the accrual basis of accounting.

The preparation of financial statements, in conformity with accounting principles generally accepted in the United States of America (“GAAP”), requires management of the Authority to make estimates and judgments that affect the reported amounts of assets and liabilities and the disclosures and contingencies at the date of the financial statements and revenues and expenses recognized during the reporting period. Actual results could differ from those estimates.

Assets, liabilities, deferred outflows/inflows of resources, and net position

Cash and cash equivalents – For purposes of the Statement of Cash Flows, only cash on hand and cash balances on deposit and available for immediate withdrawal are considered cash equivalents. Other highly liquid instruments are classified as other short-term investments.

Investments – The Authority’s investment policy is determined by the Board. Permitted investments are set within the policy. Written investment objectives and procedures are developed by the staff in consultation with the Investment Committee. The Investment Committee meets quarterly to review the portfolio performance, confirm compliance to the policy, and formulate an investment plan for the next quarter.

Investments with an original maturity greater than one year are recorded at their fair value and all investment income, including changes in the fair value of investments, are reported as investment income in the financial statements. Investments with an original maturity of less than one year are carried at amortized cost. Fair value measurements are categorized within the fair value hierarchy and are based on the valuation inputs used to measure the fair value of the asset. The inputs are categorized into levels with highest priority given to unadjusted quoted prices in active markets (Level 1) and the lowest priority to unobservable inputs (Level 3).

Investments consist of securities with an original maturity greater than three months and include United States government and agency obligations and certificates of deposit.

Fair value measurements – The Authority categorizes its fair value measurements within the fair value hierarchy established by GAAP. The hierarchy is based on the valuation inputs used to measure the fair value of the asset: Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

Notes to Basic Financial Statements

Restricted assets – The Expressway System bond indenture restricts certain assets and, accordingly, these funds are reflected on the Statement of Net Position in their current and non-current components. Restricted assets include bond retirement principal and interest accounts, bond reserve funds, and R&C sub-fund accounts. These funds are administered and maintained by the Authority's trustee, except for the R&C sub-fund, which is administered by the Authority.

Capital assets – Capital assets are stated at cost incurred during the construction period. All land and non-depreciable land improvements are capitalized, regardless of cost. Construction in progress consists of costs capitalized in connection with construction of and improvements to facilities.

All expenses, including equipment and furnishings, are capitalized if they are related to the construction or occupancy of a new facility, or a major renovation of an existing facility that enhances the efficiency or functionality of the asset. The costs of normal maintenance and repairs that do not add to the value of assets or materially extend asset lives are not capitalized. Any expense in connection with maintaining an existing facility in good working order is expensed. Other assets are capitalized if the cost is over \$10,000 and useful life is longer than one year.

The Authority has elected to use the "modified approach" to account for certain infrastructure assets, as provided for in GAAP wherein the Authority does not record depreciation expense nor are amounts capitalized in connection with improvements to these assets, unless the improvements expand the capacity, technology or efficiency of the asset. Utilization of this approach requires the Authority to: 1) commit to maintaining and preserving affected assets at or above a condition level established by the Authority, 2) maintain an inventory of the assets and perform periodic condition assessments to ensure that the condition level is being maintained, and 3) make annual estimates of the amounts that must be expended to maintain and preserve assets at the predetermined condition levels. Bridges and roadways maintained by the Authority are accounted for using the modified approach.

Land, construction in progress, and the Expressway System are not depreciated. Other capital assets are depreciated using the straight line method over the following estimated useful lives: buildings – 40 years; systems – 5 to 7 years; vehicles and equipment – 3 to 8 years.

Deferred outflows of resources – In addition to assets, the Statement of Net Position will sometimes report a separate section for deferred outflows of resources. This separate financial element represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources until then. The Authority has three items that qualify for reporting in this category: accounting loss on debt refunding, deferred outflows of resources related to pensions, deferred outflows of resources related to Other Postemployment Benefits ("OPEB"). Deferred losses on refundings are recognized as a component of interest expense over the shorter of the life of the old debt or new debt (see Note 8). Deferred outflows of resources related to pensions are amortized as follows: resulting from contributions subsequent to the measurement date are recognized as a reduction of the net pension liability in the next fiscal year, changes in actuarial assumptions are amortized over the remaining service life of all participants (see Note 10). Deferred outflows of resources related to OPEB are amortized as follows: resulting from contributions subsequent to the measurement date are recognized as a reduction of the net OPEB liability in the next fiscal year and differences in change in the proportionate share of the total liability, and expected and actual plan experience are amortized over the remaining service life of all plan participants and net differences between projected and actual investment earnings are amortized over a closed five-year period (See Notes 11 and 12).

Notes to Basic Financial Statement

Deferred inflows of resources – In addition to liabilities, the Statement of Net Position will sometimes report a separate section for deferred inflows of resources. This separate financial element represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources until that time. The Authority has three items that qualify for reporting in this category: deferred inflows related to pensions, which represents net differences between projected and actual investment earnings amortized over a closed five-year period and the difference between expected and actual experience and changes in assumptions amortized over the remaining service life of all plan participants (see Note 10); deferred inflows of resources related to OPEB, which represent net differences between projected and actual investment earnings amortized over a closed five-year period (see Note 11); and deferred inflows of resources related to OPEB Group Life Insurance (GLI) resulting from, net differences between projected and actual investment earnings are amortized over a closed five-year period and the differences in expected and actual plan experience, changes in proportion, and changes of assumptions amortized over the remaining service life of all plan participants (see Note 12).

Pensions – The Virginia Retirement System (“VRS” or “System”) Retirement Plan is a multi-employer, agent plan. For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Authority’s Retirement Plan and the additions to/deductions from the Authority’s Retirement Plan’s net fiduciary position have been determined on the same basis as they were reported by the VRS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

OPEB - The Authority provides postemployment health care benefits through a single-employer defined benefit plan. The Authority participates in the Virginia Pooled OPEB Trust Fund, which accumulates assets and is a multi-employer, agent plan. For purposes of measuring the net OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the Trust and the additions to/deductions from the Authority’s net fiduciary position have been determined on the same basis as they were reported by the Virginia Municipal League. For this purpose, benefit payments are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Group Life Insurance OPEB - The VRS (“GLI”) Program is a multiple employer, cost-sharing plan. It provides coverage to state employees, teachers, and employees of participating political subdivisions. The GLI Program was established pursuant to §51.1-500 et seq. of the *Code of Virginia*, as amended, and which provides the authority under which benefit terms are established or may be amended. The GLI Program is a defined benefit plan that provides a basic group life insurance benefit for employees of participating employers. For purposes of measuring the net GLI Program OPEB liability, deferred outflows of resources and deferred inflows of resources related to the GLI Program OPEB, and GLI Program OPEB expense, information about the fiduciary net position of the VRS GLI Program OPEB and the additions to/deductions from the VRS GLI OPEB’s net fiduciary position have been determined on the same basis as they were reported by VRS. In addition, benefit payments are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Notes to Basic Financial Statement

Net position flow assumptions – Sometimes the Authority will fund outlays for a particular purpose from both restricted and unrestricted resources. In order to calculate the amounts to report as restricted – net position and unrestricted – net position, a flow assumption must be made about the order in which the resources are considered to be applied. It is the Authority’s policy to consider restricted – net position to have been depleted before unrestricted – net position is applied.

Net position policies – Net position is classified as net investment in capital assets; restricted; and unrestricted. Restricted net position represents constraints on resources that are either externally imposed by creditors, contributions, or laws and regulations of other governments, or imposed by law through state statute.

Revenues and expenses

Operating and nonoperating revenues and expenses – Operating revenues and expenses are those that result from providing services and producing and delivering goods in connection with the Authority’s principal ongoing operation. The principal operating revenues of the Authority are charges to customers for tolls and facility rentals. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

Compensated absences – The Authority’s policy permits employees to accumulate earned but unused paid time off benefits. A liability for compensated absences is accrued when incurred. The current portion of the liability is estimated based on historical leave usage.

Governmental Accounting Standards Board (“GASB”) Pronouncements

The GASB has issued the following statements with effective implementation dates later than the fiscal year ending June 30, 2020. The statements deemed to have a potential future impact on the Authority are:

- GASB Statement No. 84, *Fiduciary Activities* – This Statement improves guidance regarding the identification of fiduciary activities for accounting and financial reporting purposes and how these activities should be reported.
- GASB Statement No. 87, *Leases* – This Statement establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset.
- GASB Statement No. 95, *Postponement of the Effective Dates of Certain Authoritative Guidance* - This Statement postpones several pronouncements to provide temporary relief in light of the COVID-19 pandemic. GASB Statement No 84 was postponed one year and GASB Statement No 87 was postponed 18 months.

Notes to Basic Financial Statement

Note 2 – Cash and cash equivalents

At June 30, 2020, the carrying amount of deposits with banks was \$16,518,446 with \$11,743,226 being restricted for repairs and contingency. The bank balance of these deposits at June 30, 2020 was \$17,836,840. The difference between the carrying and bank totals is primarily due to outstanding checks and deposits in transit. These amounts include petty cash and change funds of \$115,500.

Bank deposits are insured by federal depository insurance or collateralized in accordance with the Virginia Security for Public Deposits Act. Under the Act, banks holding public deposits in excess of the amounts insured by the Federal Deposit Insurance Corporation must pledge collateral in the amount of 50% of excess deposits to a collateral pool in the name of the State Treasury Board. The State Treasury Board is responsible for monitoring compliance with the collateralization and reporting requirements of the Act and for notifying local governments of compliance by banks. A multiple financial institution collateral pool that provides for additional assessments is similar to depository insurance. If any member financial institution fails, the entire assets of the collateral pool become available to satisfy the claims of governmental entities. If the value of the pool's collateral is inadequate to cover a loss, additional amounts would be assessed on a pro rata basis to the members of the pool.

Note 3 – Investments

As of June 30, 2020, the Authority had the following investments:

Investment Type	Fair Value	Weighted Average Maturity (Years)	Credit Rating (Moody's, S&P)	% of Total Portfolio
US Federally Insured Money Market	\$25,472,603	0.01	Aaa-mf, AAAm	36.7%
US Treasuries	24,039,484	1.05	NA, NA	34.7%
Federal Home Loan Bank	13,669,800	1.92	AAA, AA+	19.7%
Federal National Mortgage Association	4,546,603	1.19	AAA, AA+	6.6%
Federal Home Loan Mortgage Corporation	1,590,160	0.38	AAA, AA+	2.3%
	<u>\$69,318,650</u>	<u>4.53</u>		

The Authority classifies its investments using the fair value hierarchy established by generally accepted accounting principles as follows:

Investment Type	Total Fair Value at 6/30/20	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Debt Securities:				
US Treasuries	\$ 24,039,484	\$ -	\$ 24,039,484	\$ -
Federal Home Loan Bank	13,669,800	-	13,669,800	-
Federal National Mortgage Association	4,546,603	-	4,546,603	-
Federal Home Loan Mortgage Corporation	1,590,160	-	1,590,160	-
Total Debt Securities	<u>43,846,047</u>	<u>\$ -</u>	<u>\$ 43,846,047</u>	<u>\$ -</u>
Investments measured at amortized cost:				
US Federally Insured Money Market	<u>25,472,603</u>			
Total investments measured at fair value	<u>\$ 69,318,650</u>			

Notes to Basic Financial Statements

Debt securities classified as Level 2 of the fair value hierarchy are valued using a matrix pricing technique. Matrix pricing is used to value securities based on the securities' relationship to benchmark quoted prices.

Certain funds are held as restricted investments because their use is limited by the terms of applicable bond covenants. The Authority's investments are classified as follows:

Purpose	Restricted	Unrestricted	Total
Bond retirement principal and interest	\$ 11,514,871	\$ -	\$ 11,514,871
Debt service reserves	13,346,876	-	13,346,876
Restricted for Repair and Contingency	19,276,480	-	19,276,480
Reserve funds	13,825,687	11,354,736	25,180,423
	<u>\$ 57,963,914</u>	<u>\$ 11,354,736</u>	<u>\$ 69,318,650</u>

Interest rate risk – As a means of limiting exposure to fair value losses arising from rising interest rates, the Authority's investment policy limits the investment of funds to investments with a stated maturity of no more than five years from the date of purchase.

Credit risk – The *Code of Virginia* and other applicable law, the Authority's bond indentures, and the Authority's investment policy adopted by the Board of Directors, limit credit risk by restricting authorized investments to obligations of and obligations guaranteed by the Commonwealth of Virginia or any of its counties, cities, towns, districts, authorities, or public bodies, obligations of and obligations guaranteed by the United States or certain of its agencies, and certain other instruments of specified quality and rating as dictated by the resolutions.

Concentration of credit risk – The *Code of Virginia* and the Authority's investment policy place no limit on the amount the Authority may invest in any one issuer. The composition of the Authority's total investment portfolio by issuer can be found above.

Note 4 – Receivables

Receivables at June 30, 2020 for the Authority totaled \$2,763. Management has evaluated the outstanding receivables at year-end and deem them to be collectible, therefore no allowance provision was considered necessary.

Notes to Basic Financial Statements

Note 5 – Capital Assets

Capital assets activity for the year ended June 30, 2020 was as follows:

Type	June 30, 2019	Additions	Deletions	June 30, 2020
Non-depreciable:				
Expressway System	\$ 209,969,531	\$ -	\$ -	\$ 209,969,531
Depreciable:				
Buildings	2,925,621	-	-	2,925,621
Vehicles & Equipment	763,352	38,494	-	801,846
Office Furniture & Equipment	135,433	-	-	135,433
Toll Systems	8,508,652	-	-	8,508,652
Leasehold	68,578	-	-	68,578
Total depreciable	12,401,636	38,494	-	12,440,130
Total assets	222,371,167	38,494	-	222,409,661
Less accumulated depreciation:				
Buildings	(802,674)	(73,141)	-	(875,815)
Vehicles & Equipment	(647,566)	(64,075)	-	(711,641)
Office Furniture & Equipment	(22,986)	(16,687)	-	(39,673)
Toll Systems	(8,508,652)	-	-	(8,508,652)
Leasehold	(9,225)	(6,857)	-	(16,082)
Total accumulated depreciation	(9,991,103)	(160,760)	-	(10,151,863)
Total depreciable, net	2,410,533	(122,266)	-	2,288,268
Total capital assets, net	\$ 212,380,064	\$ (122,266)	\$ -	\$ 212,257,798

Depreciation expense for the year ended June 30, 2020 was \$160,761. The Authority has elected to use the “modified approach” to account for certain Expressway System infrastructure assets. Consequently, these assets are not depreciated (see Note 1, Capital Assets).

Note 6 – Payables and accrued liabilities

Payables and accrued liabilities at June 30, 2020 for the Authority consisted of:

Type	Expressway System
Current:	
Due to other governments	\$ 268,405
Salaries and benefits	190,385
Compensated absences	348,035
Other accounts payable	2,182,394
Total current	\$ 2,989,219
Noncurrent:	
Compensated absences	\$ 155,752

Notes to Basic Financial Statement

Note 7 – Long-term liabilities

Long-term liabilities at June 30, 2020 for the Authority consisted of:

Type	June 30, 2019	Additions	Reductions	June 30, 2020	Due Within One Year
Bonds payable					
Series 1998	\$ 17,585,000	\$ -	\$ (4,260,000)	\$ 13,325,000	\$ 4,480,000
Series 2002	12,830,000	-	(2,960,000)	9,870,000	3,120,000
Series 2011 A, B, C	58,695,000	-	(19,035,000)	39,660,000	-

2017	Aug. 2017	19,735,000	4.50%	July 2041	19,355,000	1,723,368	1,465,397
2019	Aug. 2019	17,985,000	4.30%	July 2041	17,985,000	2,426,986	520,318
Previously defeased debt		-	-	-	-	-	358,793
					<u>\$ 144,070,000</u>	<u>\$ 4,244,553</u>	<u>\$ 5,338,264</u>

Series 1998

Revenue bonds were issued to refund \$76,725,000 of Series 1992 bonds. Certain of the 1998 bonds are subject to mandatory redemption at par plus accrued interest beginning in July 2013 continuing through the final maturity date in July 2022.

Series 2002

Revenue bonds were issued to refund a portion of Series 1992 bonds. The Series 2002 bonds may not be redeemed until maturity.

Notes to Basic Financial Statement

Series 2011-A, B, & C

Revenue bonds were issued to refund a portion of Series 1998 and Series 2002 bonds; fully refund Series 1999, Series 2000, Series 2005, Series 2006, and Series 2008 bonds; and fund various construction of \$22.3 million, including the Downtown Expressway Open Road Tolling Project.

Series 2011-D

Revenue bonds were issued and combined with other resources to pay \$22.8 million of subordinate notes and related accrued interest of \$39.4 million (total \$62.2 million) to the City. The Authority issued debt in 1975 to construct the Expressway System with a Moral Obligation from the City to cover debt service short falls. Between 1975 and 1991, the Authority transferred funds from debt service reserves in order to meet required debt service. The City provided contributions to restore the debt reserve fund balances after these transfers; accordingly, the Authority issued subordinate notes to the City for amounts equal to the City's contributions. Based on the non-capital nature of the subordinate notes, the outstanding principal liability for Series 2011-D is applied against unrestricted net position.

Series 2017

In August 2017, the RMTA participated in the Virginia Pooled Financing Program ("VPFP") of Virginia Resources Authority ("VRA") to issue Series 2017 bonds to advance refund \$18.8 million of the Series 2011-A bonds. The refunding lowers total debt service over \$2.6 million and approximately \$105,000 annually. The Net Present Value Savings of the transaction was \$1.86 million at a 2.97% effective interest rate.

Series 2019

In August 2019, the RMTA participated in the VPFP of VRA to issue Series 2019 bonds to advance refund \$19.0 million of the Series 2011-A and Series 2011-B bonds. The refunding lowers total debt service over \$4.2 million. The Net Present Value Savings of the transaction was \$3.1 million at a 2.64% effective interest rate.

Defeased bonds

At June 30, 2020, outstanding bonds in the amount of \$6,255,000 are considered defeased. Investments and cash are held in an irrevocable trust with an escrow agent to provide for all future debt service payments on the defeased bonds. Accordingly, the trust account assets and the liabilities for defeased bonds are not included in the accompanying financial statements.

Escrow asset

The escrow receivable was created by funds transferred from the Expressway System revenue account for the early retirement of defeased bonds, as required by the 1992 bond resolution. The Authority has directed the trustee, to the extent possible, to purchase Series 1998 bonds in the open market from these funds. No purchases were made during the fiscal year. As a result of the Series 2011 refunding, no additional transfers to escrow will occur.

Arbitrage

Expressway System bond issues are reviewed annually to ensure compliance with the Internal Revenue Service regulations regarding arbitrage rebates. As of June 30, 2020 none of the bond series are accruing an arbitrage rebate liability.

Notes to Basic Financial Statement

Debt service requirements

Remaining debt service requirements on the Expressway System bonds are scheduled as follows:

Fiscal Year	Principal	Interest	Total
2021	7,650,000	6,726,270	14,376,270
2022	8,050,000	6,314,458	14,364,458
2023	7,650,000	5,902,548	13,552,548
2024	4,050,000	5,606,562	9,656,562
2025	4,245,000	5,408,217	9,653,217
2026-2030	24,490,000	23,678,204	48,168,204
2031-2035	30,910,000	17,070,300	47,980,300
2036-2040	38,860,000	8,849,160	47,709,160
2041-2042	18,165,000	837,814	19,002,814
	<u>\$ 144,070,000</u>	<u>\$ 80,393,532</u>	<u>\$ 224,463,532</u>

Note 9 – Disposal of Government Operations

Main Street Station – On July 1, 2019, the operating agreement with the City of Richmond to provide management services for Main Street Station expired and was not renewed. All Main Street Station fund assets were remitted to the City and the City took over the remaining receivables and liabilities of the Main Street Station. There were no revenues or expenses for this operation in fiscal year 2020.

Note 10 – Defined benefit pension plan

Plan description

All full-time, salaried permanent employees of the Authority are automatically covered by the VRS Retirement Plan upon employment. This plan is administered by the Virginia Retirement System (“System”) along with plans for other employer groups in the Commonwealth of Virginia. Members earn one month of service credit for each month they are employed and for which they and their employer pay contributions to VRS. Members are eligible to purchase prior service, based on specific criteria a defined in the *Code of Virginia*, as amended. Eligible prior service that may be purchased includes prior public service, active military service, certain periods of leave, and previously refunded service.

The System administers three different benefit structures for covered employees – Plan 1, Plan 2, and, Hybrid. Each of these benefit structures has a different eligibility criteria. The specific information for each plan and the eligibility for covered groups within each plan are set out below:

RETIREMENT PLAN PROVISIONS		
PLAN 1	PLAN 2	HYBRID RETIREMENT PLAN
About Plan 1 Plan 1 is a defined benefit plan. The retirement benefit is based on a member’s age, service credit and average final compensation at retirement using a formula.	About Plan 2 Plan 2 is a defined benefit plan. The retirement benefit is based on a member’s age, service credit and average final compensation at retirement using a formula.	About the Hybrid Retirement Plan The Hybrid Retirement Plan combines the features of a defined benefit plan and a defined contribution plan.

Notes to Basic Financial Statements

		• The defined benefit is based on a member's age, service credit and average final compensation at retirement using a formula. • The benefit from the defined contribution component of the plan depends on the member and employer contributions made to the plan and the investment performance of those contributions. • In addition to the monthly benefit payment payable from the defined benefit plan at retirement, a member may start receiving distributions from the balance in the defined contribution account, reflecting the contributions, investment gains or losses, and any required fees.
Eligible Members Employees are in Plan 1 if their membership date is before July 1, 2010, and they were vested as of January 1, 2013, and they have not taken a refund. Hybrid Opt-In Election VRS non-hazardous duty covered Plan 1 members were allowed to make an irrevocable decision to opt into the Hybrid Retirement Plan during a special election window held January 1 through April 30, 2014. The Hybrid Retirement Plan's effective date for eligible Plan 1 members who opted in was July 1, 2014.	Eligible Members Employees are in Plan 2 if their membership date is on or after July 1, 2010, or their membership date is before July 1, 2010, and they were not vested as of January 1, 2013. Hybrid Opt-In Election Eligible Plan 2 members were allowed to make an irrevocable decision to opt into the Hybrid Retirement Plan during a special election window held January 1 through April 30, 2014. The Hybrid Retirement Plan's effective date for eligible Plan 2 members who opted in was July 1, 2014.	Eligible Members Employees are in the Hybrid Retirement Plan if their membership date is on or after January 1, 2014. This includes: • Political subdivision employees* • Members in Plan 1 or Plan 2 who elected to opt into the plan during the election window held January 1-April 30, 2014; the plan's effective date for opt-in members was July 1, 2014 *Non-Eligible Members Some employees are not eligible to participate in the Hybrid Retirement Plan. They include: • Political subdivision employees who are covered by

Notes to Basic Financial Statements

If eligible deferred members returned to work during the election window, they were also eligible to opt into the Hybrid Retirement Plan. Members who were eligible for an optional retirement plan ("ORP") and had prior service under Plan 1 were not eligible to elect the Hybrid Retirement Plan and remain as Plan 1 or ORP.	If eligible deferred members returned to work during the election window, they were also eligible to opt into the Hybrid Retirement Plan. Members who were eligible for an optional retirement plan ("ORP") and have prior service under Plan 2 were not eligible to elect the Hybrid Retirement Plan and remain as Plan 2 or ORP.	enhanced benefits for hazardous duty employees Those employees eligible for an optional retirement plan ("ORP") must elect the ORP plan or the Hybrid Retirement Plan. If these members have prior service under Plan 1 or Plan 2, they are not eligible to elect the Hybrid Retirement Plan and must select Plan 1 or Plan 2 (as applicable) or ORP.
Retirement Contributions Employees contribute 5% of their compensation each month to their member contribution account through a pre-tax salary reduction. Member contributions are tax-deferred until they are withdrawn as part of a retirement benefit or as a refund. The employer makes a separate actuarially determined contribution to VRS for all covered employees. VRS invests both member and employer contributions to provide funding for the future benefit payment.	Retirement Contributions Same as Plan 1.	Retirement Contributions A member's retirement benefit is funded through mandatory and voluntary contributions made by the member and the employer to both the defined benefit and the defined contribution components of the plan. Mandatory contributions are based on a percentage of the employee's creditable compensation and are required from both the member and the employer. Additionally, members may choose to make voluntary contributions to the defined contribution component of the plan, and the employer is required to match those voluntary contributions according to specified percentages.
Service credit Service credit includes active service. Members earn service credit for each month they are employed in a covered position. It also may include credit for prior service the member has purchased or additional service credit the member was granted.	Service credit Same as Plan 1.	Service credit <u>Defined Benefit Component:</u> Under the defined benefit component of the plan, service credit includes active service. Members earn service credit for each month they are employed in a covered position. It also may include credit for prior service

Notes to Basic Financial Statements

A member's total service credit is one of the factors used to determine their eligibility for retirement and to calculate their retirement benefit. It also may count toward eligibility for the health insurance credit in retirement, if the employer offers the health insurance credit.		the member has purchased or additional service credit the member was granted. A member's total service credit is one of the factors used to determine their eligibility for retirement and to calculate their retirement benefit. It also may count toward eligibility for the health insurance credit in retirement, if the employer offers the health insurance credit. <u>Defined Contributions Component:</u> Under the defined contribution component, service credit is used to determine vesting for the employer contribution portion of the plan.
Vesting Vesting is the minimum length of service a member needs to qualify for a future retirement benefit. Members become vested when they have at least five years (60 months) of service credit. Vesting means members are eligible to qualify for retirement if they meet the age and service requirements for their plan. Members also must be vested to receive a full refund of their member contribution account balance if they leave employment and request a refund. Members are always 100% vested in the contributions that they make.	Vesting Same as Plan 1.	Vesting <u>Defined Benefit Component:</u> Defined benefit vesting is the minimum length of service a member needs to qualify for a future retirement benefit. Members are vested under the defined benefit component of the Hybrid Retirement Plan when they reach five years (60 months) of service credit. Plan 1 or Plan 2 members with at least five years (60 months) of service credit who opted into the Hybrid Retirement Plan remain vested in the defined benefit component. <u>Defined Contributions Component:</u> Defined contribution vesting refers to the minimum length of service a member needs to be eligible to withdraw the

Notes to Basic Financial Statements

		employer contributions from the defined contribution component of the plan. Members are always 100% vested in the contributions that they make. Upon retirement or leaving covered employment, a member is eligible to withdraw a percentage of employer contributions to the defined contribution component of the plan, based on service. • After two years, a member is 50% vested and may withdraw 50% of employer contributions. • After three years, a member is 75% vested and may withdraw 75% of employer contributions. • After four or more years, a member is 100% vested and may withdraw 100% of employer contributions. Distributions not required, except as governed by law.
Calculating the Benefit The basic benefit is determined using the average final compensation, service credit and plan multiplier. An early retirement reduction is applied to this amount if the member is retiring with a reduced benefit. In cases where the member has elected an optional form of retirement payment, an option factor specific to the option chosen is then applied.	Calculating the Benefit See definition under Plan 1.	Calculating the Benefit <u>Defined Benefit Component:</u> See definition under Plan 1 <u>Defined Contribution Component:</u> The benefit is based on contributions made by the member and any matching contributions made by the employer, plus net investment earnings on those contributions.

Notes to Basic Financial Statements

Average Final Compensation A member's average final compensation is the average of the 36 consecutive months of highest compensation as a covered employee.	Average Final Compensation A member's average final compensation is the average of their 60 consecutive months of highest compensation as a covered employee.	Average Final Compensation Same as Plan 2. It is used in the retirement formula for the defined benefit component of the plan.
Service Retirement Multiplier VRS: The retirement multiplier is a factor used in the formula to determine a final retirement benefit. The retirement multiplier for non-hazardous duty members is 1.70%.	Service Retirement Multiplier VRS: Same as Plan 1 for service earned, purchased or granted prior to January 1, 2013. For non-hazardous duty members the retirement multiplier is 1.65% for service credit earned, purchased or granted on or after January 1, 2013.	Service Retirement Multiplier Defined Benefit Component: VRS: The retirement multiplier for the defined benefit component is 1.00%. For members who opted into the Hybrid Retirement Plan from Plan 1 or Plan 2, the applicable multipliers for those plans will be used to calculate the retirement benefit for service credited in those plans.
Normal Retirement Age VRS: Age 65.	Normal Retirement Age VRS: Normal Social Security retirement age.	Normal Retirement Age Defined Benefit Component: VRS: Same as Plan 2. Defined Contribution Component: Members are eligible to receive distributions upon leaving employment, subject to restrictions.
Earliest Unreduced Retirement Eligibility VRS: Age 65 with at least five years (60 months) of service credit or at age 50 with at least 30 years of creditable service.	Earliest Unreduced Retirement Eligibility VRS: Normal Social Security retirement age with at least five years (60 months) of service credit or when their age and service equal 90.	Earliest Unreduced Retirement Eligibility Defined Benefit Component: VRS: Normal Social Security retirement age and have at least five years (60 months) of service credit or when their age and service equal 90.

Notes to Basic Financial Statements

		<u>Defined Contribution Component:</u> Members are eligible to receive distributions upon leaving employment, subject to restrictions.
Earliest Reduced Retirement Eligibility VRS: Age 55 with at least five years (60 months) of service credit or age 50 with at least 10 years of service credit.	Earliest Reduced Retirement Eligibility VRS: Age 60 with at least five years (60 months) of service credit.	Earliest Reduced Retirement Eligibility <u>Defined Benefit Component:</u> VRS: Age 60 with at least five years (60 months) of service credit. <u>Defined Contribution Component:</u> Members are eligible to receive distributions upon leaving employment, subject to restrictions.
Cost-of-Living Adjustment ("COLA") in Retirement The COLA matches the first 3% increase in the Consumer Price Index for all Urban Consumers (CPI-U) and half of any additional increase (up to 4%) up to a maximum COLA of 5%. <u>Eligibility:</u> For members who retire with an unreduced benefit or with a reduced benefit with at least 20 years of service credit, the COLA will go into effect on July 1 after one full calendar year from the retirement date. For members who retire with a reduced benefit and who have less than 20 years of service credit, the COLA will go into effect on July 1 after one calendar year following the	Cost-of-Living Adjustment ("COLA") in Retirement The COLA matches the first 2% increase in the CPI-U and half of any additional increase (up to 2%), for a maximum COLA of 3%. <u>Eligibility:</u> Same as Plan 1.	Cost-of-Living Adjustment ("COLA") in Retirement <u>Defined Benefit Component:</u> Same as Plan 2. <u>Defined Contribution Component:</u> Not applicable. <u>Eligibility:</u> Same as Plan 1 and Plan 2.

Notes to Basic Financial Statements

unreduced retirement eligibility date. <u>Exceptions to COLA Effective Dates:</u> The COLA is effective July 1 following one full calendar year (January 1 to December 31) under any of the following circumstances: • The member is within five years of qualifying for an unreduced retirement benefit as of January 1, 2013. • The member retires on disability. • The member retires directly from short-term or long-term disability. • The member is involuntarily separated from employment for causes other than job performance or misconduct and is eligible to retire under the Workforce Transition Act or the Transitional Benefits Program. • The member dies in service and the member's survivor or beneficiary is eligible for a monthly death-in-service benefit. The COLA will go into effect on July 1 following one full calendar year (January 1 to December 31) from the date the monthly benefit begins.	<u>Exceptions to COLA Effective Dates:</u> Same as Plan 1.	<u>Exceptions to COLA Effective Dates:</u> Same as Plan 1 and Plan 2.
--	---	--

Notes to Basic Financial Statements

Disability Coverage Members who are eligible to be considered for disability retirement and retire on disability, the retirement multiplier is 1.7% on all service, regardless of when it was earned, purchased or granted.	Disability Coverage Members who are eligible to be considered for disability retirement and retire on disability, the retirement multiplier is 1.65% on all service, regardless of when it was earned, purchased or granted.	Disability Coverage Employees of political subdivisions (including Plan 1 and Plan 2 opt-ins) participate in the Virginia Local Disability Program ("VLDP") unless their local governing body provides and employer-paid comparable program for its members. Hybrid members (including Plan 1 and Plan 2 opt-ins) covered under VLDP are subject to a one-year waiting period before becoming eligible for non-work-related disability benefits.
Purchase of Prior Service Members may be eligible to purchase service from previous public employment, active duty military service, an eligible period of leave or VRS refunded service as service credit in their plan. Prior service credit counts toward vesting, eligibility for retirement and the health insurance credit. Only active members are eligible to purchase prior service. Members also may be eligible to purchase periods of leave without pay.	Purchase of Prior Service Same as Plan 1.	Purchase of Prior Service Defined Benefit Component: Same as Plan 1, with the following exceptions: Hybrid Retirement Plan members are ineligible for ported service. Defined Contribution Component: Not applicable.

Employees covered by benefit terms

As of the June 30, 2019 actuarial valuation, the following employees were covered by the benefit terms of the pension plan:

Inactive members or their beneficiaries currently receiving benefits	54
Inactive members:	
Vested inactive members	13
Non-vested inactive members	44
Inactive members elsewhere in VRS	15
Total inactive members	72
Active members	93
Total covered employees	219

Notes to Basic Financial Statement

Contributions

The contribution requirement for active employees is governed by §51.1-145 of the *Code of Virginia*, as amended, but may be impacted as a result of funding options provided to political subdivisions by the Virginia General Assembly. Employees are required to contribute 5.00% of their compensation toward their retirement.

The Authority's contractually required contribution rate for the year ended June 30, 2020 was 0.71% of covered employee compensation. This rate was based on an actuarially determined rate from an actuarial valuation as of June 30, 2017. This rate, when combined with employee contributions, was expected to finance the costs of benefits earned by employee during the year, with an additional amount to finance any unfunded accrued liability. Employer contributions to the pension plan from the Authority were \$274,645 and \$281,704 for the years ended June 30, 2020 and June 30, 2019, respectively.

Net pension asset

The Authority's net pension liability was measured as of June 30, 2019. The total pension asset used to calculate the net pension liability was determined by an actuarial valuation performed as of June 30, 2018, using updated actuarial assumptions, applied to all periods included in the measurement and rolled forward to the measurement date of June 30, 2019.

Actuarial methods and assumptions

The total pension liability for the Authority was based on an actuarial valuation as of June 30, 2017, using the Entry Age Normal actuarial cost method and the following assumptions, applied to all periods included in the measurement and rolled forward to the measurement date of June 30, 2018.

Inflation	2.5%
Salary increases, including inflation	3.5-5.35%
Investment rate of return	6.75%, net of pension plan investment expense, including Inflation*

*Administrative expenses as a percent of the market value of assets for the last experience study were found to be approximately 0.06% of the market assets for all of the VRS plans. This would provide an assumed investment return rate for GAAP purposes of slightly more than the assumed 6.75%. However, since the difference was minimal, and a more conservative 6.75% investment return assumption provided a projected plan net position that exceeded the projected benefit payments, the long-term expected rate of return on investments was assumed to be 6.75% to simplify preparation of pension liabilities.

Mortality rates:

Largest 10 – Non-Hazardous Duty: 20% of deaths are assumed to be service related

Pre-Retirement:

RP-2014 Employee Rates to age 80, Healthy Annuitant Rates at ages 81 and older projected with scale BB to 2020; males 95% of rates; females 105% of rates.

Notes to Basic Financial Statement

Post-Retirement:

RP-2014 Employee Rates to age 49, Healthy Annuitant Rates at ages 50 and older projected with scale BB to 2020; males set forward 3 years; females 1.0% increase compounded from ages 70 to 90.

Post-Disablement:

RP-2014 Disability Mortality Rates projected with scale BB to 2020; males set forward 2 years, 110% of rates; females 125% of rates.

All Others (Non 10 Largest) – Non-Hazardous Duty: 15% of deaths are assumed to be service related

Pre-Retirement:

RP-2014 Employee Rates to age 80, Healthy Annuitant Rates at ages 81 and older projected with scale BB to 2020; males 95% of rates; females 105% of rates.

Post-Retirement:

RP-2014 Employee Rates to age 49, Healthy Annuitant Rates at ages 50 and older projected with scale BB to 2020; males set forward 3 years; females 1.0% increase compounded from ages 70 to 90.

Post-Disablement:

RP-2014 Disability Mortality Rates projected with scale BB to 2020; males set forward 2 years, 110% of rates; females 125% of rates.

The actuarial assumptions used in the June 30, 2018 valuation were based on the results of an actuarial experience study for the period from July 1, 2012 through June 30, 2016, except the change in the discount rate, which was based on VRS Board action effective as of July 1, 2019. Changes to the actuarial assumptions as a result of the experience study and VRS Board action are as follows:

Largest 10 – Non-Hazardous Duty:

Mortality Rates (Pre-retirement, post-retirement healthy, and disabled)	Update to a more current mortality table – RP-2014 projected to 2020
Retirement Rates	Lowered rates at older ages and changed final retirement from 70 to 75
Withdrawal Rates	Adjusted rates to better fit experience at each year age and service through 9 years of service
Disability Rates	Lowered rates
Salary Scale	No change
Line of Duty Disability	Increase rate from 14% to 20%
Discount Rate	Decrease rate from 7.00% to 6.75%

Notes to Basic Financial Statement

All Others (Non 10 Largest) – Non-Hazardous Duty:

Mortality Rates (Pre-retirement, post-retirement healthy, and disabled)	Update to a more current mortality table – RP-2014 projected to 2020
Retirement Rates	Lowered rates at older ages and changed final retirement from 70 to 75
Withdrawal Rates	Adjusted rates to better fit experience at each year age and service through 9 years of service
Disability Rates	Lowered rates
Salary Scale	No change
Line of Duty Disability	Increase rate from 14% to 15%
Discount Rate	Decrease rate from 7.00% to 6.75%

Long-term expected rate of return

The long-term expected rate of return on pension System investments was determined using a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of pension System investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

The target asset allocation and best estimate of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Class (Strategy)	Target Allocation	Arithmetic Long-Term Expected real Rate of Return	Weighted Average Long-Term Expected Real Rate of Return
Public Equity	34.00%	5.61%	1.91%
Fixed Income	15.00%	0.88%	0.13%
Credit Strategies	14.00%	5.13%	0.72%
Real Assets	14.00%	5.27%	0.74%
Private Equity	14.00%	8.77%	1.23%
MAPS	6.00%	3.52%	0.21%
PIP	<u>3.00%</u>	<u>6.29%</u>	<u>0.19%</u>
Total	<u>100.00%</u>		<u>5.13%</u>
Inflation			<u>2.50%</u>
Expected arithmetic nominal return*			<u>7.63%</u>

*The above allocation provides a one-year return of 7.63%. However, one-year returns do not take into account the volatility present in each of the asset classes. In setting the long-term expected return for the system, stochastic projections are employed to model future returns under various economic conditions. The results provide a range of returns over various time periods that ultimately provide a median return of 7.11%, including expected inflation of 2.50%. The VRS Board elected a long-term rate of 6.75% which is roughly at the 40th percentile of expected long-term results of the VRS fund asset allocation.

Notes to Basic Financial Statement

Discount rate

The discount rate used to measure the total pension liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that System member contributions will be made per the VRS Statutes and the employer contributions will be made in accordance with the VRS funding policy at rates equal to the difference between actuarially determined contribution rates adopted by the VRS Board of Trustees and the member rate. Consistent with the phased-in funding provided by the General Assembly for state and teacher employer contributions; political subdivisions were also provided with an opportunity to use an alternate employer contribution rate. For the year ended June 30, 2019, the alternate rate was the employer contribution rate used in FY 2012 or 100% of the actuarially determined employer contribution rate from the June 30, 2017, actuarial valuations, whichever was greater. From July 1, 2019 on, participating employers are assumed to continue to contribute 100% of the actuarially determined contribution rates. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return was applied to all periods of projected benefit payments to determine the total pension liability.

Changes in net pension asset

	Increase (Decrease)		
	Total Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Asset (a)-(b)
Balance at June 30, 2018	\$ 17,409,469	\$ 19,086,013	\$ (1,676,364)
Changes for the year:			
Service cost	298,399	-	298,399
Interest	1,193,021	-	1,193,021
Change of assumptions	510,868		510,868
Difference between expected and actual experience	(296,050)	-	(296,050)
Contributions – employer	-	29,746	(29,746)
Contributions – employee	-	180,784	(180,784)
Net investment income	-	1,259,019	(1,259,019)
Benefit payments, including refunds of employee contributions	(732,983)	(732,983)	-
Administrative expenses	-	(12,705)	12,705
Other changes	-	(791)	791
Net changes	973,255	723,070	250,185
Balance at June 30, 2019	<u>\$ 18,382,904</u>	<u>\$ 19,809,083</u>	<u>\$ (1,426,179)</u>

Notes to Basic Financial Statement

Sensitivity of the net pension asset to changes in the discount rate

The following presents the Authority's net pension asset using the discount rate of 6.75%, as well as what the Authority's net pension asset would be if it were calculated using a discount rate that is one percentage point lower (5.75%) or one percentage point higher (7.75%) than the current rate:

	1% Decrease (5.75%)	Current Rate (6.75%)	1% Increase (7.75%)
Net pension liability (asset)	\$ 863,634	\$ (1,426,179)	\$ (3,263,221)

Pension expense and deferred outflows and deferred inflows of resources related to pensions

For the year ended June 30, 2020, the Authority recognized pension expense of (\$99,775). At June 30, 2020, the Authority reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Employer contributions subsequent to the measurement date	\$ 274,645	\$ -
Differences between expected and actual experience	-	319,221
Changes of assumptions	345,539	22,907
Net difference between projected and actual earnings on pension plan investments	-	174,550
	<u>\$ 620,184</u>	<u>\$ 516,678</u>

Deferred outflows of resources related to pensions of \$274,645 resulting from the Authority's contributions subsequent to the measurement date will be recognized as a reduction of the Net Pension Liability in the year ended June 30, 2021. Other amounts reported as deferred inflows and outflows of resources related to pensions will be recognized in pension expense as follows:

Year Ended June 30:	
2021	\$ (61,753)
2022	(122,623)
2023	1,589
2024	11,648
2025	-
Thereafter	-
	<u>\$ (171,139)</u>

Pension Plan Data

Information about the VRS Political Subdivision Retirement Plan is also available in the separately issued VRS 2019 Comprehensive Annual Financial Report ("CAFR"). A copy of the 2019 VRS CAFR may be downloaded from the VRS website at varetire.org/pdf/publications/2019-annual-report.pdf, or by writing to the System's Chief Financial Officer at P.O. Box 2500, Richmond, VA, 23218-2500.

Notes to Basic Financial Statement

Note 11 – Other Postemployment Benefits

Plan Description

The Authority provides other postemployment health care benefits (“OPEB”) for retired employees through a single-employer defined benefit plan (“Plan”). The benefit levels, employee contributions and employer contributions are governed by the Authority and can be amended by the Authority with approval of the Authority’s Board.

The Authority participates in the Virginia Pooled OPEB Trust Fund (“Trust Fund”), an agent multiple-employer plan that operates an irrevocable trust established for the purpose of accumulating assets to fund postemployment health care benefits. The Trust Fund is established as an investment vehicle for participating employers to accumulate assets to fund OPEB. Plan assets are usually in the form of stocks, bonds, and other classes of investments, that have been segregated and restricted in a trust, in which (a) contributions to the plan are irrevocable, (b) assets are dedicated to providing benefits to retirees and their beneficiaries, and (c) assets are legally protected from creditors of the employer or plan administrator, for the payment of benefits in accordance with terms of the plan. The Trust Fund is governed by a Board of Trustees composed of local officials elected at an Annual Meeting of participants of the Trust Fund that issues a separate CAFR, which can be obtained by requesting a copy from the Plan Administrator, Virginia Risk Sharing Association (“VRSA”), at P.O. Box 12164, Richmond, Virginia 23241.

Plan Membership

Total active and retired membership count in the plan at June 30, 2020 was 110.

The number of retiree participants and active employees currently eligible for immediate retirement benefits for each tier at June 30, 2019 were:

	Tier 1	Tier 2	Tier 3	Total
Retirees	-	3	27	30
Active Employees	-	4	5	9
Total	-	7	32	39

Benefits Provided

On July 1, 2007 the Authority amended its retiree medical benefit plan to include three tiers. The employee’s hire date determines which tier governs future benefits. To participate in one of the three plans, an employee must:

1. Be 60 years old at the time of retirement
2. Be eligible for VRS Retirement
3. Have a least 10 years of full-time service (25 years of full-time service for employees hired July 1, 2007, or after)
4. Be retired in good standing from the Authority

The first tier is applicable to employees with at least 25 years of service and who were promoted or hired to a full-time position on or after July 1, 2007. Eligible retirees receive a monthly contribution credit of \$6 for each year of full-time service.

Notes to Basic Financial Statement

The second tier is applicable to employees who were hired or promoted to a full-time position between the dates of July 1, 1998 and June 30, 2007. This tier provides a monthly contribution credit equaled to a percentage of the monthly premium, based on the following years of service scale:

<u>Years of Service</u>	<u>Contribution</u>
0 to 10	0%
10 to 15	25%
15 to 20	50%
20 to 25	75%
25 and over	100%

The third tier is applicable to employees hired before July 1, 1998. The Authority will pay 100% of the employee's and 50% of the spouse's monthly premium, less a \$15 per month retiree contribution. Upon the death of the retiree, the surviving spouse may continue coverage at full cost.

Spouses are eligible for all three tiers, provided they were enrolled in the Authority's medical plan for at least two years prior to the date of retirement. With the exception of the third tier, retirees are responsible for 100% of monthly premiums attributable to their spouses. Eligible retirees who are age 65 or over must enroll in Medicare Part B coverage and can participate only in the Authority's health insurance plans that coordinate with Medicare benefits.

Contributions

Employer contributions are governed by the Authority and can be amended by the Authority with approval of the Authority's Board. The Authority contributes to the Trust Fund based on an actuarially determined amount. For the year ended June 30, 2020, the Authority's average contribution rate was 9.36% of covered employee payroll. Contributions were \$430,008 and \$419,000 for the years ended June 30, 2020 and June 30, 2019, respectively.

Financial Statements

The Plan does not issue separate stand-alone financial statements in accordance with GAAP and is not a fiduciary activity of the Authority and, as such, is not included within the reporting entity. Information specific to the Plan's activities are included within this section as a source of additional information for the reader of the financial statements.

Plan Actuarial Assumptions

Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and annual required contributions of the Authority are subject to continual revision as actual results are compared with expectations and new estimates are made about the future. The total OPEB liability was determined by an actuarial valuation as of June 30, 2020, using the following actuarial assumptions, applied to all prior periods included in the measurement:

Actuarial cost method	Entry Age Normal
Amortization method	Level percentage of pay
Asset valuation method	Market Value
Investment return	7.00%
Healthcare cost trend rate	8.0% for 2020, decreasing 0.5% per year to an ultimate rate of 5.0% for 2026 and later years

Notes to Basic Financial Statement

Projected salary increases 2.5%, average

Mortality rates were based on the RP-2006 Combined Mortality Table with MP2019 projection for Males or Females, as appropriate.

Investments

The Authority participates in the Trust Fund, an agent multiple-employer plan that operates an irrevocable trust established for the purpose of accumulating assets to fund postemployment health care benefits. Plan assets are usually in the form of stocks, bonds, and other classes of investments, that have been segregated and restricted in a trust, in which (a) contributions to the plan are irrevocable. At June 30, 2020, the actuarial value of the plan assets was \$5,046,315. Historically the rate of return has averaged over 8.0%.

Asset Class	Long-Term Expected Real Rate of Return
Domestic Equity	6.0%
Fixed Income	1.5%
Private Equity	6.0%
Real Estate	5.5%
Cash	0.0%
Total	7.0%

Plan Discount Rate

The discount rate used to measure the total OPEB liability was 7.0%. The projection of cash flows used to determine the discount rate assumed that contributions from the Authority will be made at rates equal to the actuarially determined contribution rates. Based on those assumptions, the Plan's fiduciary net position was projected to be available to make all projected future benefit payments of current Plan members. Therefore, the long-term expected rate of return on Plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability (asset).

Plan Net OPEB asset

The components of the Plan's net OPEB asset at June 30, 2020, were as follows:

Plan total OPEB Liability	\$ 4,082,464
Plan fiduciary net position	<u>5,046,315</u>
Plan net OPEB Asset	<u>\$ (963,851)</u>

Plan fiduciary net position as a percentage of total OPEB liability 123.6%

Sensitivity of the Plan's Net OPEB Asset to Changes in the Plan's Discount Rate

The following presents the Plan's net OPEB asset calculated using the discount rate of 7.0 percent, as well as what the net OPEB asset would be if it were calculated using a discount rate that is 1-percentage-point lower (6.0 percent) or 1-percentage-point higher (8.0 percent) than the current rate:

	1% Decrease (6.0%)	Current Rate (7.0%)	1% Increase (8.0%)
Net pension asset	\$ (549,567)	\$ (963,851)	\$ (1,378,135)

Notes to Basic Financial Statement

Sensitivity of the Plan's Net OPEB Asset to Changes in the Plan's Healthcare Cost Trend Rates

The following presents the Plan's net OPEB asset calculated using the current healthcare cost trend rate of 8.0 percent decreasing to 5.0 percent, as well as what the net OPEB asset would be if it were calculated using healthcare cost trend rates that are 1-percentage-point lower (7.0 percent decreasing to 4.0 percent) or 1-percentage-point higher (9.0 percent decreasing to 6.0 percent) than the current rate:

	1% Decrease (7.0% decreasing to 4.0%)	Current Rate (8.0% decreasing to 5.0%)	1% Increase (9.0% decreasing to 6.0%)
Net pension asset	\$ (1,668,242)	\$ (963,851)	\$ (122,239)

Schedule of Changes in Net OPEB Asset

	Total OPEB Liability	Plan Fiduciary Net Position	Net OPEB Asset
Beginning Balance June 30, 2019	\$ 4,465,135	\$ 4,601,506	\$ (136,371)
Changes for the Year:			
Service cost	55,696	-	55,696
Interest	308,009	-	308,009
Difference between expected & actual experience	(616,368)	-	(616,368)

Note 12 – OPEB - Group Life Insurance

Plan Description

All full-time, salaried permanent employees of the Authority are automatically covered by the VRS GLI Program upon employment. This plan is administered by the Virginia Retirement System (the “System”), along with pensions and other OPEB plans, for public employer groups in the Commonwealth of Virginia.

In addition to the Basic Group Life Insurance benefit, members are also eligible to elect additional coverage for themselves as well as a spouse or dependent children through the Optional Group Life Insurance Program. For members who elect the optional group life insurance coverage, the insurer bills employers directly for the premiums. Employers deduct these premiums from members’ paychecks and pay the premiums to the insurer. Since this is a separate and fully insured program, it is not included as part of the GLI Program OPEB.

Notes to Basic Financial Statement

The specific information for GLI Program OPEB, including eligibility, coverage and benefits is set out in the table below:

GROUP LIFE INSURANCE PROGRAM PLAN PROVISIONS
Eligible Employees The GLI Program was established July 1, 1960, for state employees, teachers and employees of political subdivisions that elect the program, including the following employers that do not participate in VRS for retirement: • City of Richmond • City of Portsmouth • City of Roanoke • City of Norfolk • Roanoke City Schools Board Basic group life insurance coverage is automatic upon employment. Coverage end for employees who leave their position before retirement eligibility or who take a refund of their member contributions and accrued interest.
Benefit Amounts The benefits payable under the GLI Program have several components. • <u>Natural Death Benefit</u> – The natural death benefit is equal to the employee’s covered compensation rounded to the next highest thousand and then doubled. • <u>Accidental Death Benefit</u> – The accidental death benefit is double the natural death benefit. • <u>Other Benefit Provisions</u> – In addition to the basic natural and accidental death benefits, the program provides additional benefits provided under specific circumstances. These include: - o Accidental dismemberment benefit - o Safety belt benefit - o Repatriation benefit - o Felonious assault benefit - o Accelerated death benefit option
Reduction in Benefit Amounts The benefit amounts provided to members covered under the GLI Program are subject to a reduction factor. The benefit amount reduces by 25% on January 1 following one calendar year of separation. The benefit amount reduces by an additional 25% on each subsequent January 1 until it reaches 25% of its original value.
Minimum Benefit Amount and Cost-of-Living Adjustment (“COLA”) For covered members with at least 30 years of service credit, there is a minimum benefit payable under the GLI Program. The minimum benefit was set at \$8,000 by statute in 2015. This amount is increased annually based on the VRS Plan 2 COLA calculation. The minimum benefit adjustment for the COLA was \$8,463 as of June 30, 2020.

Notes to Basic Financial Statements

Contributions

The contribution requirements for the GLI Program are governed by §51.1-506 and §51.1-508 of the *Code of Virginia*, as amended, but may be impacted as a result of funding provided to state agencies and school divisions by the Virginia General Assembly. The total rate for the GLI Program was 1.31% of covered employee compensation. This was allocated into an employee and an employer component using a 60/40 split. The employee component was 0.79% (1.31% X 60%) and the employer component was 0.52% (1.31% X 40%). Employers may elect to pay all or part of the employee contribution; however, the employer must pay all of the employer contribution. Each employer's contractually required employer contribution rate for the year ended June 30, 2019 was 0.52% of covered employee compensation. This rate was based on an actuarially determined rate from an actuarial valuation as of June 30, 2017. The actuarially determined rate, when combined with employee contributions, was expected to finance the costs of benefits payable during the year, with an additional amount to finance any unfunded accrued liability. Contributions to the GLI Program from the entity were \$20,863 and \$20,207 for the years ended June 30, 2019 and June 30, 2018, respectively.

GLI OPEB Liabilities, GLI OPEB Expense, Deferred Outflows of Resources and Deferred Inflows of Resources Related to the Group Life Insurance Program OPEB

At June 30, 2020, the Authority reported a liability of \$322,524 for its proportionate share of the Net GLI OPEB Liability. The Net GLI OPEB Liability was measured as of June 30, 2019 and the total GLI OPEB liability used to calculate the Net GLI OPEB Liability was determined by an actuarial valuation performed as of June 30, 2018, and rolled forward to the measurement date of June 30, 2019. The covered employer's proportion of the Net GLI OPEB Liability was based on the covered employer's actuarially determined employer contributions to the Group Life Insurance Program for the year ended June 30, 2018 relative to the total of the actuarially determined employer contributions for all participating employers. At June 30, 2020, the participating employer's proportion was 0.01982% as compared to 0.01974% at June 30, 2019.

For the year ended June 30, 2020, the participating employer recognized GLI OPEB expense of \$7,468. Since there was a change in proportionate share between measurement dates, a portion of the GLI OPEB expense was related to deferred amounts from changes.

At June 30, 2020, the employer reported deferred outflows of resources and deferred inflows of resources related to the GLI OPEB from the following sources:

Deferred Schedule

	<u>Deferred Outflows of Resources</u>	<u>Deferred Inflows of Resources</u>
Employer contributions subsequent to the measurement date	\$ 20,863	\$ -
Differences between expected and actual experience	21,000	4,000
Change in assumptions	20,000	10,000
Changes in proportion	1,000	28,000
Net difference between projected and actual earnings of Plan investments	-	7,000
Total	<u>\$ 62,863</u>	<u>\$ 49,000</u>

Notes to Basic Financial Statements

\$20,863 reported as deferred outflows of resources related to the GLI OPEB resulting from the employer's contributions subsequent to the measurement date will be recognized as a reduction of the Net GLI OPEB Liability in the Fiscal Year ending June 30, 2020. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to the GLI OPEB will be recognized in the GLI OPEB expense in future reporting periods as follows:

Deferred Expenses

Year Ended June 30:

2021	\$ (7,276)
2022	(7,275)
2023	(4,018)
2024	2,396
2025	6,949
Thereafter	2,224
	<u>\$ (7,000)</u>

Actuarial Assumptions

The total GLI OPEB liability was based on an actuarial valuation as of June 30, 2019, using the Entry Age Normal actuarial cost method and the following assumptions, applied to all periods included in the measurement and rolled forward to the measurement date of June 30, 2020.

Inflation	2.5 percent
Salary increases, including inflation –	
General state employees	3.5 percent – 5.35 percent
Teachers	3.5 percent – 5.95 percent
SPORS employees	3.5 percent – 4.75 percent
VaLORS employees	3.5 percent – 4.75 percent
JRS employees	4.5 percent
Locality – General employees	3.5 percent – 5.35 percent
Locality – Hazardous Duty employees	3.5 percent – 4.75 percent
Investment rate of return	6.75 Percent, net of investment expenses, including inflation*

* Administrative expenses as a percent of the market value of assets for the last experience study were found to be approximately 0.06% of the market assets for all of the VRS plans. This would provide an assumed investment return rate for GAAP purposes of slightly more than the assumed 6.75%. However, since the difference was minimal, and a more conservative 6.75% investment return assumption provided a projected plan net position that exceeded

Notes to Basic Financial Statement

the projected benefit payments, the long-term expected rate of return on investments was assumed to be 6.75% to simplify preparation of the OPEB liabilities.

Mortality rates – Largest Ten Locality Employers - General Employees

Pre-Retirement:

RP-2014 Employee Rates to age 80, Healthy Annuitant Rates to 81 and older projected with Scale BB to 2020; males 95% of rates; females 105% of rates.

Post-Retirement:

RP-2014 Employee Rates to age 49, Healthy Annuitant Rates at ages 50 and older projected with Scale BB to 2020; males set forward 3 years; females 1.0% increase compounded from ages 70 to 90.

Post-Disablement:

RP-2014 Disability Life Mortality Table projected with scale BB to 2020; males set forward 2 years, 110% of rates; females 125% of rates.

The actuarial assumptions used in the June 30, 2018 valuation were based on the results of an actuarial experience study for the period from July 1, 2012 through June 30, 2016, except the change in the discount rate, which was based on VRS Board action effective as of July 1, 2019. Changes to the actuarial assumptions as a result of the experience study and VRS Board action are as follows:

Mortality Rates (Pre-retirement, post-retirement healthy, and disabled)	Updated to a more current mortality table – RP-2014 projected to 2020
Retirement Rates	Lowered retirement rates at older ages and extended final retirement age from 70 to 75
Withdrawal Rates	Adjusted termination rates to better fit experience at each age and service year
Disability Rates	Lowered disability rates
Salary Scale	No change
Line of Duty Disability	Increased rate from 14% to 20%
Discount Rate	Decrease rate from 7.00% to 6.75%

Mortality rates – Non-Largest Ten Locality Employers - General Employees

Pre-Retirement:

RP-2014 Employee Rates to age 80, Healthy Annuitant Rates to 81 and older projected with Scale BB to 2020; males 95% of rates; females 105% of rates.

Post-Retirement:

RP-2014 Employee Rates to age 49, Healthy Annuitant Rates at ages 50 and older projected with Scale BB to 2020; males set forward 3 years; females 1.0% increase compounded from ages 70 to 90.

Notes to Basic Financial Statements

Post-Disablement:

RP-2014 Disability Life Mortality Table projected with scale BB to 2020; males set forward 2 years, 110% of rates; females 125% of rates.

The actuarial assumptions used in the June 30, 2018 valuation were based on the results of an actuarial experience study for the period from July 1, 2012 through June 30, 2016, except the change in the discount rate, which was based on VRS Board action effective as of July 1, 2019. Changes to the actuarial assumptions as a result of the experience study are as follows:

Mortality Rates (Pre-retirement, post-retirement healthy, and disabled)	Updated to a more current mortality table – RP-2014 projected to 2020
Retirement Rates	Lowered retirement rates at older ages and extended final retirement age from 70 to 75.
Withdrawal Rates	Adjusted termination rates to better fit experience at each age and service year
Disability Rates	Lowered disability rates
Salary Scale	No change
Line of Duty Disability	Increased rate from 14 to 15%
Discount Rate	Decrease rate from 7.00% to 6.75%

Net GLI OPEB Liability

The net OPEB liability (“NOL”) for the GLI Program represents the program’s total OPEB liability determined in accordance with GAAP, less the associated fiduciary net position. As of June 30, 2019, NOL amounts for the GLI Program is as follows (amounts expressed in thousands):

	Group Life Insurance OPEB Program
Total GLI OPEB Liability	\$ 3,390,238
Plan Fiduciary Net Position	<u>1,762,972</u>
Employers’ Net GLI OPEB Liability	<u>\$ 1,627,266</u>
Plan Fiduciary Net Position as a Percentage of the Total GLI OPEB Liability	52.00%

The total GLI OPEB liability is calculated by the System’s actuary, and each plan’s fiduciary net position is reported in the System’s financial statements. The Net GLI OPEB Liability is disclosed in accordance with the requirements of GAAP in the System’s notes to the financial statements and required supplementary information.

Notes to Basic Financial Statement

Long-Term Expected Rate of Return

The long-term expected rate of return on the System's investments was determined using a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of System's investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target asset allocation and best estimate of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Class (Strategy)	Target Allocation	Arithmetic Long-Term Expected real Rate of Return	Weighted Average Long-Term Expected Real Rate of Return
Public Equity	34.00%	5.61%	1.91%
Fixed Income	15.00%	0.88%	0.13%
Credit Strategies	14.00%	5.13%	0.72%
Real Assets	14.00%	5.27%	0.74%
Private Equity	14.00%	8.77%	1.23%
MAPS	6.00%	3.52%	0.21%
PIP	<u>3.00%</u>	<u>6.29%</u>	<u>0.19%</u>
Total	<u>100.00%</u>		<u>5.13%</u>
Inflation			<u>2.50%</u>
Expected arithmetic nominal return*			<u>7.63%</u>

*The above allocation provides a one-year return of 7.63%. However, one-year returns do not take into account the volatility present in each of the asset classes. In setting the long-term expected return for the system, stochastic projections are employed to model future returns under various economic conditions. The results provide a range of returns over various time periods that ultimately provide a median return of 7.11%, including expected inflation of 2.50%. The VRS Board elected a long-term rate of 6.75% which is roughly at the 40th percentile of expected long-term results of the VRS fund asset allocation.

Discount Rate

The discount rate used to measure the total GLI OPEB liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that member contributions will be made per the VRS guidance and the employer contributions will be made in accordance with the VRS funding policy at rates equal to the difference between actuarially determined contribution rates adopted by the VRS Board of Trustees and the member rate. Through the fiscal year ending June 30, 2019, the rate contributed by the entity for the GLI OPEB will be subject to the portion of the VRS Board-certified rates that are funded by the Virginia General Assembly. From July 1, 2019 on, employers are assumed to contribute 100% of the actuarially determined contribution rates. Based on those assumptions, the GLI OPEB's fiduciary net

Notes to Basic Financial Statement

position was projected to be available to make all projected future benefit payments of eligible employees. Therefore, the long-term expected rate of return was applied to all periods of projected benefit payments to determine the total GLI OPEB liability.

Sensitivity of the Employer's Proportionate Share of the Net GLI OPEB Liability to Changes in the Discount Rate

The following presents the employer's proportionate share of the Net GLI OPEB Liability using the discount rate of 6.75%, as well as what the employer's proportionate share of the Net GLI OPEB Liability would be if it were calculated using a discount rate that is one percentage point lower (5.75%) or one percentage point higher (7.75%) than the current rate:

	<u>1.00% Decrease (5.75%)</u>	<u>Current Discount Rate (6.75%)</u>	<u>1.00% Increase (7.75%)</u>
Employer's proportionate share of the GLI Program			
Net OPEB Liability	\$ 423,708	\$ 322,524	\$ 240,467

Group Life Insurance Program Fiduciary Net Position

Detailed information about the GLI Program's Fiduciary Net Position is available in the separately issued VRS 2019 CAFR. A copy of the 2019 VRS CAFR may be downloaded from the VRS website at varetire.org/pdf/publications/2019-annual-report.pdf or by writing to the System's Chief Financial Officer at P.O. Box 2500, Richmond, VA, 23218-2500.

Note 13 – Risk management

The Authority is exposed to the risk of loss due to the wide range of services provided by its employees. Auto fleet coverage, general liability, property damage, building and contents, bridge, inland marine, boiler and machinery, dishonesty bond (crime), workers' compensation, and public officials' and employee's legal liability coverage is obtained through membership in the VRSA Insurance Program. Members are liable for any and all unpaid claims in the event the association is in a deficit position. No settlements have exceeded coverage limits during the three years ended June 30, 2020.

Note 14 – Leases

Office Space Rental – The Authority relocated its corporate office in June 2017 and leases its administrative offices under an operating lease agreement expiring in April 2028. In October 2018, the Authority amended the operating lease agreement for its corporate office to include additional space it acquired for office, storage, and conference rooms. Total annual office lease payments were \$171,000 in fiscal year 2020.

Office Equipment Rental – The Authority leases certain office equipment under operating lease agreements expiring in January 2020 and May 2021. Future minimum lease payments are approximately \$926 for fiscal year 2021.

Rent expense on all leases was approximately \$173,000 in fiscal year 2020.

Notes to Basic Financial Statements

Note 15 – Commitments and Contingencies

Commitments – The Authority has active construction projects and various open purchase orders at times throughout the fiscal year. As of June 30, 2020, the Authority's open construction contracts were:

Project	Fund	Total Contract	Spent to Date	Remaining Commitment
Toll System	Expressway	\$ 18,198,309	\$ 1,331,410	\$ 16,866,899
Protective Coatings	Expressway	4,446,325	2,954,934	1,491,391
Maintenance/Repairs	Expressway	3,991,098	3,274,497	716,603

Litigation – The Authority is contingently liable with respect to lawsuits and other claims that arise in the normal course of its operations. Management of the Authority does not expect that any amount it may have to pay in connection with these matters would have a material adverse effect on the financial position of the Authority.

COVID-19 – During 2020 an outbreak of a COVID-19 emerged globally. As a result of the spread of COVID-19, economic uncertainties have arisen that could negatively impact the Authority's revenue and operations for an indeterminable time period. Other financial impacts could occur that are unknown at this time. The Authority has made operational adjustments to reduce expenses and maintain revenue.

Notes to Required Supplementary Information for Pension For the Year Ended June 30, 2020

Changes of benefit terms – There have been no actuarially material changes to the System benefit provisions since the prior actuarial valuation.

Changes of assumptions – The actuarial assumptions used in the June 30, 2018, valuation were based on the results of an actuarial experience study for the period from July 1, 2012, through June 30, 2016, except the change in the discount rate, which was based on VRS Board action effective as of July 1, 2019. Changes to the actuarial assumptions as a result of the experience study and VRS Board action are as follows:

Largest 10 – Non-Hazardous Duty:

Mortality Rates (Pre-retirement, post-retirement healthy, and disabled)	Update to a more current mortality table – RP-2014 projected to 2020
Retirement Rates	Lowered rates at older ages and changed final retirement from 70 to 75
Withdrawal Rates	Adjusted rates to better fit experience at each year age and service through 9 years of service
Disability Rates	Lowered rates
Salary Scale	No change
Line of Duty Disability	Increase rate from 14% to 20%
Discount Rate	Decrease from 7.00% to 6.75%

Required Supplementary Information (Unaudited)

All Others (Non 10 Largest) – Non-Hazardous Duty:

Mortality Rates (Pre-retirement, post-retirement healthy, and disabled)	Update to a more current mortality table – RP-2014 projected to 2020
Retirement Rates	Lowered rates at older ages and changed final retirement from 70 to 75
Withdrawal Rates	Adjusted rates to better fit experience at each year age and service through 9 years of service
Disability Rates	Lowered rates
Salary Scale	No change
Line of Duty Disability	Increase rate from 14% to 15%
Discount Rate	Decrease from 7.00% to 6.75%

Schedule of Changes in Net OPEB Liability (Asset), and Related Ratios

2019	419,000	419,000	-	4,868,716	8.6%
2020	430,000	430,000	-	4,594,069	9.4%

Schedule is intended to show information for 10 years. Additional years will be displayed as they become available.

Schedule of OPEB Investment Returns

	2018	2019	2020
Annual money-weighted rate of return, net of investment expense	Over 10%	4.7%	3.1%

Schedule is intended to show information for 10 years. Additional years will be displayed as they become available.

OPEB Plan Actuarial Assumptions

The total OPEB liability was determined by an actuarial valuation as of June 30, 2019, using the following actuarial assumptions, applied to all prior periods included in the measurement:

Actuarial cost method	Entry Age Normal
Amortization method	Level percentage of pay
Asset valuation method	Market Value
Investment return	7.00%
Healthcare cost trend rate	8.0% for 2019, decreasing 0.5% per year to an ultimate rate of 5.0% for 2025 and later years
Projected salary increases	3.0%, average

Mortality rates were based on the RP-2014 Combined Mortality Table for Males or Females, as appropriate.

Withdrawal Rates	Adjusted termination rates to better fit experience at each age and service year
Disability Rates	Lowered disability rates
Salary Scale	No change
Line of Duty Disability	Increased rate from 14 to 15%
Discount Rate	Decrease rate from 7.00% to 6.75%

Required Supplementary Information (Unaudited)

Modified Approach for Reporting Infrastructure

As allowed by GAAP, the Authority has adopted an alternative approach in lieu of recording depreciation expense on selected infrastructure assets. Under this alternative method, referred to as the modified approach, the Authority expenses certain maintenance and preservation costs and does not report depreciation expense. Assets accounted for under the modified approach include the entire Expressway System network of roads and bridges that the Authority is responsible to maintain. In order to utilize the modified approach, the Authority is required to:

- Maintain an asset management system that includes an up-to-date inventory of eligible infrastructure assets;
- Perform condition assessments of eligible assets and summarize the results using a measurement scale;
- Estimate each year the annual amount to maintain and preserve the assets at the condition level established and disclosed by the Authority, and
- Document that the assets are being preserved approximately at or above the established condition level.

The following tables, combined with condition assessment ratings, demonstrate the Authority has incurred the necessary expenses to meet its established condition levels.

Pavement condition assessment, measurement scale, and established condition level

The Authority assesses pavement condition on a calendar year basis. The Authority adopted the proposed asphalt specific Washington State Department of Transportation Pavement Condition Rating (“PCR”) System as a guide. Since the surface pavement of the Authority’s Expressway System is composed entirely of asphalt, the Authority’s Consulting Engineer generates a condition rating for defined segments of the Expressway System. A PCR will fall into one of four distinct Treatment Groups with each having corresponding maintenance strategies and potential treatments:

Treatment Group	PCR Score	Pavement Surface Condition	Potential Recommended Maintenance Strategies and Treatments
Group 1	75-100	Excellent to very good	No action to preventative maintenance (crack sealing, isolated patches)
Group 2	50-74	Very good to good	Preventative maintenance to light rehabilitation (crack sealing, shallow patches, deep patches, scarify and thin overlay)
Group 3	25-49	Good to fair	Preventative maintenance to moderate rehabilitation (crack sealing, shallow patches, deep patches, thin overlay, thick overlay, scarify and overlay, mill and overlay)
Group 4	0-24	Poor	Heavy rehabilitation to reconstruction (mill and overlay, total reconstruction)

The Authority last modified the treatment group scoring model in August 2006.

Required Supplementary Information (Unaudited)

The Authority's established condition level requires asphalt pavement be maintained at optimum levels and that no subsection PCR score is less than 40. Condition assessment ratings for the last five inspection cycles were:

Calendar Year	Percentage of Total Lane Miles by Group			
	Group 1	Group 2	Group 3	Group 4
2013	30.3%	68.2%	1.5%	0.0%
2014	14.0%	84.1%	1.9%	0.0%
2015	15.1%	84.4%	0.5%	0.0%
2016	16.7%	82.2%	1.1%	0.0%
2017	42.6%	57.4%	0.0%	0.0%
2018	89.8%	10.1%	0.0%	0.0%
2019	89.8%	10.1%	0.0%	0.0%

Bridge condition assessment, measurement scale, and established condition level

The Authority utilizes the following condition rating scale, established by the Federal Highway Administration ("FHWA") as part of the National Bridge Inspection Standards, to assess the condition of bridges within the Expressway System. The 10-point scale rates the bridge's major structural bridge elements as follows:

Rating	Description
9	Excellent
8	Very good: no problems noted
7	Good: some minor problems
6	Satisfactory: structural elements show some minor deterioration
5	Fair: all primary structural elements are sound but may have minor section loss, cracking, spalling, or scour
4	Poor: advanced section loss, deterioration, spalling, or scour
3	Serious: loss of section, deterioration, spalling, or scour have seriously affected primary structural components; local failures are possible; fatigue cracks in steel or shear cracks in concrete may be present
2	Critical: advanced deterioration of primary structural elements; fatigue cracks in steel or shear cracks in concrete may be present or scour may have removed substructure support; unless closely monitored it may be necessary to close the bridge until corrective action is taken
1	Imminent failure: major deterioration or section loss present in critical structural components or obvious vertical or horizontal movement affecting structure stability; bridge is closed to traffic, but corrective action may put it back in light service
0	Failure: out of service; beyond corrective action

The Authority's established condition level policy requires that no bridge be rated as "structurally deficient", which results when a condition of 4 or worse is assessed to at least one of the major structural elements (deck, superstructure, or substructure). For the 36 bridges in the Authority's inventory, the condition ratings of the major structural elements have been above a rating of 4 for each of the past five inspection cycles (calendar years).

Required Supplementary Information (Unaudited)

In addition to the 10-point-scale for condition ratings as described above, FHWA may classify a bridge as structurally deficient if its load carrying capacity is significantly below current design standards. Boulevard Bridge, built in 1924, was designed using a lower live load capacity than current standards dictate. Considering its live load capacity, Boulevard Bridge is classified as structurally deficient by FHWA in spite of the fact that its condition ratings are greater than a 4. Boulevard Bridge is performing its intended function of connecting a residential neighborhood to areas north of the bridge and remains safe as currently operated by the Authority.

The following table presents the condition level ratings as determined by the Authority's independent certified inspection experts for the major structural elements of each of the Authority's bridges from the most recent inspection cycle (fiscal years 2018/2019):

Bridge Identifier/Name	Deck	Superstructure	Substructure	Culvert
BB, Boulevard Bridge	6	5	6	NA
BR04, Chippenham Parkway	7	6	7	NA

Required Supplementary Information (Unaudited)

Estimated and actual costs, last five fiscal years

The following table presents the Authority's estimate of spending necessary to preserve and maintain the roads and bridges at, or above, the established condition level and the actual amount spent during the past five fiscal years:

Fiscal Year	Estimated Spending (Capital Budget)	Actual Spending
2016	\$ 10,302,123	\$ 7,490,020
2017	19,164,852	12,453,153
2018	29,691,701	10,031,464
2019	18,858,173	14,713,339
2020	10,572,067	11,064,694
	<u>\$ 88,588,916</u>	<u>\$ 55,752,670</u>

The budget process and timing of projects results in spending in one fiscal year from budgets that were approved in the previous year(s). This timing difference does not allow a true comparison of amounts budgeted and spent within a given year. As a result, the Authority had approximately \$5.5 million remaining in its capital budget at the end of fiscal year 2020, which will be carried forward to the next fiscal year.

This table, combined with condition assessment ratings, demonstrate the Authority has incurred the necessary expenses to meet its established condition levels.

Expressway System actual maintenance expense for the last five fiscal years by project group was:

Group	2016	2017	2018	2019	2020
Maintenance and Repair	\$ 5,398,678	\$ 9,571,425	\$ 6,760,426	\$ 8,097,467	\$ 3,655,066
Protective Coatings	831,163	1,209,384	174,293	4,304,911	5,387,589
Inspections and Engineering	615,784	634,774	1,003,702	799,532	863,781
Vehicle Replacement	97,208	33,524	5,439	-	38,499
Toll System Upgrade	-	665,059	1,790,328	1,433,965	728,392
Other	547,187	338,987	297,276	77,464	391,367
	<u>\$ 7,490,020</u>	<u>\$ 12,453,153</u>	<u>\$ 10,031,464</u>	<u>\$ 14,713,339</u>	<u>\$ 11,064,694</u>

Statistical Section

Table of Contents

The statistical section presents detailed information as a context for understanding what the information in the basic financial statements, note disclosures, and required supplementary information indicate about the Authority's financial health over an extended period of time.

Financial Trends

These schedules contain trend information to help the reader understand how the Authority's financial performance and well-being changed over time.

Table 1	Net Position (Deficit) by Component

2019	107,301,010	52,681,124	(13,068,110)	146,914,024
2020	99,330,823	65,051,274	(12,929,719)	151,452,378

- (1) Restricted net position includes amounts restricted for debt service, cash and investments in the Repair and Contingency fund held for capital projects, and required reserves. Balances at year end may fluctuate based on the timing of projects.

The significant net position increase in fiscal year 2014 was due to the transfer of the Expressway Parking Deck; this facility had debt that exceeded the historical asset carrying value by approximately \$25 million prior to the transfer (see Table 2). \$4.5 million of the fiscal year 2015 decrease in the Net Investments in Capital Assets component was due to the transfer of the Stadium (see Table 2).

- (1) Direct operating expenses exclude depreciation, unrealized gains/losses on investments, and preservation and capital maintenance expenses from the Repair & Contingency Fund. Expenses from the Repair & Contingency fund are funded after debt service requirements have been met.
- (2) The Authority has used available funds in the escrow asset bond retirement account to retire bonds ahead of schedule; see the Bonds Payable note disclosure for additional information.
- (3) Debt Service Coverage Ratio (DSCR) is calculated by dividing Net Revenue Available for Debt Service by the Total Required Debt Service.

**Report of Independent Auditor on Internal Control over Financial Reporting and on
Compliance with Other Matters Based on an Audit of Financial Statements Performed
in Accordance with *Government Auditing Standards***

To the Board of Directors
Richmond Metropolitan Transportation Authority
Richmond, Virginia

We have audited, in accordance with the auditing standards generally accepted in the United States of America, the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, and the *Specifications for Audits of Authorities, Boards, and Commissions* issued by the Auditor of Public Accounts of the Commonwealth of Virginia, the financial statements of the Richmond Metropolitan Transportation Authority (the “Authority”), as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise the Authority’s basic financial statements, and have issued our report thereon dated September 30, 2020.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Authority’s internal control over financial reporting (“internal control”) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Authority’s internal control. Accordingly, we do not express an opinion on the effectiveness of the Authority’s internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity’s financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Authority’s financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards* or under the *Specifications for Audits of Authorities, Boards, and Commissions*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

A handwritten signature in dark ink, appearing to read "Cherry Belmont LLP", is written over the printed name.
